Literary Theory and the Claims of History Satya P. Mohanty, 2018-07-05 At the core of postmodern thought especially in literary theory is the belief that such ideals as truth reason and objectivity are social constructs that have no universal or trans historical validity In exploring this constructivist view Satya P Mohanty examines its underlying epistemological claims and their social and political implications His book points the way toward a critical alternative to the epistemological and cultural relativisms Mohanty grounds his critique in readings of some of the major figures of postmodernism including Paul de Man Louis Althusser Fredric Jameson and Jacques Derrida and analyzes the views of Mikhail Bakhtin C S Peirce Hilary Putnam and Richard Rorty particularly their notions of language and referentiality Mohanty defends a post positivist realist conception of objectivity as a legitimate ideal of all inquiry He outlines a realist theory of social identity and multicultural politics which sees radical moral universalism and cultural diversity as complementary not competing ideals

Emergence in Mind Cynthia Macdonald, Graham Macdonald, 2010-04-29 There have long been controversies about how it is that minds can fit into a physical universe *Emergence in Mind* presents new essays by a distinguished group of philosophers investigating whether mental properties can be said to emerge from the physical

processes in the universe Such emergence requires mental properties to be different from physical properties and much of the discussion relates to what the consequences of such a difference might be in areas such as freedom of the will and the possibility of scientific explanations of non physical for example social phenomena The volume also extends the debate about emergence by considering the independence of chemical properties from physical properties and investigating what would need to be the case for there to be groups that could be said to exercise rationality

After Speculative Realism Charlie Johns,Hilan Bensusan,2025-01-23 Building upon the contributions to the movement of Speculative Realism by Ray Brassier Iain Hamilton Grant Graham Harman and Quentin Meillassoux After Speculative Realism broadens and intensifies a number of key arguments in the field engaging with both major philosophers of the past such as Hegel and Kant and contemporary thinkers like Badiou and i ek The four original Speculative Realists were united by a seemingly stubborn fidelity towards the real as

that which differed from sense experience reason the empirical sciences representation language and normativity This volume further explores the ideas and arguments they had given regarding the potency of the real but also investigates how the correlate between thinking and being may have been misinformed or limited by a specific reading of phenomenology a motivation to separate appearance from reality and a desire to revitalise the Kantian notion of noumena After Speculative Realism charts the gap between the denouement of Speculative Realism and the birth of its contemporary successors such as the new realism of Maurizio Ferraris the kinetic ontology of Thomas Nail the transgressive realism of Lee Braver the real abstraction popularised by Alfred Sohn Rethel various spectral realisms Laruellian realisms and much more

Constructing Cause in International Relations Richard Ned Lebow, 2014-02-20 Cause is a problematic concept in social science as in all fields of knowledge We organise information in terms of cause and effect to impose order on the world but this can impede a more sophisticated understanding In his latest book Richard Ned Lebow reviews understandings of cause in physics and philosophy and concludes that no formulation is logically defensible and universal in its coverage This is because cause is not a feature of the world but a cognitive shorthand we use to make sense of it In practice causal inference is always rhetorical and must accordingly be judged on grounds of practicality Lebow offers a new approach inefficient causation that is constructivist in its emphasis on the reasons people have for acting as they do but turns to other approaches to understand the aggregation of their behaviour This novel approach builds on general understandings and idiosyncratic features of context
