Transformations of Security Studies Gabi Schlag, Julian Junk, Christopher Daase, 2015-10-30 This volume brings together a group of distinguished scholars to engage in a dialogue on key developments in the study of security The book provides a comprehensive overview of theoretical empirical and methodological developments within security studies whose political and societal importance has grown significantly in recent years By bringing together scholars who hold differing perspectives on security this volume provides insights into a variety of approaches and their newest developments including mainstream as well as heterodox perspectives on security Thus it aims to build bridges of communication between different camps by initiating a dialogue on

the identity and diversity of security studies It does so in three parts The first part of the book includes paradigmatic approaches to security that are closely connected to major debates in International Relations such as realism institutionalism constructivism as well as approaches to the culture ethics of security and critical security studies The second part places emphasis on the broadening and deepening of the concept of security in recent decades It discusses key empirical frontiers including the continued centrality of the state the link between democracy and security environmental security as well as financial security The third part of the book presents various methodological approaches to the question of security and peace It provides an overview of new approaches such as the visual turn quantifying security and method combinations This book will be of much interest to students of critical security studies international relations and research methods **The**

Biosecurity Individual Frederike Offizier, 2023-12-04 Discoveries in biomedicine and biotechnology especially in diagnostics have made prevention and self surveillance increasingly important in the context of health practices Frederike Offizier offers a cultural critique of the intersection between health security and identity and explores how the focus on risk and security changes our understanding of health and transforms our relationship to our bodies Analyzing a wide variety of texts from life writing to fiction she offers a critical intervention on how this shift in the medical gaze produces new paradigms of difference and new biomedically facilitated identities biosecurity individuals **Gender, Violence, and**

Human Security Aili Mari Tripp, Myra Marx Ferree, Christina Ewig, 2013-11-15 The nature of human security is changing globally interstate conflict and even intrastate conflict may be diminishing worldwide yet threats to individuals and communities persist Large scale violence by formal and informal armed forces intersects with interpersonal and domestic forms of violence in mutually reinforcing ways Gender Violence and Human Security takes a critical look at notions of human security and violence through a feminist lens drawing on both theoretical perspectives and empirical examinations through case studies from a variety of contexts around the globe This fascinating volume goes beyond existing feminist international relations engagements with security studies to identify not only limitations of the human security approach but also possible synergies between feminist and human security approaches Noted scholars Aili Mari Tripp Myra Marx Ferree and Christina Ewig along with their distinguished group of contributors analyze specific case studies from around the globe ranging from post conflict security in Croatia to the relationship between state policy and gender based crime in the United States Shifting the focus of the term human security from its defensive emphasis to a more proactive notion of peace the book ultimately calls for addressing the structural issues that give rise to violence A hard hitting critique of the ways in which global inequalities are often overlooked by human security theorists Gender Violence and Human Security presents a much needed intervention into the study of power relations throughout the world The Ethical Subject of Security J. Peter Burgess, 2011-02-15 While critical security studies largely concentrates on objects of security this book focuses on the subject position from which securitization and other security practices take place First it argues that the modern subject itself

emerges and is sustained as a function of security and insecurity It suggests consequently that no analytic frame can produce or reproduce the subject in some original or primordial form that does not already reproduce a fundamental or structural insecurity It critically returns through a variety of studies to traditionally held conceptions of security and insecurity as simple predicates or properties that can be associated or not to some more essential more primeval more true or real subject It thus opens and explores the question of the security of the subject itself locating through a reconstruction of the foundations of the concept of security in the modern conception of the subject an irreducible insecurity Second it argues that practices of security can only be carried out as a certain kind of negotiation about values The analyses in this book find security expressed again and again as a function of value cast in terms of an explicit or implicit philosophy of life of culture of individual and collective anxieties and aspirations of expectations about what may be sacrificed and what is worth preserving By way of a critical examination of the value function of security this book discovers the foundation of values as dependent on a certain management of their own vulnerability continuously under threat and thus fundamentally and necessarily insecure This book will be an indispensable resource for students of Critical Security Studies Political Theory Philosophy Ethics and International Relations in general

