43. Answer: D

We assume the pressure acting on each piston is the same (we assume the pistons are at the same height). The areas of the three smaller pistons are equal to each other, and each one has half of the area of the large piston on the left. The forces and areas are related as shown below.

$$P_2 = P_1 \quad \frac{F_2}{A_2} = \frac{F_1}{A_1} \quad F_2 = \frac{P_1 A_2}{A_1} = \frac{P_1 A_1}{A_1} \cdot \frac{1}{2} = \frac{F_1}{2}$$

44. Answer: 9.1 cm

28. The U-tube shown in Figure 7 contains only water and is open at both ends. The two points shown are at the same height. If the gauge pressure of P_1 is 0.03 atm, the gauge pressure of P_2 is

- A. less than 0.03 atm
- B. 0.03 atm
- C. greater than 0.03 atm
- D. cannot be determined

29. A container of liquid is shown in Figure 8. The absolute pressure of P_1 is 111,000 Pa. And the density of the liquid is ρ . Which of the following represents the absolute pressure of P_2 ?

- A. $\rho g \Delta h$
- B. 111,000 Pa
- C. $111,000 \text{ Pa} + \rho g \Delta h$
- D. $\rho g \Delta h + P_{\text{atm}}$

Figure 8

30. A balloon is filled with air and then connected to one side of a U-tube as shown in Figure 9. The tube contains water and the other end of the tube is open. The two points shown are at the same height. What is the relationship between the absolute pressures at the two points?

- A. $P_1 = P_2$

Essentials of Modern Materials Science and Engineering James A. Newell, 2008-12-15 This book begins with four fundamental tenants The properties of a material are determined by its structure Processing can alter that structure in specific and predictable ways The behavior of materials is grounded in science and is understandable The properties of all materials change over time with use and exposure to environmental conditions When selecting a material sufficient and appropriate testing must be performed to insure that the material will remain suitable throughout the reasonable life of the product This text assumes that the students are at least sophomores so that they are familiar with basic chemical bonding and the periodic table But it is an introductory materials course so there will be no differential equations percolation theory quantum mechanics statistical thermodynamics or other advanced topics The book is designed as an introduction to the field not a comprehensive guide to all materials science knowledge Instead of

going into great detail in many areas the book provides key concepts and fundamentals students need to understand materials science and make informed decisions An example of the philosophy is found in the materials testing section Although countless variations exist in testing techniques the chapter focuses on operating principles and the property to be measured rather than confusing the student with exposition on variations and exceptions That material is beyond the scope of most introductory courses RRB JE Navigator (PYQ) CBT 2 (Civil Engineering) Umesh Dhande,2024-09-23 This comprehensive guide is designed to cater to the growing demand for accurate and concise solutions to RRB JE The book s key features include 1 Step by Step Solutions Detailed easy to follow solutions to all questions 2 Chapter Wise and Year Wise Analysis In depth analysis of questions organized by chapter and year 3 Detailed Explanations Clear explanations of each question ensuring a thorough understanding of the concepts 4 Simple and Easy to Understand Language Solutions are presented in a straightforward and accessible manner
