Catching Up Spillovers And Innovation Networks In A Schumpeterian Perspective:

Catching Up, Spillovers and Innovation Networks in a Schumpeterian Perspective Andreas Pyka, Maria da Graça Derengowski Fonseca, 2011-05-10 This book discusses the influence of technological and institutional change on development and growth the impact on innovation of labor markets the spatial distribution of innovation dynamics and the meaning of knowledge generation and knowledge diffusion processes for development policies The individual articles demonstrate the powerful possibilities that emerge from the toolkit of evolutionary and Schumpeterian economics The book shows that evolutionary economics can be applied to the multi faceted phenomena of economic development and that a strong orientation on knowledge and innovation is key to development especially in less developed and emerging economies

Special Issue: Catching Up, Spillovers and Innovation Networks in a Schumpeterian Perspective Andreas Pyka, 2011 **Innovation, Entrepreneurship and Psychological Traits as Factors Influencing Productivity** Justyna Sokołowska-Woźniak, Dariusz Woźniak, 2018 Economic growth and development have been the object of thousands of studies for centuries Researchers are seeking the best explanation of that phenomenon both for pure epistemic and decision making purposes Different studies concentrate on various dimensions of the economic development process in particular time universal and specific area general or for the whole economy and entity economy branch or company Economic development is often expressed in terms of productivity or general welfare income production Recent decades abound in research not only on the relation between economic development and its factors but also on the exploration of the roots of development determinants themselves The articles presented in this issue refer to three factors of economic growth broadly defined as innovation entrepreneurship and other psychological elements of human and social capital covering all dimensions mentioned earlier In the first article the research program of modeling the Schumpeterian vision of innovative development in the Arrow Debreu theory of general equilibrium is extended Agnieszka Lipieta and Andrzej Malawski model the mechanisms of Schumpeterian evolution in the conceptual apparatus of Hurwicz s theory of economic mechanisms The paper aims at the comparative analysis of two types of mechanisms distinguished within Schumpeterian evolution the innovative evolution mechanism as well as the adopting mechanism Due to both the formal conceptual apparatus of the general equilibrium theory and Hurwicz s approach to the problem of designing economic mechanisms the paper takes the form of the axiomatic deductive system of mathematical theorems interpreted in the language of economics In the next article Anna Golejewska examines the innovativeness of enterprises in 69 Polish NUTS3 sub regions in 2014 The analysis is based on unpublished regional data of the Polish Central Statistical Office covering the following variables share of enterprises which have incurred outlays for innovative activities share of enterprises implementing process or product innovations share of companies collaborating in the field of innovation and share of new or modernized products in total production sold in industrial companies The analysis is focused on building rankings and cluster analysis of the NUTS3 regions The research

method applied by the Author is composed of selected techniques of multidimensional comparative analysis principal component analysis and the hierarchical Ward's method. The results show substantial differences among NUTS3 sub regions with regard to the innovativeness of enterprises. The focus of the next study is the innovativeness of a particular industry. Manuel González López analyses the competitive and innovative trajectories followed by the canned fish industry in recent times. The article is based on four case studies from the Galician industry in Spain which comprises the largest share of the European canned fish sector. At least four different innovation patterns are found in the industry. The first pattern is a conservative one where innovation is seen as a risk and therefore maintaining current routines is the chosen option. The second pattern has been defined as large retailer dominated and is followed by companies that have signed exclusive agreements with large retailers which increasingly determine most of their innovation activities. The third strategy is explained as territory orientated since product innovation and incorporation of quality distinctions based on the territory are the main innovation drivers. The last distinguished type is an ecological or nature orientated innovation strategy where meeting ecological normative requirements are the main innovation driver. The last article regarding innovativeness is also focused on a specific industry namely the Swedish agriculture industry. Jennie Cederholm Björklund states that although research shows that sustainable business model innovation SBMI contributes to the creation of sustainable businesses and to the development of a sustainable society Swedish agriculture has not been at the forefront in the use of SBMI. The purpose of the study is to examine the barriers to SBMI in Swedish agriculture in order to understand why farmers seldom engage in SBMI. This qualitative study follows the Gioia methodology. The data for the analysis was acquired in semi structured interviews with entrepreneurs at six family farms in Sweden. The paper makes a theoretical contribution to the research on SBMI with its focus on sustainable entrepreneurship in the Swedish agricultural industry. The paper concludes that the barriers to SBMI are external, internal and contextual where the internal are the largest and most challenging. The next two articles relate to the other factor of economic development specifically to entrepreneurship. In both cases young people students attitudes and behavior were examined. Krzysztof Zioba and Jakub Golik present a brief overview of entrepreneurial self efficacy ESE research and pose the question whether the ESE of Polish students can serve as an early predictor of their subsequent entrepreneurial activities potentially leading them to nascent entrepreneurship. The research material was collected from SEAS Survey on Entrepreneurial Attitudes of Students Project carried out at the Faculty of Management and Economics Gdańsk University of Technology. The research sample was composed of 72 students. ESE was measured in a pre post setting using a single item based on a five point Likert scale. One of the research conclusions is that ESE manifested by students beginners seems to influence their later entrepreneurial behavior in a statistically significant way potentially making ESE a valuable early predictor of future entrepreneurial activities. In the concluding part the study limitations are discussed and future study developments are indicated. Students perception of the level of an entrepreneur's structural

