**Inequality Reexamined** Amartya Sen,1995-03-15 The noted economist and philosopher Amartya Sen argues that the dictum all people are created equal serves largely to deflect attention from the fact that we differ in age gender talents and physical abilities as well as in material advantages and social background He argues for concentrating on higher and more basic values individual capabilities and freedom to achieve objectives By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals Sen adds an important new angle to arguments about such vital issues as gender inequalities welfare policies affirmative action and public provision of health care and education

Philosophical Letters of David K. Lewis David Kellogg Lewis,2020 The life long correspondence of David K Lewis one of the most influential philosophers of the twentieth century reveals the development breadth and depth of his philosophy in its historical context The first of this two volume collection of letters focuses on his contributions to metaphysics arguably where he made his greatest impact Philosophical Letters of David K. Lewis David K. Lewis,2020-10-29 David Kellogg Lewis 1941 2001 was one of the most influential philosophers of the twentieth century He made significant contributions to almost every area of analytic philosophy including metaphysics philosophy of language philosophy of mind and philosophy of science and set the agenda for various debates in these areas which carry on to this day In several respects he remains a contemporary figure yet enough time has now passed for historians of philosophy to begin to study his place in twentieth century thought His philosophy was constructed and refined not just through his published writing but also crucially through his life long correspondence with fellow philosophers including leading figures such as D M Armstrong Saul Kripke W V Quine J J C Smart and Peter van Inwagen His letters formed the undercurrent of his published work and became the medium through which he proposed many of his well known theories and discussed a range of philosophical topics in depth A selection of his vast correspondence over a 40 year period is presented here across two volumes As metaphysics is arguably where Lewis made his greatest contribution this forms the focus of Volume 1 Arranged under the broad areas of Causation Modality and Ontology the letters offer an organic story of the origins development breadth and depth of his metaphysics in its historical context as well as a glimpse into the influence of his many interlocutors This volume will be an indispensable resource for contemporary metaphysics and for those interested in the Lewisian perspective **Ethics and Humanity** N. Ann Davis,Richard Keshen,Jeff McMahan,2010-02-10 Ethics and Humanity pays tribute to Jonathan Glover a pioneering figure whose thought and personal influence have had a significant impact on applied philosophy In topics that include genetic engineering abortion euthanasia war and moral responsibility Glover has made seminal contributions The papers collected here written by some of the most distinguished contemporary moral philosophers address topics to which Glover has

contributed with particular emphasis on problems of conflict discussed in his book *Humanity A Moral History of the Twentieth Century* There are also moving testimonials to the influence Glover has had on colleagues students and friends Glover himself contributes a series of fine replies which constitute an important addition to his published work

**Medicine, patients and the law** Emma Cave, Margaret Brazier, Rob Heywood, 2023-06-06 Embryo research cloning assisted conception neonatal care pandemic vaccine development saviour siblings organ transplants drug trials modern developments have transformed the field of medicine almost beyond recognition in recent decades and the law struggles to keep up In this highly acclaimed and very accessible book Margaret Brazier Emma Cave and Rob Heywood provide an incisive survey of the legal situation in areas as diverse as fertility treatment patient consent assisted dying malpractice and medical privacy The seventh edition of this book has been fully revised and updated to cover the latest cases Brexit related regulatory reform and COVID 19 pandemic measures Essential reading for healthcare professionals lecturers medical and law students this book is of relevance to all whose perusal of the daily news causes wonder hope and consternation at the advances and limitations of medicine patients and the law

**Ethics, Reproduction and Genetic Control** Ruth Chadwick, 2006-12-05 In this revised edition with a new preface from the editor leading scientists explain the nature and goals of test tube reproduction and genetic engineering and their eugenic implications In contrast to the Warnock report the extended commentary considers the issues in the context of a social ethic rather than the individualist viewpoint

**The Ethics of Artificial Uteruses** Stephen Coleman, 2017-11-28 Ectogenesis the gestation of the foetus outside of the human body will not for much longer be in the realm of science fiction a number of projects attempting to develop ectogenetic technology are currently under way This book examines the ethical implications of the development of ectogenesis Examining the implications for abortion ethics in particular this book also deals with the ethical objections to developing such a technology and the uses to which it may be put such as creating embryos to supply donor organs for transplantation The development of the artificial uterus may well be similar to cloning a sudden technological advance with dramatic ethical implications thrust suddenly into the public eye

