Kamil, P. David Pearson, Elizabeth Birr Moje, Peter Afflerbach, 2011-03-17 The Handbook of Reading Research is the research handbook for the field Each volume has come to define the field for the period of time it covers Volume IV brings the field authoritatively and comprehensively up to date Problematizing Service-Learning Trae Stewart, Nicole Webster, 2010-12-01 Interest in and research on civic engagement and service learning have increased exponentially In this rapid growth efforts have been made to institutionalize pedagogies of engagement across both K 12 and higher education As a result increased positive attention has been complemented equally by well founded critiques complicating experiential approaches claims and questioning if institutional financial and philosophical commitment is warranted A key complaint from these critical voices is the tightly woven protective insular core in the field of service learning This claim is not unfounded nor necessarily bad Initial efforts to legitimize service learning and other forms of community based education required group cohesion The concern however is that the initial group cohesion has led to groupthink wherein group members have avoided critical analysis and evaluation This book aims to prevent groupthink within the field of service learning by allowing for the examination of effective alternatives by new voices who can serve as critical evaluators from within the field itself Myriad perspectives are offered including empirical theoretical practical and community perspectives Authors challenge preconceived notions of service learning who is benefited by this pedagogy outcomes of participation and implementation and most importantly the theoretical conceptual and methodological lenses through which service learning is even considered The book allows servicelearning s major criticisms to be examined challenges to be voiced and research agendas to be laid This book parallels service learning s presence and popularity across various disciplines fields Chapters are written from broad perspectives and are aimed to inform service learning researchers and educators community organizations and policy makers who consider service learning as a means to address civic responsibility Authors expose theoretical and philosophical concerns circulating in the field and often still occupying spaces on the fringe of discourse action and research The book raises fundamental questions for undergraduate and graduate courses with social justice themes by considering the implications that pedagogies of engagement have on learners and communities **Learning from School Choice** Paul E. Coley, 1985-05-21 During the 1970s a nationwide school finance reform movement fueled by litigation challenging the constitutionality of state education funding laws brought significant changes to the way many states finance their public elementary and secondary school systems School finance reform poses difficult philosophical questions what is the meaning of equality in educational opportunity and of equity in the distribution of tax burdens But it also involves enormous financial complexity for example dividing resources among competing special programs and political risk such as balancing local control with the need for statewide parity For those states like New York that were slow to make changes a new decade has brought new constraints and complications Sluggish economic growth taxpayer revolts reductions in federal aid all affect education revenues And the current concern with educational excellence may obscure the needs of the poor and educationally disadvantaged This book will provide New York s policy makers and other concerned specialists with a better understanding of the political economic and equity issues underlying the school finance reform debate It details existing inequities evaluates current financing formulas and presents options for change Most important for all those concerned with education and public policy in New York and elsewhere it offers a masterful assessment of the trade offs involved in developing reform programs that balance the conflicting demands of resource equalization political feasibility and fiscal responsibility Synthesizes the political and fiscal research on school finance reform and applies it to the New York Context A blueprint for how to redesign state school finance A fine book Public Administration Review This is a book that lucidly discusses the issues in school finance and provides valuable reference material American Political Science Review **Research in Education** , 1974 **Lessons from a Sustainability Education Program** Amy Jean Wefel, 2003
