Healing Corrections Chris Innes, 2015-05-22 Unlike critics who see the organizational cultures of prisons jails and community correction agencies as a problem that needs to be fixed with simple sounding reforms Chris Innes argues instead that these types of organizational cultures are adaptive and a source of strength that can be used to genuinely transform them He shows how operational priorities including safety and security become much more difficult to sustain when organizational cultures become fragmented into disconnected subcultures To transform an organizational culture he argues this fragmentation must be healed by changing the patterns of communication that make up the day to day reality of an organization s culture Innes advocates an innovative approach based on the skills and practices of dialogue He describes in detail how Dialogic Practice can be used to transform organizational cultures through an implementation process that begins with the leadership and cascades through the organization as an expanding circle as staff are trained and become engaged in the process Innes draws upon the research and policy literature in several fields the contemporary national debate on the role of the justice system in American society and his own experience during the last forty years in correctional research and policy and in working directly with correctional agencies This innovative approach to transforming organizational cultures will interest correctional decision makers administrators researchers and graduate students in criminal justice advocates and others who manage mission driven human services organizations