relational and cognitive social capital is the object of Pawe Ziemia ski study The research involved a group of 374 undergraduate business students from a Polish university as participants It was found that participants assessed the level of an entrepreneur s social capital as relatively low Due to the fact that social capital and its different dimensions serve different purposes in the process of venture creation the obtained result can be considered alarming It suggests that it is necessary to review and design activities facilitating the development of an entrepreneurial culture in Poland Two further studies are related to personal traits and their influence on working behavior and productivity The purpose of the article of Muhammad Nawaz Ghulam Abbas Bhatti Ahmad Shahbaz and Ahmed Zeshan is twofold to examine the relationship and impact of peer relationship on organizational commitment by means of and without the moderating role of psychological capital and to examine the association of organizational culture and organizational commitment similarly by way of and without the moderating effect of psychological capital This study is cross sectional by nature in which data were collected from the operational staff of Pakistan railways While investigating the moderating impact of psychological capital on the association of peer relationship and organizational commitment it was found that psychological capital strengthens the relationship of peer relationship and organizational commitment and also strengthens the relationship of organizational culture and organizational commitment as well The research topic of the last article is to examine the utility of the fivefactor model of Costa and McCrae in the context of life insurance industry effectiveness from both theoretical and practical perspectives The research is based on the case study of the four largest life insurance companies 796 most effective agents Results imply the existence of a positive correlation between the level of the selected personality trait intensities and the life insurance agent s sales efficiency Moreover levels of the personality traits of openness to experience consciousness agreeableness and neuroticism are the predictors of life insurance company effectiveness and there are fundamentals for induction to be appropriate for the whole retail financial sector human resources management system The Guest Editors of this publication would like to thank all of the authors for presenting their valuable research which constitutes an interesting representation of a contemporary approach to the sources of socio economic development At the same time they would like to thank all the reviewers who have contributed to improving the articles for this quarterly issue of JEMI and to continuing the high standards of the magazine We hope the articles presented here in this issue will prove to be compelling reading to scholars all over the world and inspire them on to further research on innovativeness entrepreneurship and psychological traits affecting productivity

Economic Complexity and Human Development Dominik Hartmann, 2018-03-12 This book combines the human development approach and innovation economics in order to explore the effects that structural economic change has on human development While economic diversification can provide valuable new social choices and capabilities it also tends to lead to more complex decision processes and changes to the set of capabilities required by people to self determine their future Within this process of structural transformation social networks are crucial for accessing

information and social support but networks can also be a root cause of exclusion and inequality reproduction This implies the need to encourage innovation and economic diversification beyond production expansion focusing on the promotion of human agency and social inclusion This book provides such a modern perspective on development economics emphasizing the role of social networks economic diversity and entrepreneurship for social welfare The author discusses how innovation social networks economic dynamics and human development are interlinked and provides several practical examples of social and micro entrepreneurship in contexts as diverse as Peruvian rural villages and Brazil's urban areas The interdisciplinary perspective put forward in this book illustrates theoretical and methodological methods of exploring the complexity of development in a practical and relevant way It also provides useful information about structural factors which need to be considered by practitioners when designing pro poor growth policies Furthermore the coverage of the core concepts of innovation networks and development economics enriched with multiple examples makes it a valuable resource for scholars and advanced students of modern development economics

