Feminist Anthropology Past Present And Future:

Feminist Anthropology Pamela L. Geller, Miranda K. Stockett, 2007-06-19 Feminist Anthropology probes critical issues in the study of gender sex and sexuality While feminist anthropology is often perceived as fragmented this vital new work establishes common ground and situates feminist inquiries within the larger context of social theory and anthropological practice Woman as Mother and Wife in the African Context of the Family in the Light of John Paul II's Anthropological and Theological Foundation Joseph Okech Adhunga, 2014-04-30 This study examines the theological and anthropological foundations of the understanding of the dignity and vocation of woman as a mother and wife gifts given by God that expresses the riches of the African concept of family There are two approaches to inculturation theology in Africa namely that which attempts to construct African theology by starting from the biblical ecclesial teachings and find from them what features of African culture are relevant to the Christian theological and anthropological values and the other one which takes the African cultural background as the point of departure According to John Paul II the dignity and vocation of woman is something more universal based on the very fact of her being a woman within all the interpersonal relationships which in the most varied ways shape society and structure the interaction between all persons Mulieris Dignitatem no 29 This concerns each and every woman independent of the cultural context in which she lives and independently of her spiritual psychological and physical characteristics as for example age education health work and whether she is married or single Mulieris Dignitatem no 29 The theology of inculturation as presented in this dissertation opens the way for the integration of the theological anthropological teachings of John Paul II in understanding African woman as mother and wife The Ashgate Research Companion to Queer Theory Noreen Giffney, Michael O'Rourke, 2016-03-23 This interdisciplinary volume of thirty original essays engages with four key concerns of queer theoretical work identity discourse normativity and relationality The terms queer and theory are put under interrogation by a combination of distinguished and emerging scholars from a wide range of international locations in an effort to map the relations and disjunctions between them These contributors are especially attendant to the many theoretical discourses intersecting with queer theory including feminist theory LGBT studies postcolonial theory psychoanalysis disability studies Marxism poststructuralism critical race studies and posthumanism to name a few This Companion provides an up to the minute snapshot of queer scholarship from the past two decades and identifies many current directions queer theorizing is taking while also signposting several fruitful avenues for future research This book is both an invaluable and authoritative resource for scholars and an indispensable teaching tool for use in the classroom **Handbook of Cultural Sociology** Laura Grindstaff, John R. Hall, Ming-Cheng M. Lo, 2010-09-13 Pt 1 Sociological programs of cultural analysis pt 2 Theories and methodologies in cultural analysis pt 3 Aesthetics ethics and cultural legitimacy pt 4 Individuals and groups identities and performances pt 5 Culture and stratification pt 6 Making using culture pt 7 Cultures of work and professions pt 8 Political cultures pt 9 Global cultures global processes pt 10 Cultural

processes and change **Exploring Sex and Gender in Bioarchaeology** Sabrina C. Agarwal, Julie K. Wesp, 2017-04-01 This volume brings together the latest approaches in bioarchaeology in the study of sex and gender Archaeologists have long used skeletal remains to identify gender Contemporary bioarchaeologists however have begun to challenge the theoretical and methodological basis for sex assignment from the skeleton Simultaneously they have started to consider the cultural construction of the gendered body and gender roles recognizing the body as uniquely fashioned from the interaction of biological social and environmental factors As the contributors to this volume reveal combining skeletal data with contextual information can provide a richer understanding of life in the past **Psychopathy** Luca Malatesti, John McMillan, Predrag Šustar, 2021-12-14 This book explains the ethical and conceptual tensions in the use of psychopathy in different countries including America Canada the UK Croatia Australia and New Zealand It offers an extensive critical analysis of how psychopathy functions within institutional and social contexts Inside readers will find innovative interdisciplinary analysis written by leading international experts The chapters explore how different countries have used this diagnosis A central concern is whether psychopathy is a mental disorder and this has a bearing upon whether it should be used The book's case studies will help readers understand the problems associated with psychopathy Academics and students working in the philosophy of psychiatry bioethics and moral psychology will find it a valuable resource In addition it will also appeal to mental health professionals working in forensic settings psychologists with an interest in the ethical implications of the use of psychopathy as a construct and particularly those with a research interest in it **Handbook of Gender in Archaeology** Sarah M. Nelson, 2006 First reference work to explore the research on gender in archaeology [Bioarchaeologists Speak Out](#) Jane E. Buikstra, 2018-10-26 Bioarchaeologists who study human remains in ancient historic and contemporary settings are securely anchored within anthropology as anthropologists yet they have not taken on the pundits the way other subdisciplines within anthropology have Popular science authors frequently and selectively use bioarchaeological data on demography disease violence migration and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors While bioarchaeologists are experts on these subjects bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye Current issues such as climate change droughts warfare violence famine and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time The contributions in this volume will explore the how and where the data has been misused present new ways of using evidence in the service of making new discoveries and demonstrate ways that our long term interdisciplinarity lends itself to transdisciplinary wisdom We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media **Capital Women** Jan Luiten van Zanden, Tine De Moor, Sarah Carmichael, 2019-02-14 How women