**The Ethics of the Environment** Robin Attfield, 2017-05-15 This book brings together over thirty of the foremost contributions to environmental ethics from pioneering papers to recent work at the cutting edge of thought in this field It also unites them through an innovative introductory essay which appraises both strengths and weaknesses and presents a distinctive view of the subject Areas covered include the land ethic Deep Ecology biocentric approaches environmental virtue ethics feminist contributions debates on equity and on the interests and representation of future generations preservation sustainability and sustainable development The importance of attempts to discover a comprehensive ethic relevant both to the environment and other key areas of ethical debate is highlighted Robin Attfield has been working in this field for thirty years and has published several related collections and monographs of which the latest is *Environmental Ethics An Overview for the Twenty First Century* published by Polity in 2003 *The Ethics of The*

Environment complements that work from which it incorporates a significant extract about the considerable practical difference that environmental ethics is capable of making

**Mortal Thoughts** Brian Cummings, 2013-08-22 Since the nineteenth century it has been assumed that the concept of personal identity in the early modern period is bound up with secularization. Indeed many explanations of the emergence of modernity have been based on this thesis in which Shakespeare as a secular author has played a central role. However the idea of secularization is now everywhere under threat. The secularity of modern society is less apparent than it was a generation ago. Shakespeare too has come to be seen in a religious perspective. What happens to human identity in this different framework? *Mortal Thoughts* asks what selfhood looks like if we do not assume that an idea of the self could only come into being as a result of an emptying out of a religious framework. It does so by examining human mortality. What it is to be human and how a life is framed by its ending are issues that cross religious confessions in early modernity and interrogate the sacred and secular divide. A series of chapters examines literature and art in relation to concepts such as conscience, martyrdom, soliloquy, luck, suicide and embodiment. Religious and philosophical creativity are revealed as poised around anxieties about finitude and contingency, challenging conventional divisions between kinds of literary and artistic endeavour. *Mortal Thoughts* considers incipient genres of life writing. More Foxe and Montaigne and life drawing. Dürer, Hans Baldung Grien in relation to dramatic representation and literary narration. Shakespeare, Donne, Milton. In the process it asks whether the problem of human identity rewrites historical boundaries.

Disability Deborah Marks, 2014-04-04 Deborah Marks examines current theories and practices relating to disability. The focus of the work is not disabled people as objects of study but rather an analysis of disability as it has been historically and culturally constructed and psychically experienced. The chapters cover language and discourse, the disabled people's movement, the disability professions, public policy, unconscious investments and interpersonal relationships, knowledge and the politics of disability. This text will be essential reading for students on the growing number of Disability Studies courses as well as students, policy makers and professionals in social policy, social work, cultural studies and nursing.

**Understanding Eating Disorders** Simona Giordano, 2005-08-25 Simona Giordano presents the first full philosophical study of ethical issues in the treatment of anorexia and bulimia nervosa. Beginning with a comprehensive analysis of these conditions and an exploration of their complex causes, she then proceeds to address legal and ethical dilemmas such as a patient's refusal of life saving treatment. Illustrated with many case studies, *Understanding Eating Disorders* is an essential tool for anyone working with sufferers of these much misunderstood conditions and for all those ethicists, lawyers and medical practitioners engaged with the widely relevant issues they raise.

**A Theory of Value and Obligation** Robin Attfield, 2020-07-20 Originally published in 1987 and re-issued in 2020 with a new Preface, this book presents and elaborates interrelated solutions to a number of problems in moral philosophy from the location of intrinsic value and the nature of a worthwhile life via the limits of obligation and the nature of justice to the status of moral utterances. After developing a

biocentric account of moral standing the author locates worthwhile life in the development of the generic capacities of a creature whether human or nonhuman and presents an account of relative intrinsic value which later generates a theory of interspecific justice This value theory also informs a consequentialist understanding of obligation of moral rightness and of supererogation The understanding thus supplied is shown to cope with the problems of integrity of justice and of the Repugnant Conclusion in population ethics A cognitivist account of ethical conclusions such as those so far reached is then defended against non cognitivist and relativist objections and a far reaching naturalist theory is defended integrating earlier conclusions with an account of the logic of the fundamental ethical concepts This wide ranging volume which maps the whole area of morality is thoroughly argued with reference both to contemporary philosophical developments and to classical theories