Visible Costs and Invisible Benefits Gunnar Eliasson, 2017-11-16 This book examines the historic role of professional and demanding military customers in industrial development Particular emphasis is paid to public procurement of military equipment as a catalyst for innovation and the civilian commercialization of military technologies from gunpowder and cannons to submarines missiles and aircraft is documented by many case illustrations that show how macro level productivity advance has been generated A complementary volume to *Advancing Public Procurement as Industrial Policy 2010* which focused on the spillover effects of the Swedish combat aircraft Gripen in this book Gunnar Eliasson widens the perspective to cover product development across the Swedish defense industry with an emphasis on regional economic development and macro economics inter alia through the involvement of Saab aircraft and Kockums submarines in partnership ventures in Australia Norway and Brazil The volume is organized into four parts Part one examines the historical transformation of the Swedish economy over the past three centuries from agriculture and raw materials to an advanced industrial economy Part two presents detailed case studies to illustrate the spillover effects of procurement projects and military industrial partnerships Part three explains the spillover phenomenon theoretically within a dynamic micro to macro economic perspective Particular emphasis is placed on the empirical credibility of model based economy wide and dynamic cost benefit calculations The book concludes with a section on fostering industrial development

through public procurement The result is a book that will appeal to economists in the industrial economics and management fields to technical marketing and purchasing executives in business and to policy makers in public procurement concerned with innovation and long run industrial development

The Life Cycle of Clusters Dirk Fornahl, Robert Hassink, 2017-04-28 One size fits all cluster policies have been rightly criticized in the literature One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development emergence growth sustainment or decline their cluster is in In this highly insightful book these stage specific cluster policies are analysed and evaluated Moreover several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries

Democracy, Federalism, the European Revolution, and Global Governance Andrea Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance

Bridging Microeconomics and Macroeconomics and the Effects on Economic Development and Growth Kostis, Pantelis C., 2020-10-30 In recent decades the mainstream microeconomic and macroeconomic analysis was proven to be insufficient for exploring the dynamic and complex interactions among humans institutions and nature in our real economy On the one side microeconomics is filled with black box models that fail to study the actual contractual relations between firms and markets while on the other side macroeconomics were proven useless because they mistook the beauty of theoretical models for truth Thus questions have arisen about using new theoretical and empirical structures that would better describe our economic systems Bridging Microeconomics and Macroeconomics and the Effects on Economic Development and Growth is an essential reference source that analyzes the hypotheses that govern the relationships of aggregate structures macroeconomic analysis that may be compatible with the assumptions that govern

the behavior of individuals households and firms micro analysis and vice versa in trying to achieve sustainable economic development and growth Moreover modern evolutionary growth thinking is used in trying to bridge the inconsistencies between microeconomics and macroeconomics and confront their failures in order to better describe the economic reality While highlighting a broad range of topics including globalization economic systems and the role of institutions this book is aimed toward economic analysts financial advisors policymakers researchers academicians and students

Handbook of Research on Innovation and Clusters Charlie Karlsson, 2008 This volume is an important step in furthering the discussion about how cluster strategies work and the implications for theory and policy Jennifer Clark Review of Regional Studies The role of innovations and clusters has increasingly dominated local and regional development policies in recent decades This authoritative and accessible Handbook considers important aspects of high tech clusters analyses insightful cluster case studies and provides a number of recommendations for cluster policies The chapters in this Handbook are written by international experts in the field and present evidence of the scope effects and potential of clusters as concentrations of innovative activities The authors emphasize that cluster development is not the only option for local and regional development and argue that for cluster policies to be worthwhile supporting policies in fields such as education R D transportation and communication infrastructure must accompany most cluster policies Furthermore several contributions

stress that clusters often develop along a life cycle that may end with decline and even the disappearance of clusters. Consequently this Handbook provides the basis for improving both research on innovation and clusters and the formulation and implementation of cluster policies. Furnishing the reader with rich comprehensive discussion of innovations and clusters, this Handbook will be an essential source for researchers and academics in the field as well as policymakers, planners and specialists, development experts and agencies and consultants.

The Oxford Handbook of the Ethiopian Economy Fantu Cheru, Christopher Cramer, Arkebe Oqubay, 2019-01-10. From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle income country by 2025 and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development where the state plays a central role and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg regime between 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

Contested Development in China's Transition to an Innovation-driven Economy Yvette To, 2022-05-19. This book investigates how technology and innovation policies in contemporary China are impacted by collaboration and conflicts between different classes and interests in a world economy in which competitiveness is defined by the successful leverage of emerging technologies. Focusing on the actual processes and outcomes of technological upgrading in three dynamic sectors, the book presents an alternative approach to understanding China's industrial upgrading strategies by examining the ways in which the making and implementation of policies are shaped by political struggles between state actors and dominant capitalist interests in the context of global capitalism. In doing so, the book challenges influential institutionalist approaches as explanations of institutional change, positing instead a political economy framework grounded in social conflict theory to reveal how power relationships and politics are intrinsic to the evolution, form and function of institutions. This book will be of key interest to scholars and students of international political economy, development studies, globalisation and innovation, China and Chinese politics and public policy.