increasingly became economic agents in early modern Europe is the focus of this stimulating book which highlights how female agency was crucial for understanding the development of the Western European economy and sheds light on economic development today Jan Luiten van Zanden Tine De Moor and Sarah Carmichael argue that over centuries a European Marriage Pattern developed characterized by high numbers of singles among men and women high marriage ages among men and women and neolocality where the couple forms a new nuclear household and did not co reside with the parents of either bride or groom This was due to the influence of the Catholic Church s teachings of marriage based on consensus the rise of labor markets and institutions concerning property transfers between generations that enhanced wage labor by women Over time an unprecedented demographic regime was created and embedded in a highly commercial environment in which households interacted frequently with labor capital and commodity markets This was one of the main causes of the gradual move away from a Malthusian state towards an economy able to generate long term economic growth The authors explore how the pattern was influenced by and influenced female human capital formation access to the capital market and participation in the labor market They use numerous measures of economic activity including the unique Girlpower Index that measures the average age at first marriage of women minus the spousal age gap with higher absolute age at marriage and lower spousal age gap both indicating greater female agency and autonomy The book also examines how this measure can increase understanding of contemporary dynamics of women and the economy The authors thus shed light on the degree to which women are allowed to play an influential role in and on the economy and society which varies greatly from one society to another

The Oxford Handbook of Roman Britain Martin Millett,Louise Revell,Alison Moore,2016-09-01 This book provides a twenty first century perspective on Roman Britain combining current approaches with the wealth of archaeological material from the province This volume introduces the history of research into the province and the cultural changes at the beginning and end of the Roman period The majority of the chapters are thematic dealing with issues relating to the people of the province their identities and ways of life Further chapters consider the characteristics of the province they lived in such as the economy and settlement patterns This Handbook reflects the new approaches being developed in Roman archaeology and demonstrates why the study of Roman Britain has become one of the most dynamic areas of archaeology The book will be useful for academics and students interested in Roman Britain

Identity and Subsistence Sarah M. Nelson,2007 Throughout human history gender has served as one of the ways in which human beings form their identities and then make their way in the world But it is not the only way We also discover ourselves through race age class and other categories Increasingly archaeologists are recovering evidence of the ways in which gender has been important in identity formation in the past especially in its interaction with other social factors In Identity and Subsistence a number of scholars look at how the idea of gender has worked with respect to the formation of the self masculinity and femininity human evolution and the development of early agrarian and pastoralist societies

Introduction to LGBTQ+ Studies Deborah P. Amory, Sean G. Massey, Jennifer Miller, Allison P. Brown, 2022-11-01

Introduction to LGBTQ Studies offers accessible academically sound information on a wide range of topics including history culture and Queer Theory an exploration of LGBTQ relationships families parenting health and education and how to conduct research on LGBTQ topics The book explores LGBTQ issues from the ancient world to contemporary global perspectives Employing an intersectional analysis the textbook highlights how sexuality and gender are simultaneously experienced and constructed through other structures of inequality and privilege such as race and class The text supports multiple learning styles by integrating visual elements multimedia resources discussion and project prompts and resources for further research throughout the textbook An OER version of this course is freely available thanks to the generous support of SUNY OER Services Access the book online at <https://milneopentextbooks.org/introduction-to-lgbtq-studies-a-cross-disciplinary-approach>

Warriors and other Men Lisbeth Skogstrand, 2016-07-31 This book questions whether androcentric archaeology has taught us anything about prehistoric men and their masculinities **The Archaeology of Anxiety** Jeffrey Fleisher, Neil Norman, 2015-12-17 Recent efforts to engage more explicitly with the interpretation of emotions in archaeology have sought new approaches and terminology to encourage archaeologists to take emotions seriously This is part of a growing awareness of the importance of senses what we see smell hear and feel in the constitution and reconstitution of past social and cultural lives Yet research on emotion in archaeology remains limited despite the fact that such states underpin many studies of socio cultural transformation The Archaeology of Anxiety draws together papers that examine the local complexities of anxiety as well as the variable stimuli class or factional struggle warfare community construction and maintenance personal turmoil and responsibilities to and relationships with the dead that may generate emotional responses of fear anxiousness worry and concern The goal of this timely volume is to present fresh research that addresses the material dimension of rites and performances related to the mitigation and negotiation of anxiety as well as the role of material culture and landscapes in constituting and even creating periods or episodes of anxiety **Sex and Gender in Ancient Egypt** Carolyn