Security as Politics Neal Andrew W. Neal, 2019-03-21 Andrew W Neal argues that while security was once an anti political exception in liberal democracies a black box of secret intelligence and military decision making at the dark heart of the state it has now become normalised in professional political life This represents a direct challenge to critical security studies debates and their core assumption that security is a kind of illiberal and undemocratic anti politics Using archival research and interviews with politicians Neal investigates security politics from the 1980s to the present day to show how its meaning and practice have changed over time In doing so he develops an original reassessment of the security politics relationship

Sexualities in World Politics Manuela Lavinas Picq, Markus Thiel, 2015-05-15 As LGBTQ claims acquire global relevance how do sexual politics impact the study of International Relations This book argues that LGBTQ perspectives are not only an inherent part of world politics but can also influence IR theory making LGBTQ politics have simultaneously gained international prominence in the past decade achieving significant policy change and provoked cultural resistance and policy pushbacks Sexuality politics more so than gender based theories arrived late on the theoretical scene in part because sexuality and gender studies initially highlighted post structuralist thinking which was hardly accepted in mainstream political science This book responds to a call for a more empirically motivated but also critical scholarship on this subject It offers comparative case studies from regional cultural and theoretical peripheries to identify ways of rethinking IR Further it aims to add to critical theory broadening the knowledge about previously unrecognized perspectives in an accessible manner Being aware of preoccupations with the de queering disciplining nature of theory establishment in the social sciences we critically reconsider IR concepts from a particular LGBTQ vantage point and infuse them with queer thinking Considering the relative dearth of contemporary mainstream IR

theorizing authors ask what contribution LGBTQ politics can provide for conceiving the political subject as well as the international structure in which activism is embedded This book will be of interest to students and scholars of gender politics cultural studies and international relations theory *The Monstrous & the Vulnerable* Leonie B. Jackson, 2022-05-01 In June 2014 Abu Bakr al Baghdadi declared an Islamic State in Iraq and Syria and called for Muslims around the world to migrate there Over the next five years around 150 women left the UK to heed this invitation and the so called jihadi brides were rarely out of the news This book traces the media fascination with those who joined the caliphate including Sally Jones Aqsa Mahmood and Shamima Begum Through an analysis of the media that presented the brides for public consumption Leonie B Jackson reveals the gendered dualistic construction of IS women as either monstrous or vulnerable Just as the monstrous woman was sensationalised as irredeemably evil the vulnerable girl was represented as groomed and na ve Both subjects were constructed in such a way that women s involvement in jihadism was detached from men s scrutinised more closely and explained through gender stereotypes that both erased the agency of female extremists and neglected their stated motivations As Jackson demonstrates these media representations also contributed to the development of new norms for dealing with the brides including targeted killing and the revocation of citizenship While the vulnerable girl was potentially redeemable the monstrous woman was increasingly considered expendable **Security Expertise** Trine Villumsen Berling, Christian Bueger, 2015-04-10 This volume brings together scholars from different fields to explore the power consequences and everyday practices of security expertise Expertise mediates between different forms of knowledge scientific and technological legal economic and political knowledge This book offers the first systematic study of security expertise and opens up a productive dialogue between science and technology studies and security studies to investigate the character and consequences of this expertise In security theory the study of expertise is crucial to understanding whose knowledge informs security making and to reflect on the impact and responsibility of security analysis In science and technology studies the study of security politics adds a challenging new case to the agenda of research on expertise and policy The contributors investigate cases such as academic security studies security think tanks the collaboration between science anthropology and the military transnational terrorism and the ethical consequences of security expertise Together they challenge our understanding of how expertise works and what consequences it has for security politics and international relations This book will be of particular interest to students of critical security studies sociology science and technology studies and IR security studies in general *Contesting Security* Thierry Balzacq, 2014-11-20 *Contesting Security* investigates to what extent the logic of security which underpins securitization can be contained rolled back or dismantled Featuring legitimacy as a cement of security practices this volume presents a detailed account of the logic which sustains security in order to develop a novel approach to the relation between security and the policies in which it is engraved Understanding security as a normative practice the contributors suggest a nuanced and richer take on the conditions under

