## **Computer Networks Answer Guide Tanenbaum:**

**Computer Networks** Dr. M. Manimaran, 2021-10-02 A computer network is a set of two or more computers with an interconnection which allows communication between the linked computers. Computer networks are essential in facilitating communication within organizations as well as the entire globe by means of the Internet. Networks may vary considerably according to size, functionality, and topology. In addition, they differ in terms of standards and network models that people use in designing and implementing networks. This book will briefly examine networks and how they help individuals and organizations. According to size, a network may be a Local Area Network (LAN), Metropolitan Area Network (MAN), or Wide Area Network (WAN). LANs cover small geographical locations, for instance, a campus building. MANs cover a metropolitan area such as a town or a city. A WAN covers an extremely large area, like a country, region, or the entire planet. According to topology, a network may be a bus, star, ring, star bus, or a token ring network, among others.

*Network and Parallel Computing* Jian Cao, Minglu Li, Min-You Wu, Jinjun Chen, 2008-10-11 Welcome to the proceedings of the 2008 IFIP International Conference on Network and Parallel Computing (NPC 2008) held in Shanghai, China. NPC has been a premier conference that has brought together researchers and practitioners from academia, industry, and governments around the world to advance the theories and technologies of network and parallel computing. The goal of NPC is to establish an international forum for researchers and practitioners to present their cellent ideas and experiences in all system fields of network and parallel computing. The main focus of NPC 2008 was on the most critical areas of network and parallel computing: network technologies, network applications, network and parallel architectures, and parallel and distributed software. In total, the conference received more than 140 papers from researchers and practitioners. Each paper was reviewed by at least two internationally renowned referees and selected based on its originality, significance, correctness, relevance, and clarity of presentation. Among the high quality submissions, only 32 regular papers were accepted by the conference. All of the selected conference papers are included in the conference proceedings. After the conference, some high quality papers will be recommended to be published in the special issue of international journals. We were delighted to host three well known international scholars offering keynote speeches: Sajal K. Das from University of Texas at Arlington, USA; Matt Mutka from Michigan State University; and David Hung Chang Du from University of Minnesota.
