liminality in which transformation takes place requiring the integration of new understanding and the letting go of previous learning stances Insights gained by learners as they cross thresholds can be exhilarating but might also be unsettling requiring an uncomfortable shift in identity or paradoxically a sense of loss The liminal space can be a suspended state of partial understanding or stuck place in which understanding approximates to a kind of mimicry Threshold Concepts and Transformational Learning substantially increases the empirical evidence for threshold concepts across a large number of disciplinary contexts and from the higher education sectors of many countries This new volume develops further theoretical perspectives and provides fresh pedagogical directions It will be of interest to teachers practitioners and managers in all disciplines as well as to educational researchers