which it is possible advisable or fair to accept or roll back its policies The book comprises four sections each investigating one specific modality of contesting security practices resistance desecuritization emancipation and resilience These strategies are examined compared and assessed in different political and cultural habitats This book will be of much interest to students of critical security studies securitisation theory social theory and IR in general Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault this volume of essays integrates the analysis of security into the study of modern political and cultural theory Explaining how both politics and security are differently problematised by changing accounts of time the work shows how during the course of the 17th century the problematisation of government and rule became newly enframed by a novel account of time and human finitude which it calls factual finitude The correlate of factual finitude is the infinite and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things It then explains how concrete political form was given to factual finitude by a combination of geopolitics and biopolitics Modern sovereignty required the services of biopolitics from the very beginning The essays explain how these politics of security arose at the same time changed together and have remained closely allied ever since In particular the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations Transnational Companies and Security Governance Jana Hönke, 2013-08-21 This book investigates governance practiced by non state actors It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering beyond the state Based on extensive primary research in the Democratic Republic of Congo South Africa Europe and North America the book compares companies political role in the 19th and 21st centuries It demonstrates that despite a number of disturbing parallels many contemporary practices are not a reversion to the past but unique to the present The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility Companies invest in local communities and offer human rights training to security forces alongside coercive techniques of fortress protection and stability oriented clientele practice and arrangements of indirect rule The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers private security officers NGO collaborators and others practitioners The book argues that hybrid security practices are not the result of an encounter between a supposed local with the liberal global Instead this hybridity is inherent in the transnational and part and parcel of liberal transnational governance Therefore more critical reflection of global governance in practice is required These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly The book will be of interest to anyone interested in business politics and human rights critical security studies peacebuilding

and statebuilding African politics and ethnographic and sociological approaches to global governance and international relations more generally

Our Extractive Age Judith Shapiro, John-Andrew McNeish, 2021-05-30 *Our Extractive Age* Expressions of Violence and Resistance emphasizes how the spectrum of violence associated with natural resource extraction permeates contemporary collective life Chronicling the increasing rates of brutal suppression of local environmental and labor activists in rural and urban sites of extraction this volume also foregrounds related violence in areas we might not expect such as infrastructural developments protected areas for nature conservation and even geoengineering in the name of carbon mitigation Contributors argue that extractive violence is not an accident or side effect but rather a core logic of the 21st Century planetary experience Acknowledgement is made not only of the visible violence involved in the securitization of extractive enclaves but also of the symbolic and structural violence that the governance economics and governmentality of extraction have produced Extractive violence is shown not only to be a spectacular event but an extended dynamic that can be silent invisible and gradual The volume also recognizes that much of the new violence of extraction has become cloaked in the discourse of green development green building and efforts to mitigate the planetary environmental crisis through totalizing technologies Ironically green technologies and other contemporary efforts to tackle environmental ills often themselves depend on the continuance of social exploitation and the contaminating practices of non renewable extraction But as this volume shows resistance is also as multi scalar and heterogeneous as the violence it inspires The book is essential reading for activists and for students and scholars of environmental politics natural resource management political ecology sustainable development and globalization

Citizenship and Security Xavier Guillaume, Jef Huysmans, 2013-08-15 This book engages the intense relationship between citizenship and security in modern politics It focuses on questions of citizenship in security analysis in order to critically evaluate how political being is and can be constituted in relation to securitising practices In light of contemporary issues and events such as human rights regimes terrorism identity control commercialisation of security diaspora and border policies this book addresses a citizenship deficit in security studies The chapters introduce several key political themes that characterise the interplays between citizenship and security changes in citizenship regimes the renewed insecurity of citizenship state relations the emerging ways by which the political and national communities are crafted and the ways democratic societies and regimes react in times of insecurity Approaching citizenship as both a governmental practice and a resource of political contestation the book aims to highlight what political challenges and contestations are created in situations where security intensely meets citizenship today This book will be of interest to scholars of security studies and security politics citizenship studies and international relations

Critical Security and Chinese Politics Juha A. Vuori, 2014-10-24 This book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong The past few decades have produced a rich field of theoretical approaches to security in Europe In this book the security specific notions of securitization the

politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People's Republic of China. This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society. The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners. This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another. It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field. Furthermore this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research. Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio political context they were originally developed in. This book will be of interest to students of critical security studies, Chinese politics, research methods and IR in general.

