Cato And Varro On Agriculture Loeb Classical Library No 283:

Writing a New Environmental Era Ken Hiltner, 2019-10-16 Writing a New Environmental Era first considers and then rejects back to nature thinking and its proponents like Henry David Thoreau arguing that human beings have never lived at peace with nature Consequently we need to stop thinking about going back to what never was and instead work at moving forward to forge a more harmonious relationship with nature in the future Using the rise of the automobile and climate change denial literature to explore how our current environmental era was written into existence Ken Hiltner argues that the humanities and not as might be expected the sciences need to lead us there In one sense climate change is caused by a rise in atmospheric CO₂ and other so called greenhouse gases Science can address this cause However approached in another way altogether climate change is caused by a range of troubling human activities that require the release of these gases such as our obsessions with cars lavish houses air travel and endless consumer goods The natural sciences may be able to tell us how these activities are changing our climate but not why we are engaging in them That s a job for the humanities and social sciences As this book argues we need to see anthropogenic i e human caused climate change for what it is and address it as such a human problem brought about by human actions A passionate and personal exploration of why the Environmental Humanities matter and why we should be looking forward not back to nature this book will be essential reading for all those interested in the future and sustainability of our planet *A Natural History of Domesticated Mammals* Juliet

Clutton-Brock, 1999-09-02 Humans have manipulated and changed the way of life of other mammals for thousands of years This new edition of *A Natural History of Domesticated Mammals* explores the progress which has been made in understanding the origins of domestication and its spread both biologically and culturally across the world The archaeological evidence for the earliest dating of domestication of each species is included reflecting the recent expansion in such studies Human history has been inexorably linked with the exploitation and often very cruel treatment of animals In today s society attitudes to animal welfare have improved It is now recognised that an understanding of the ecology and behavioural patterns of wild species is necessary in ensuring the well being and correct husbandry of their domesticated descendants This book provides up to date information on the natural history of all the mammals on which human societies have depended for their survival *Plant Breeding Reviews* Jules Janick, 2011-04-22 *Plant Breeding Reviews* presents state

of the art reviews on plant breeding and genetics covering horticultural agronomic and forestry crops incorporating both traditional and molecular methods The contributions are authored by world authorities anonymously reviewed and edited by Professor Jules Janick of Purdue University USA The series is an indispensable resource for crop breeders plant scientists and teachers involved in crop improvement and genetic resources Initiated in 1983 *Plant Breeding Reviews* is published in the form of one or two volumes per year Recently published articles include Epigenetics and Plant Breeding v30 Enhancing Crop Gene Pools with Beneficial Traits Using Wild Relatives v30 Coffee Germplasm Resources Genomics and Breeding v30

Molecular Genetics and Breeding for Fatty Acid Manipulation in Soybean v30 Breeding Southern Highbush Blueberries v30 Development of Fire Blight Resistance by Recombinant DNA Technology v29 **Flush** Bryn Nelson, 2022-09-13 For readers of Giulia Enders Gut and Bill Bryson's The Body a surprising witty and sparkling exploration of the teeming microbiome of possibility in human feces from microbiologist and science journalist Bryn Nelson The future is sh t the literal kind For most of human history we've been well disinclined to take a closer look at our body's natural product the complex antihero of this story save for gleaning some prophecy of our own health But if we were to take more than a passing look at our poop we would spy a veritable cornucopia of possibilities We would see potent medicine sustainable power and natural fertilizer to restore the world's depleted lands We would spy a time capsule of evidence for understanding past lives and murderous ends We would glimpse effective ways of measuring and improving human health from the cradle to the grave early warnings of community outbreaks like Covid 19 and new means of identifying environmental harm and then reversing it Flush is both an urgent exploration of the world's single most squandered natural resource and a cri de coeur or cri de colon for the vast hidden value in our waste Award winning journalist and microbiologist Bryn Nelson PhD leads readers through the colon and beyond with infectious enthusiasm helping to usher in a necessary mental shift that could restore our balance with the rest of the planet and save us from ourselves Unlocking poop's enormous potential will require us to overcome our shame and disgust and embrace our role as the producers and architects of a more circular economy in which lowly byproducts become our species salvation Locked within you is a medicine cabinet a biogas pipeline a glass of drinking water a mound of fuel briquettes it's time to open the doors carefully A dose of medicine a glass of water a gallon of rocket fuel an acre of soil sometimes hope arrives in surprising packages **Amber Waves** Catherine Zabinski, 2020-09-01 A biography of a staple grain we often take for granted exploring how wheat went from wild grass to a world shaping crop At breakfast tables and bakeries we take for granted a grain that has made human civilization possible a cereal whose humble origins belie its world shaping power wheat Amber Waves tells the story of a group of grass species that first grew in scattered stands in the foothills of the Middle East until our ancestors discovered their value as a source of food Over thousands of years we moved their seeds to all but the polar regions of Earth slowly cultivating what we now know as wheat and in the process creating a world of cuisines that uses wheat seeds as a staple food Wheat spread across the globe but as ecologist Catherine Zabinski shows us a biography of wheat is not only the story of how plants ensure their own success from the earliest bread to the most mouthwatering pasta it is also a story of human ingenuity in producing enough food for ourselves and our communities Since the first harvest of the ancient grain we have perfected our farming systems to grow massive quantities of food producing one of our species global mega crops but at a great cost to ecological systems And despite our vast capacity to grow food we face problems with undernourishment both close to home and around the world Weaving together history evolution and ecology Zabinski's tale explores much more than the wild roots and rise of a now ubiquitous grain it illuminates

