Handbook of Internet Psychology Adam Joinson, Katelyn McKenna, Tom Postmes, Ulf-Dietrich Reips, 2009-02-12 Over one billion people use the Internet globally. Psychologists are beginning to understand what people do online and the impact being online has on behaviour. It's making us re-think many of our existing assumptions about what it means to be a social being. For instance, if we can talk, flirt, meet people and fall in love online, this challenges many of psychology's theories that intimacy or understanding requires physical co-presence. The Oxford Handbook of Internet Psychology brings together many of the leading researchers in what can be termed Internet Psychology. Though a very new area of research, it is growing at a phenomenal pace. In addition to well-studied areas of investigation such as social identity theory, computer-mediated communication and virtual communities, the volume also includes chapters on topics as diverse as deception and misrepresentation, attitude change and persuasion online, Internet addiction, online relationships, privacy and trust, health and leisure use of the Internet and the nature of interactivity. With over 30 chapters written by experts in the field, the range and depth of coverage is unequalled and serves to define this emerging area of research. Uniquely, this content is supported by an entire section covering the use of the Internet as a research tool, including qualitative and quantitative methods, online survey design, personality testing, ethics and technological and design issues. While it is likely to be a popular research resource to be dipped into as a whole volume, it is coherent and compelling enough to act as a single text book. The Oxford Handbook of Internet Psychology is the definitive text on this burgeoning field. It will be an essential resource for anyone interested in the psychological aspects of Internet use or planning to conduct research using the net.

**Cyberpsychology** Alison Attrill, 2015 Cyberpsychology provides a broad-ranging, thought-provoking account of online behaviour and the opportunities, challenges and risks such behaviour presents. Written by an international team of authors, the book provides diverse perspectives on the impact our interaction with the online landscape has on our identity and behaviour.

*The Routledge Companion to Public Relations* Donnalyn Pompper, Katie R. Place, C. Kay Weaver, 2022-11-01 Public relations is a uniquely pervasive force in our modern economy, influencing every aspect of our lives from the personal to the political. This comprehensive volume provides an expert overview of current scholarship reflecting the impact of technology, society and demographic shifts in a complex global environment. The last century saw the emergence of the public relations discipline. This expertly curated collection explores the dynamic growth in thinking about public relations' role in our changing global society now and into the future. It reflects the challenges and perspectives of postcolonial, postmodern, feminist, critical race theory, social responsibility, sustainability, activist standpoints as well as the profound and unpredictable impact of technological change and social media. Each chapter provides an overview of current knowledge and its roots while engaging with emerging new directions and old debates and advocates for where the research agenda is likely to advance in the future. This unique Companion will be an essential resource for students and researchers in public relations, communication, marketing, media and cultural studies. It provides an authoritative reference for educators and a one-stop repository of public relations knowledge, scholarship and

governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s. Since then, there have been national and global social movements demanding the return of looted art. This shift has established not only that looting is wrong but more importantly that restitution is morally right. As a result of this reframing of what it means to own art, an artifact's historical provenance has become a core element of its value, and the search for provenance and demands for restitution a direct threat to state status. The same objects that granted states high international status now threaten to provoke status decline. In *The Art of Status*, Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles, the Benin Bronzes, and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum. Subotic tells the story of these artworks: how they were looted, how they ended up on display in national museums, and how the art restitution disputes have unfolded. While these cases are different in terms of their historical context of looting and ownership claims, the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states' desire for international status and prestige. An in-depth and nuanced account of art restitution disputes, *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution.

**The Oxford Handbook of Media Psychology** Karen E. Shackleford, Nicholas D.

Bowman, 2025-07-16 The 21st century has seen the use of media technologies become thoroughly integrated with our daily lives. Most of us feel lost without our mobile device in hand, check social media multiple times a day, and turn to digital entertainment in our free time. This shift has spurred the emergence of media psychology, a multidisciplinary approach to studying how people use, process, and are affected by the media and technology they engage every day. This second edition of *The Oxford Handbook of Media Psychology* brings together leading experts in the field to update what is a rapidly evolving area of study. Returning contributors expand chapters on the history and progress of media literacy, research methods, parasocial experiences, and race and the media, among others. New chapters tackle cutting-edge issues like artificial intelligence, research in media and social justice, the impact of deep fakes and social media on conspiracy theories, the psychology of fandom, the self as reflected in avatars, the evolution of video games and virtual reality, and the psychological experience of the pandemic related to media use. Together, this volume retains and broadens our understanding of the foundational aspects of media psychology, from research methods and theory to fields like cognitive and developmental psychology. It presents novel approaches to how we conceptualize, operationalize, and analyze media psychological phenomena. Building on the field-defining research of the first edition, this update collects scholarship covering the most essential developments in media psychology in the last decade.

**Discourse and Identity** Bethan Benwell, 2006-03-15

Identity is a central organizing feature of our social world. Across the social sciences and humanities, it is increasingly treated as something that is actively and publicly accomplished in discourse. This book defines identity in its broadest sense in terms

of how people display who they are to each other Each chapter examines a different discursive environment in which people do identity work everyday conversation institutional settings narrative and stories commodified contexts spatial locations and virtual environments The authors describe and demonstrate a range of discourse and interaction analytic methods as they are put to use in the study of identity including performative analyses conversation analysis membership categorization analysis critical discourse analysis narrative analysis positioning theory discursive psychology and politeness theory The book aims to give readers a clear sense of the coherence or otherwise of these different approaches the practical steps taken in analysis and their situation within broader critical debates Through the use of detailed and original identity case studies in a variety of spoken and written texts in order the book offers a practical and accessible insight into what the discursive accomplishment of identity actually looks like and how to go about analyzing it

### **Discoursal Construction of Academic Identity in Cyberspace**

Małgorzata Sokół, 2011-10-18 The aim of this volume is to look into how academic identity is discursively constructed in CMC computer mediated communication using the example of an e seminar An e seminar is an asynchronous type of CMC where private public and institutional domains merge and therefore it provides an interesting context for exploring academic communication phenomena in cyberspace The linguistic cues of academic identity can be identified on three levels of discourse organisation the features of lexico grammar textual macrostructures and genres In general the analysis shows how these three levels of discourse organisation contribute towards how academics negotiate their identities relative to the aims and activities of their discourse communities and relative to their individual goals The discursive construction of academic identity in electronic discourse depends also on such factors as the medium's defining properties and the lack of direct physical contact between interactants An important finding is the confirmation of the individuating character of the medium i.e. the authors self presentation in an e seminar is characterised by their distinctive voice and increased self disclosure Communication in this context enhances individuality which bears important consequences for how academics negotiate their identity in electronic discourse exploiting the possibilities offered by the new medium The results of the analysis reveal how important it is for scholars to maintain a legitimate identity in an e seminar Virtual academic identity as constructed in this context is as an extension of academic identity constructed in the real world The new communicative medium seems to have extended the repertoire of effective means of self promotion and the presentation of academic achievements and expertise These aspects have become important for academic interaction in today's world which is characterised by such phenomena as the internationalisation and globalisation of scholarship commodification of science and intensified competition The book will be of interest to students and researchers in the fields of discourse analysis academic literacy rhetoric and genre studies and to all those concerned with the complexities of identity work in the context of computer mediated communication
