## **Floridas Fragile Wildlife:**

**Florida's Fragile Wildlife** Don A. Wood, 2001 An indispensable handbook for resource managers who care about the fate of Florida's wildlife Clay Henderson president emeritus Florida Audubon Society Everyone interested in the conservation of Florida's unique biota especially those actively involved with land management planning should keep a copy of this book within arm's reach George W Tanner University of Florida Conservation and management of Florida's vulnerable wildlife and their habitat has been of great concern for decades and Florida's Fragile Wildlife is a primer for natural resource managers on how to achieve these goals Examining more than 20 threatened species from the perspective of land management the book outlines the benefits of specific conservation initiatives on each species and discusses how those initiatives can be implemented Covering a broad spectrum of Florida habitats Don Wood focuses on selected native species that include the red cockaded woodpecker bald eagle gopher tortoise Florida scrub jay grasshopper sparrow fox squirrel southeastern American kestrel sandhill crane crested caracara burrowing owl wood stork bats beach mice and saltmarsh songbirds Three criteria were used in selecting species the degree to which they would benefit from feasible practical management initiatives how often government agencies receive requests for technical assistance involving their welfare and the incidence of their occurrence on public lands in Florida Unlike other books currently available this work concentrates on management strategies While it provides fundamental biological information each chapter in effect constitutes a well organized conservation plan culminating in a how to menu of specific management techniques including research methodologies It also provides up to date information on the status life history and behavior of each species accompanied by photographs and an appendix that summarizes the array of laws and regulations that apply to the species covered Written in an authoritative yet comprehensible style Florida's Fragile Wildlife will be an essential reference for all conservation professionals in Florida as well as for environmentalists and naturalists interested in land stewardship Don A Wood served as endangered species coordinator for the Florida Fish and Wildlife Conservation Commission Tallahassee 1977-96 and as editorial coordinator for the Division of Wildlife within that agency 1996-2000 He has written extensively on endangered species in Florida and Oklahoma for more than 20 years focusing especially on the red cockaded woodpecker **Florida Wildlife**, 2008 The Longleaf Pine Ecosystem Shibu Jose, Eric J. Jokela, Deborah L. Miller, 2007-09-09 This book unites a wealth of current information on the ecology silviculture and restoration of the Longleaf Pine ecosystem The book includes a discussion of the significant historical social and political aspects of ecosystem management making it a valuable resource for students land managers ecologists private landowners government agencies consultants and the forest products industry **Forces of Nature** Clay Henderson, 2022-11-26 In this comprehensive history of land conservation in Florida Clay Henderson celebrates the individuals and organizations who made the state a leader in state funded conservation and land preservation Wild Capital Barbara K. Jones, 2019-11-11 In Wild Capital Barbara Jones demonstrates that looking at nature through the lens of

the marketplace is a surprisingly effective approach to protecting the environment Showing that policy makers and developers rarely associate wild places with monetary values Jones argues that nature can and should be viewed as a capital asset like any other in order for environmental preservation to be a competitive alternative to development Jones describes how the ecosystem services model a tool that connects human well being with the services nature provides can play a critical role in assigning species and their habitats measurable values She uses five highly recognizable animal species moose manatees sharks wolves and bald eagles as examples to show how highly valued charismatic fauna can serve as symbolic representations of entire ecosystems at risk Through an emphasis on branding incentives and ecotourism Jones advocates for channeling the social and economic power of these and other faces of nature to inspire greater environmental awareness and stewardship Contending that many people don't realize how fiscally pragmatic environmental initiatives can be Jones is optimistic that by recognizing the costs of habitat destruction and diminished biodiversity we will make better choices regarding conservation and development In doing so we can more readily move toward co existence with nature and a sustainable future

*Multi-Purpose Project and Programmatic EIS* ,1999      Red-cockaded Woodpecker Ralph Costa,Susan J. Daniels,2004  
Populations of the red cockaded woodpecker *Picoides borealis* have experienced massive declines since European colonization of North America This is due to extensive habitat loss and alteration Logging of old growth pine forests and alteration of the fire regime throughout the historic range of the species were the primary causes of population decline Listing of the red cockaded woodpecker under the Endangered Species Act of 1973 as amended and increased emphasis on management of non game species have resulted in efforts to recover remnant populations of the red cockaded woodpecker in many parts of its historic range Due to extensive research and adaptive management initiatives much is now known about the elements required for both short and long term management of viable populations of red cockaded woodpeckers A short term strategy is crucial because currently available habitat in nearly all populations is poor in 1 or more critical respects Consequently almost all populations require immediate attention in the short term to insure suitable midstory and understory conditions adequate availability of suitable cavities and restoration of demographic viability through improvements in number and distribution of breeding groups Management techniques including artificial cavities cavity entrance restrictors translocation of birds prescribed fire and mechanical and chemical control of woody vegetation are available to achieve these needs In the long term cost effective management of red cockaded woodpecker populations requires a timber management program and prescribed fire regime that will produce and maintain the stand structure characteristic of high quality nesting and foraging habitat so that additional intensive management specific to the woodpeckers is no longer necessary Timber management that achieves this goal and still allows substantial timber harvest is feasible The implementation of a red cockaded woodpecker management strategy as outlined above represents appropriate ecosystem management in the fire maintained pine ecosystems of the southeastern United States and will ultimately benefit a great number of additional species of plants and animals adapted to this ecosystem      *The Rough Guide to Florida* Sarah Hull,Stephen Keeling,2012-10-11 The Rough Guide to Florida is the ultimate travel guide to this fascinating US state with clear maps and detailed coverage of all the best attractions Discover Florida s highlights with expert information on everything from the bars and art deco gems of South Beach and the iconic theme parks of Orlando to the vast gator filled swamps of the Everglades
