Fcat 5th Grade Math Practice Tests 2011:

The Testing Charade Daniel Koretz, 2017-08-31 For decades we've been studying, experimenting with, and wrangling over different approaches to improving public education, and there's still little consensus on what works and what to do. The one thing people seem to agree on, however, is that schools need to be held accountable; we need to know whether what they're doing is actually working. But what does that mean in practice? High-stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed; it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic, built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high-stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters and measure it in multiple ways, not just via standardized tests. Right now, we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high-stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better.

The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades, studies investigating heritage speaker (HS) linguistic competencies have shown, time and again, that despite being L1 or 2L1 native speakers of their home language, HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals, as well as their monolingual peers. Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields, e.g., L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance important insights for linguistic theory and challenges related to home minority language maintenance, contact policy, and more. A bird's-eye view makes it clear that the methodologies one uses to tap into HSs' linguistic knowledge areas, if not more, are important than the phenomena under investigation, especially in light of how their unique experiences with their heritage and other languages are present across a continuum.