our complex relationship with our crops both how we have transformed the plant species we use as food and how our society our culture has changed in response to the need to secure food sources From the origins of agriculture to gluten sensitivities from our first selection of the largest seeds from wheat s wild progenitors to the sequencing of the wheat genome and genetic engineering Amber Waves sheds new light on how we grow the food that sustains so much human life Current Catalog National Library of Medicine (U.S.),1967 Includes subject section name section and 1968 1970 technical reports

Kingdoms, Empires, and Domains Mark A. Ragan, 2023 Kingdoms Empires and Domains explores the history of the idea that there is more to the living world than plants and animals Progressing chronologically through philosophical religious literary and other pre scientific traditions leading molecular systematist Mark A Ragan traces how transgressive creatures such as sponges corals algae fungi and diverse microscopic beings have been described categorized and understood throughout history The book also explores how the concept of a third kingdom of life evolved within the fields of scientific botany and zoology and continues to evolve up to the present day

The Oxford Handbook of the Phoenician and Punic Mediterranean Carolina López-Ruiz, Brian R. Doak, 2022 The Phoenicians created the Mediterranean world as we know it yet they remain a shadowy and poorly understood group The academic study of the Phoenicians has come to an important crossroads the field has grown in sheer content sophistication of analysis and diversity of interpretation and we now need a current overview of where the study of these ancient seafarers and craftsman stands and where it is going Moreover the field of Phoenician studies is particularly fragmented and scattered While there is growing interest in all things Phoenician and Punic the latest advances are mostly published in specialized journals and conference volumes in a plethora of languages This Handbook is the first of its type to appear in over two decades and the first ever to appear in English In these chapters written by a wide range of prominent and promising scholars from across Europe North America Australia and the Mediterranean world readers will find summary studies on key historical moments such as the history of Carthage areas of culture organized around language religion and material culture regional studies and areas of contact spanning from the Levant and the Aegean to Iberia and North Africa and the reception of the Phoenicians as an idea entangled with the formation of other cultural identities both ancient and modern

Bees, Wasps, and Weasels Blaženka Scheuer, 2023-07-25 In this book Blaženka Scheuer explores the zoomorphic content of Zibburta bee wasp and Karkuta weasel demeaning names given by R Na man of b Meg 14b to Deborah and Huldah two distinguished prophets of the Hebrew Bible Looking closely at relevant texts she explores ancient beliefs about bees wasps and weasels recounting a variety of key literary and visual motifs

that highlight the different attributes of these animals Scheuer demonstrates the multiple ways in which zoomorphic images were used as interpretative keys both in the formation of Deborah and Huldah stories in the Hebrew Bible and in their subsequent versions In a constant process of interaction with their cultural contexts such zoomorphism represents an attempt to define the rabbinic beliefs about the role of women in Jewish tradition but also about the nature of God Scheuer argues that the symbolic association of bees and weasels with asexual conception and birth also made the zoomorphic slurs about Deborah and Huldah effective as an argument against the doctrine of virgin birth in early Christianity Emphasizing the foundational process of constant negotiation of traditions and textual interpretations Scheuer exposes the culturally rich and religiously competitive world in which the biblical texts were transmitted

