Handbook of Second Language Assessment Dina Tsagari, Jayanti Banerjee, 2016-03-07 Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment, with chapters on the purposes of assessment and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills, including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of voice in second language assessment, and assessment literacy for teachers and other test and score users.

Analysing Student Feedback in Higher Education Elena Zaitseva, Beatrice Tucker, Elizabeth Santhanam, 2021-12-29 *Analysing Student Feedback in Higher Education* provides an in-depth analysis of mining student feedback that goes beyond numerical measures of student satisfaction or engagement. By including authentic student voices for understanding the student experience, this book will inform strategies for quality improvement in higher education globally. With contributions representing an international community of academics, educational developers, institutional data analysts, and student researchers, this book reflects on the role of computer-aided text analysis in gaining insight of student views. The chapters explore the applications of text mining in different forms; these include varied institutional contexts, using a range of instruments and pursuing different institutional aims and objectives. Contributors provide insights enabled by computer-aided analysis in distilling the student voice and turning large volumes of data into useful information and knowledge to inform actions. Practical tips and core principles are explored to assist academic institutions when embarking on analysing qualitative student feedback. Written for a wide audience, *Analysing Student Feedback in Higher Education* provides those making informed decisions about how to approach analyses of large volumes of student narratives with the benefit of learning from the experiences of those who already started treading this path. It enables academic developers, institutional researchers, academics, and administrators to see how bringing text mining to their institutions can help them in better understanding and using the student voice to improve practice.

Introductory Econometrics: Asia Pacific Edition with Online Study Tools 12 Months Jeffrey M.

Wooldridge, Mokhtarul Wadud, Jenny Lye, 2016-10-24 Econometrics is the combined study of economics and statistics and is an applied unit. It is increasingly becoming a core element in finance degrees at upper levels. This first local adaptation of Wooldridge's text offers a version of Introductory Econometrics with a structural redesign that will better suit the market along with Asia Pacific examples and data. Two new chapters at the start of the book have been developed from material originally in Wooldridge's appendix section to serve as a clear introduction to the subject and as a revision tool that bridges students' transition from basic statistics into econometrics. This adaptation includes data sets from Australian and New Zealand as well as from the Asia Pacific region to suit the significant portion of finance students who are from Asia and the likelihood that many graduates will find employment overseas.

Analyzing Discourse and Text Complexity for

Learning and Collaborating Mihai Dascălu, 2013-11-26 With the advent and increasing popularity of Computer Supported Collaborative Learning (CSCL) and e-learning technologies, the need for automatic assessment and of teacher/tutor support for the two tightly intertwined activities of comprehension of reading materials and of collaboration among peers has grown significantly. In this context, a polyphonic model of discourse derived from Bakhtin's work as a paradigm is used for analyzing both general texts and CSCL conversations in a unique framework focused on different facets of textual cohesion. As specificity of our analysis, the individual learning perspective is focused on the identification of reading strategies and on providing a multi-dimensional textual complexity model, whereas the collaborative learning dimension is centered on the evaluation of participants' involvement as well as on collaboration assessment. Our approach, based on advanced Natural Language Processing techniques, provides a qualitative estimation of the learning process and enhances understanding as a mediator of learning by providing automated feedback to both learners and teachers or tutors. The main benefits are its flexibility, extensibility, and nevertheless specificity for covering multiple stages starting from reading classroom materials to discussing on specific topics in a collaborative manner and finishing the feedback loop by verbalizing metacognitive thoughts.