**Reproductive Freedom, Torture and International Human Rights** Ronli Sifris, 2013-12-13 This book contributes to a feminist understanding of international human rights by examining restrictions on reproductive freedom through the lens of the right to be free from torture and other cruel inhuman or degrading treatment Ronli Sifris challenges the view that torture only takes place within the traditional paradigm of interrogation punishment or intimidation of a detainee arguing that this traditional construction of the concept of torture prioritises the experiences of men over the experiences of women given that the pain and suffering from which women disproportionately suffer frequently occurs outside of this context She does this by conceptualising restrictions on women s reproductive freedom within the framework of the right to be free from torture The book considers the gendered nature of international law and the gender dimensions of the right to be free from torture It examines the extension of the prohibition of torture to encompass situations beyond the traditional detainee context in recent years to encompass situations such as rape and female genital mutilation It goes on to explore in detail whether denying access to abortion and involuntary sterilization constitutes torture or other cruel inhuman or degrading treatment under international law The book looks at whether limitations on reproductive freedom meet the determining criteria of torture which are severe pain or suffering being intentionally inflicted being based on discrimination linked in some way to a State official whether they constitute lawful sanctions and the importance of the concept of powerlessness In doing so the book also highlights how this right may be applicable to other gender based abuses including female genital mutilation and how this right may be universally applied to allow women worldwide the right to reproductive freedom

**Ethics, Law and Nursing** Nina Fletcher, Janet Holt, 1995-05-15 An introduction to the ethical and legal dilemmas in nursing practice this text is designed to provoke the nurse to reflect on the nature of his or her professional obligations and future practice The authors firstly familiarise the reader with the basic principles of ethical debate and the overall structure of the legal system as it affects nurses They then address the fundamental dilemmas of nursing practice such as whether or not paternalism can ever be justified if patients have the right to die and what a nurse s response should be to poor professional practice by colleagues The book aims to enhance the reader s understanding of the issues and to educate

nurses to develop their own skills of reasoning and judgement

**Ethics: An Overview** Robin Attfield, 2012-03-08 This is the definitive companion to the study of ethics It provides students with an accessible comprehensive and philosophically rigorous introduction to the major thinkers issues and debates Ideal for use on undergraduate courses but also of lasting value for postgraduate students the structure and content of this textbook closely reflect the way ethics is studied Thematically structured the text provides a historical overview of the subject and a comprehensive introduction to the main branches of ethics meta ethics normative ethics and applied ethics The book also includes coverage of key aspects of value theory and key issues concerning agency and moral responsibility It applies ethics to contemporary issues such as climate change the environment development poverty and war Crucially the book encourages students to do ethics for themselves equipping the reader with a wide ranging grasp of the discipline in all its central areas of contemporary study and reflection Robin Attfield s cogent and thorough analysis is supplemented by student friendly features including chapter summaries study questions exercises and a comprehensive guide to further reading and other resources

**Encyclopedia of Death and Dying** Glennys Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study

**Ethics of Humanitarian Interventions** Georg Meggle, 2013-05-02 Humanitarian Interventions that sounds nice much nicer than wars battles and use of military force Foremost the phrase makes you think of the delivery of sanitary goods medication of soup kitchens Here we are not supposed to think of interventions of this kind we have to have humanitarian interventions in mind which are humanitarian intervention wars I At exactly what point is the use of military force a humanitarian intervention What is the humanitarian aspect of those interventions Their occasion Their motive Their alleged as well as their actual consequences II At exactly what point are humanitarian intervention wars morally justifiable Are they justifiable even if they are wars of aggression breaching international law And finally III Was the war which was presented to us as the

paradigmatic example of a humanitarian intervention war that is the war in Kosovo in the spring of 1999 with over 37 000 bombing missions really justifiable as a humanitarian intervention Many of us wanted to believe so at the time Does our ex ante judgement hold today in an ex post reflection And which lessons for the future should we learn from the success or failure of this humanitarian war These are the questions proposed in this book therefore it is concerned with problems of semantics part I problems of moral assessment part II and with the moral legal and political conclusions we draw from our experiences with the war in Kosovo our primary example of a humanitarian intervention part III International experts in the areas of philosophy international law sociology and peace studies debated these questions vigorously for several days This is the resulting volume Peter Singer Under Fire Jeffrey A. Schaler, 2011-09-30 One of the leading ethical thinkers of the modern age Peter Singer has repeatedly been embroiled in controversy Protesters in Germany closed down his lectures mistakenly thinking he was advocating Nazi views on eugenics Conservative publisher Steve Forbes withdrew generous donations to Princeton after Singer was appointed professor of bioethics His belief that infanticide is sometimes morally justified has appalled people from all walks of life Peter Singer Under Fire gives a platform to his critics on many contentious issues Leaders of the disability rights group Not Dead Yet attack Singer's views on disability and euthanasia Economists criticize the effectiveness of his ideas for solving global poverty Philosophers expose problems in Singer's theory of utilitarianism and ethicists refute his position on abortion Singer's engaging Intellectual Autobiography explains how he came by his controversial views while detailed replies to each critic reveal further surprising aspects of his unique outlook
