

Big Idea 17 – Interdependence

SC.7.L.17.1 Explain and illustrate the roles of and relationships among producers, consumers, and decomposers in the process of energy transfer in a food web.

SC.7.L.17.2 Compare and contrast the relationship among organisms such as mutualism, predation, parasitism, competition, and commensalism.

SC.7.L.17.3 Describe and investigate various limiting factors in the local ecosystem and their impact on native populations, including food, shelter, water, space, disease, parasitism, predation, and nesting sites.

E? What is Ecology?

Ecology is the scientific study of interactions among organisms and between organisms and their physical environment.

Biosphere: consists of all life on Earth and all parts of the Earth in which life exists, including land, water, and the atmosphere.

E? What are biotic and abiotic factors?

The biological influences on organisms are called biotic factors. The physical components of an ecosystem are called abiotic factors.

Biotic Factors: any living part of the environment with which an organism might interact, including animals, plants, mushrooms, and bacteria.

Abiotic Factors: any nonliving part of the environment, such as sunlight, heat, precipitation, humidity, wind or water currents, soil type, and so on.

BIOTIC components

Food availability (alligator diet consists of fish, frogs and invertebrates)
Competition (with snapping turtles and herons for food and other alligators for space/ food/ mates)
Disease (caused by bacteria, viruses or fungi)
Parasites (such as flatworms)
Plants (eg. bald cypress, swamp gum, cypress) provide shade, protection and habitats for prey, recycle nutrients, absorb CO₂ and provide O₂

ABIOTIC components

Temperature of the air/ water (particularly important as alligators are cold-blooded)
Climate (rainfall, humidity, wind... all affect the gator's activity)
Sunlight (intensity as well as length of day/night)
Oxygen available (they need it for respiration)
pH and salinity (could affect its drinking water supply, also indirectly in terms of food availability and plant activity)
