## Catia V5r16 User Guide:

Multi-body Dynamic Modeling of Multi-legged Robots Abhijit Mahapatra, Shibendu Shekhar Roy, Dilip Kumar Pratihari, 2020-02-27 This book describes the development of an integrated approach for generating the path and gait of realistic hexapod robotic systems. It discusses in detail locomotion with straight ahead crab and turning motion capabilities in varying terrains like sloping surfaces, staircases, and various user-defined rough terrains. It also presents computer simulations and validation using Virtual Prototyping (VP) tools and real world experiments. The book also explores improving solutions by applying the developed nonlinear constrained inverse dynamics model of the system formulated as a coupled dynamical problem based on the Newton-Euler approach and taking into account realistic environmental conditions. The approach is developed on the basis of rigid multi-body modelling and the concept that there is no change in the configuration of the system in the short time span of collisions.

**Recent Advances in Material, Manufacturing, and Machine Learning** Bjorn Schuller, Rajeev Gupta, Rakesh Mote, Abhishek Sharma, J.P. Giri, R.B. Chadge, 2024-06-17 The main aim of the 2nd international conference on recent advances in materials, manufacturing, and machine learning processes (RAMMML 23) is to bring together all interested academic researchers, scientists, engineers, and technocrats and provide a platform for continuous improvement of manufacturing, machine learning, design, and materials engineering research. RAMMML 2023 received an overwhelming response with more than 530 full paper submissions. After due and careful scrutiny, about 120 of them have been selected for presentation. The papers submitted have been reviewed by experts from renowned institutions, and subsequently the authors have revised the papers duly incorporating the suggestions of the reviewers. This has led to significant improvement in the quality of the contributions. Taylor Francis publications, CRC Press, have agreed to publish the selected proceedings of the conference in their book series of Advances in Mechanical Engineering and Interdisciplinary Sciences. This enables fast dissemination of the papers worldwide and increases the scope

of visibility for the research contributions of the authors