Sites Unseen Dianne Harris,D. Fairchild Ruggles,2007-05-27 Sites Unseen challenges conventions for viewing and interpreting the landscape using visual theory to move beyond traditional practices of describing and classifying objects to explore notions of audience and context While other fields such as art history and geography have engaged poststructuralist theory to consider vision and representation the application of such inquiry to the natural or built environment has lagged behind This book by treating landscape as a spatial psychological and sensory encounter aims to bridge this gap opening a new dialogue for discussing the landscape outside the boundaries of current art criticism and theory As the contributors reveal the landscape is a widely adaptable medium that can be employed literally or metaphorically to convey personal or institutional ideologies Walls gates churchyards and arches become framing devices for a staged aesthetic experience or to suit a sociopolitical agenda The optic stimulation of signs symbols bodies and objects combines with physical acts of climbing and walking and sensory acts of touching smelling and hearing to evoke an overall vision of landscape Sites Unseen considers a variety of different perspectives including ancient Roman visions of landscape the framing techniques of a Moghul palace and a contemporary case study of Christo s The Gates as examples of human attempts to shape our sensory cognitive and emotional experiences in the landscape

Archeology of Intangible Heritage Francisco Vaz da Silva,2008 It is remarkable how often we consider certain constructs in other peoples worldview to be myths while in our own case we regard equally arbitrary assumptions as inherent to the nature of things As every anthropologist knows one s most cherished cultural assumptions tend to remain implicit in other words worldview is largely unconscious This book explores the possibility of plumbing obscure aspects of one s own culture in order to assess what some might call regarding other cultures the mythic underpinnings of worldview Seven explorations in folklore and ethnography exhume a conceptual heritage that still influences perception albeit in unconscious ways This archeology of intangible heritage provides the sort of break in intellectual routine that allows us to look anew at familiar things

Current Controversies in Philosophy of Science Shamik Dasgupta,Ravit Dotan,Brad Weslake,2020-10-27 Current Controversies in Philosophy of Science asks twelve philosophers to debate six questions that are driving contemporary work in this area of philosophy The questions are I Are Boltzmann Brains Bad II Does Mathematical

Explanation Require Mathematical Truth III Does Quantum Mechanics Suggest Spacetime is Nonfundamental IV Is Evolution Fundamental When It Comes to Defining Biological Ontology V Is Chance Ontologically Fundamental VI Are Sexes Natural Kinds These debates explore the philosophical foundations of particular scientific disciplines while also examining more general issues in the philosophy of science The result is a book that is perfect for the advanced philosophy student building up their knowledge of the foundations of the field and engaging with its cutting edge questions Preliminary descriptions of each chapter annotated lists of further readings for each controversy and study questions for each chapter help provide clearer and richer snapshots of active controversies for all readers Books in Print ,1991 **Water Displays in Domestic**

Spaces across the Late Roman West Ginny Wheeler,2025-02-28 Analyzes the use of water features in late antique homes across the Western Roman Empire highlighting their aesthetic social and practical significance For ambitious late antique homeowners seeking to demonstrate their status and taste water and its display offered almost infinite possibilities **Water Displays in Domestic Spaces across the Late Roman West** Cultivating Living Buildings presents the first synthesis of the archaeological evidence for late antique water features in both urban houses and extra urban villas across the western Empire Ginny Wheeler examines a wide and varied range of examples from decorative basins and pools to fountains of all forms and water equipped dining couches Through careful analysis and evocative reconstruction of the water displays in their diverse contexts this book explores how they were incorporated into late antique residences the different ways that they enhanced domestic spaces and the potential motives behind their insertion To assess the great efforts to which homeowners particularly in urban settings went to ensure their installation and continued operation one case study focuses on the best preserved cityscape of Ostia While the roles of water features ranged from practical to aesthetic social and symbolic this book highlights their previously under considered contributions to thermal comfort and sensory experience through in depth analyses of two Iberian villas Wheeler identifies broad patterns and regional distinctions in form and decor before reflecting on the multifaceted significance of water in the domestic sphere informed by literary epigraphic and iconographic sources Beyond contributing to the ongoing debate over fountains utility versus aesthetics this research offers new insights into the organization of life at household and neighborhood levels the social relations between homeowners occasioned by water installations and the understanding and application of environmental design in antiquity Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene Christopher Schliephake,Evi Zemanek,2023-02-06 Anticipatory Environmental Hi Stories from Antiquity to the Anthropocene studies the interplay of environmental perception and the way societies throughout history have imagined the future state of nature and the environments in which coming generations would live What sorts of knowledge were and are involved in outlining future environments What kinds of texts and narrative strategies were and are developed and modified over time How did and do scenarios and narratives of the past shape hi stories of the future This book answers these questions from a diachronic as well as a cross cultural perspective By looking at

a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives the contributors illustrate the multifaceted character of environmental anticipation across the ages Horse Power Juliet Clutton-Brock, 1992
Provocatively shows us what a force the horse has been in determining how we live