Graves-Brown, 2008-12-31 This volume offers new research on an essential but often controversial aspect of life in Dynastic Egypt Its originality lies in combining research which uses Egyptology s traditional strengths philological and iconographic with reflections on material culture and on the discipline of Egyptology itself The authors are internationally recognized authorities in their fields **The Plural Turn in Jungian and Post-Jungian Studies** Stefano Carpani, 2021-03-03 This

unique book showcases the cutting edge work of researchers in Jungian and post Jungian studies focusing on the advances being made at the University of Essex UK and operating as a Festschrift for Professor Andrew Samuels The Plural Turn in Jungian and Post Jungian Studies includes contributions from innovative authors who specialise in Jung but incorporate ideas from other psychoanalytic schools and from a range of disciplines The book includes chapters which shed new light on concepts including alchemy archetypes and individuation and which examine art relationships and politics It both honours

the work of Andrew Samuels and sets the foundations of an Essex School of Jungian studies A wide ranging collection this book will be essential for academics and scholars of Jungian and post Jungian studies It will also be a key title for all readers with an interest in the work of Andrew Samuels **The Death of Prehistory** Peter R. Schmidt, Stephen A.

Mrozowski, 2013-11 Since the eighteenth century the concept of prehistory was exported by colonialism to far parts of the globe and applied to populations lacking written records Prehistory in these settings came to represent primitive people still living in a state without civilization and its foremost index literacy Yet many societies outside the Western world had developed complex methods of history making and documentation including epic poetry and the use of physical and mental mnemonic devices Even so the deeply engrained concept of prehistory deeply entrenched in European minds up to the beginning of the twenty first century continues to deny history and historical identity to peoples throughout the world The fourteen essays by notable archaeologists of the Americas Africa Europe and Asia provide authoritative examples of how the concept of prehistory has diminished histories of other cultures outside the West and how archaeologists can reclaim more inclusive histories set within the idiom of deep histories accepting ancient pre literate histories as an integral part of the flow of human history **Systemic** Layal Liverpool, 2024-06-18 In the spirit of Medical Apartheid and Killing the Black Body A

science based data driven and global exploration of racial disparities in health care access by virologist immunologist and science journalist Layal Liverpool Layal Liverpool spent years as a teen bouncing from doctor to doctor each one failing to diagnose her dermatological complaint Just when she'd grown used to the idea that she had an extremely rare and untreatable skin condition one dermatologist after a quick exam told her that she had a classic and common case of eczema and explained that it often appears differently on darker skin Her experience stuck with her making her wonder whether other medical conditions might be going undiagnosed in darker skinned people and whether racism could in fact make people sick The pandemic taught us that diseases like Covid disproportionately affect people of color Here Liverpool goes a step further to show that this disparity exists for all types of illness and that it is caused by racism In Systemic Liverpool shares her journey to show how racism woven into our societies as well as into the structures of medicine and science is harmful to our health Refuting the false belief that there are biological differences between races Liverpool goes on to show that racism related stress and trauma can however lead to biological changes that make people of color more vulnerable to illness debunking the myth of illness as the great equalizer From the problem of racial bias in medicine where the default human subject is white to the dangerous health consequences of systemic racism from the physical and psychological effects of daily microaggressions to intergenerational trauma and data gaps Liverpool reveals the fatal stereotypes that keep people of color undiagnosed untreated and unsafe and tells us what we can do about it Queering the Field Gregory F.

Barz, William Cheng, 2020 Drawing on ethnographic research and often deeply personal experiences with musical cultures Queering the Field Sounding out Ethnomusicology unpacks a history of sentiment that veils the treatment of queer music and

identity within the field of ethnomusicology The thematic structure of the volume reflects a deliberate cartography of queer spaces in the discipline spaces that are strongly present due to their absence are marked by direct sonic parameters or are called into question by virtue of their otherness As the first large scale study of ethnomusicology s queer silences and queer identity politics *Queering the Field* directly addresses the normativities currently at play in musical ethnography fieldwork analysis performance transcription as well as in the practice of musical ethnographers identification participation disclosure observation authority While rooted in strong narrative convictions the authors frequently adopt radicalized voices with the goal of queering a hierarchical sexual binary The essays in the volume present rhetorical and syntactical scenarios that challenge us to read in prescient singular ways for future queer writing and queer thought in ethnomusicology

Hunter-Gatherer Adaptation and Resilience Daniel H. Temple, Christopher M. Stojanowski, 2019 Explores the variety of ways in which hunter gatherer societies have responded to external stressors while maintaining their core identity
