Computing the Mind Shimon Edelman, 2008-09-08 In a culmination of humanity's millennia long quest for self knowledge the sciences of the mind are now in a position to offer concrete empirically validated answers to the most fundamental questions about human nature What does it mean to be a mind How is the mind related to the brain How are minds shaped by their embodiment and environment What are the principles behind cognitive functions such as perception memory language thought and consciousness By analyzing the tasks facing any sentient being that is subject to stimulation and a pressure to act Shimon Edelman identifies computation as the common denominator in the emerging answers to all these questions Any system composed of elements that exchange signals with each other and occasionally with the rest of the

world can be said to be engaged in computation A brain composed of neurons is one example of a system that computes and the computations that the neurons collectively carry out constitute the brain's mind Edelman presents a computational account of the entire spectrum of cognitive phenomena that constitutes the mind He begins with sentience and uses examples from visual perception to demonstrate that it must at its very core be a type of computation Throughout his account Edelman acknowledges the human mind's biological origins Along the way he also demystifies traits such as creativity language and individual and collective consciousness and hints at how naturally evolved minds can transcend some of their limitations by moving to computational substrates other than brains The account that Edelman gives in this book is accessible yet unified and rigorous and the big picture he presents is supported by evidence ranging from neurobiology to computer science The book should be read by anyone seeking a comprehensive and current introduction to cognitive psychology

The Iron Road James Mawdsley,2015-07-07 A startling account of an evil regime and one young man s efforts to defy it Twenty eight year old James Mawdsley spent much of the past four years in grim Burmese prisons The Iron Road is his story and the story of the regime that jailed him the way it jails tortures and kills hundreds of Burmese each day Mawdsley was working in New Zealand when he learned about the struggle of Daw Aung San Suu Kyi the Burmese Nobel laureate who is under house arrest Outraged he went to Burma staged a one man protest and was jailed There his own amazing story begins He is tortured interrogated released jailed again He turns his incarceration into a contest of wits going on a hunger strike toasting the year 2000 with a cigar and prison champagne and requesting 1 packet of freedom 1 bunch human rights and 2 bottles of democracy At the same time he asks himself What leads those of us in peaceful democracies to ignore others suffering just because it is happening over there to them James Mawdsley is a hero in a generation said to lack heroism The Iron Road named for a torture in which skin is scraped from bone with a piece of iron is an urgent call for an end to human rights abuses in Burma and is a keen analysis of the totalitarian mind set And it is the story at once moving and terrifying of how one person can further the cause of justice through sheer will and determination