Governing Borders and Security Catarina Kinnvall, Ted Svensson, 2014-09-19. This book explores and maps the relationship between borders, security and global governance. Theoretically the book seeks to establish to what degree and in what ways traditional notions of borders, security and global governance are being eroded, undermined and contested in the context of a globalising world. Borders are increasingly being re conceptualised to account for connectivity as well as divisions at the same time as focus is shifting from permanence to permeability. The ambivalence ascribed to bordering processes is at heart a security concern: borders are not only entwined with state formation but are also attempts at governing securities, identities and histories. Proceeding from a critical rendering of statist conceptualisations of borders, security and governance, the book not only emphasises the politics of borders, mobility and re locations but also provides a shared groundwork for interrogating the spatial conditions for bordering and border work as manifestations of a continuously deferred becoming rather than being. A principal contribution of the volume is its scrutiny of how borders are enacted and perceived in and through the everyday and of how such production and construal can make sense as acts of resistance to various forms of governing. Such a focus reveals the necessity of investigating how governing from afar affects the possibilities and tendencies to securitise as well as desecuritize within as well as beyond elite settings. This book will be of much interest to students of border studies, human geography, governmentality, global governance and IR.

Security, Technology and Global Politics Mark Lacy, 2014-02-05. This book analyses some of the key problems explored in Paul Virilio's theorising on war and security. Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society, economy and politics. His examination of the connections between geopolitics, war, speed, technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century. Interventions that help us

understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio s writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio s writings on global politics but this book challenges this apocalyptic reading of Virilio s work suggesting that while he doesn t provide us with easy solutions to the problems we face the political force in Virilio s work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general

The Futures of Borders and Geopolitics in South Asia Amena Mohsin,ASM Ali Ashraf,Niloy Ranjan Biswas,Mohammad Atique Rahman,2024-11-18 This book offers a theory driven and evidence based approach to the study of South Asian borders and geopolitics In the book readers will be particularly interested to see the multiple meanings of borders and territoriality and their effects on border communities The analyses found within chapters show how the statist and territorialist definitions of border and geopolitics have given way to the rise of liberal humane and gendered definitions of borders and geopolitics Individual chapters in this volume employ a wide variety of qualitative research methods with some adopting a mixed method approach by combining quantitative and qualitative data The book would be a useful reference to academics and practitioners with a regional interest in South Asia

The Securitisation of Climate Change Thomas Diez,Franziskus von Lucke,Zehra Wellmann,2016-04-28 This book provides the first systematic comparative analysis of climate security discourses It analyses the securitisation of climate change in four different countries USA Germany Turkey and Mexico The empirical analysis traces how specific climate security discourses have become dominant which actors have driven this process what political consequences this has had and what role the broader context has played in enabling these specific securitisations In doing so the book outlines a new and systematic theoretical framework that distinguishes between different referent objects of securitisation territorial individual and planetary and between a security and risk dimension It thereby clarifies the ever increasing literature on different forms of securitisation and the relationship between security risk and politics Whereas securitisation studies have traditionally focused on either a single country case study or a global overview consequently failing to reconstruct detailed securitisation dynamics this is the first book to provide a systematic comparative analysis of climate security discourses in four countries and thus closes an empirical gap in the present literature In addition this comparative framework allows the drawing of conclusions about the conditions for and consequences of successful securitisation based on empirical and comparative analysis rather than theoretical debate only This book will of interest to students of climate change environmental studies critical security global governance and IR in general
