The Fusion of Accounting and Accountability Valentina Minutiello, 2025-01-29 In recent decades a growing awareness of companies' important role within society emerged. Companies are considered accountable for their actions and their commitment to sustainability has become essential. Sustainability is a critical success factor and a source of competitive advantage that guarantees survival over time. The process of change necessarily passes through corporate disclosure; consequently, many businesses have begun to incorporate environmental and social issues in their reports to demonstrate their commitment. This trend highlights the need to systematize the main non-financial reporting tools available to companies. In light of these premises, this book investigates the topic of non-financial disclosure by analyzing and comparing the main reporting tools used. It also discusses three case studies as practical examples of the implementation of Sustainability or Integrated Reporting. The different case studies represent a useful tool for comparing the different types of non-financial reports and provide a guide for companies in the process of implementing and drafting a non-financial report. *CFA Program Curriculum 2017 Level II, Volumes 1 - 6* CFA Institute, 2016-08-01 Master the practical aspects of the CFA Program Curriculum with expert instruction for the 2017 exam. The same official curricula that CFA Program candidates receive with program registration is now publicly available for purchase. *CFA Program Curriculum 2017 Level II Volumes 1-6* provides the complete Level II Curriculum for the 2017 exam with practical instruction on the Candidate Body of Knowledge (CBOK) and how it is applied, including expert guidance on incorporating concepts into practice. Level II focuses on complex analysis with an emphasis on asset valuation and is designed to help you use investment concepts appropriately in situations analysts commonly face. Coverage includes ethical and professional standards, quantitative analysis, economics, financial reporting and analysis, corporate finance, equities, fixed income, derivatives, alternative investments, and portfolio management, organized into individual study sessions with clearly defined Learning Outcome Statements. Charts, graphs, figures, diagrams, and financial statements illustrate complex concepts to facilitate retention, and practice questions with answers allow you to gauge your understanding while reinforcing important concepts. While Level I introduced you to basic foundational investment skills, Level II requires more complex techniques and a strong grasp of valuation methods. This set dives deep into practical application, explaining complex topics to help you understand and retain critical concepts and processes. Incorporate analysis skills into case evaluations. Master complex calculations and quantitative techniques. Understand the international standards used for valuation and analysis. Gauge your skills and understanding against each Learning Outcome Statement. CFA Institute promotes the highest standards of ethics education and professional excellence among investment professionals. The CFA Program Curriculum guides you through the breadth of knowledge required to uphold these standards. The three levels of the program build on each other. Level I provides foundational knowledge and teaches the use of investment tools. Level II focuses on application of concepts and analysis, particularly in the valuation of assets, and Level III builds toward synthesis across topics with an emphasis on portfolio management. *Financial and Management Accounting* Pauline Weetman, 2019
