Association of Physics Teachers, 1986 Research on Physics Education E.F. Redish, M. Vicentini, 2004-08-09 Physics Education research is a young field with a strong tradition in many countries However it has only recently received full recognition of its specificity and relevance for the growth and improvement of the culture of Physics in contemporary Society for different levels and populations This may be due on one side to the fact that teaching therefore education is part of the job of university researchers and it has often been implicitly assumed that the competences required for good research activity also guarantee good teaching practice On the other side and perhaps more important is the fact that the problems to be afforded in doing research in education are complex problems that require a knowledge base not restricted to the

disciplinary physics knowledge but enlarged to include cognitive science communication science history and philosophy The topics discussed here look at some of the facets of the problem by considering the interplay of the development of cognitive models for learning Physics with some reflections on the Physics contents for contemporary and future society with the analysis of teaching strategies and the role of experiments the issue of assessment and cultural aspects Information is also given on the organizations involved in connecting various aspects of Physics Education the International Commission on Physics Education the European Physical Society and the European Physics Education Network Resources in Education Physics for Scientists and Engineers with Modern Physics Raymond A. Science and Representative Democracy Mauro Dorato, 2023-03-23 Mauro Dorato charts pressing debates within the philosophy of science that centre around scientific expertise access to knowledge consensus debate and decision making This English language translation of Disinformazione Scientifica e Democrazia argues that the advancement of science depends on an exponential process of specialization accompanied by the creation of technical languages that are less and less accessible to the general public Dorato reveals how such a process must align with representative forms of democracies in which knowledge and decision making ought to aim at the society s general interest Given the importance of the principle of competence however the role of experts as mediators of knowledge threatens the citizens autonomy of choice Consequently the risk of technocratic regimes calls for new ways to increase literacy about science and its philosophical and probabilistic foundations Stressing the conceptual conflict between pluralism and conformism Science and Representative Democracyreveals the obstacles to the functioning of both science and democracy

patterns of the indicators and indices AgroExplore was used in focus group settings with experts in the Swedish agricultural sector The visualization supported dialogue results confirm the difficulty of selecting and constructing indicators including different perceptions of what indicators actually indicate the assumption of linear relationships between the indicators and vulnerability and consequently that the direction of the relationship is predefined for each indicator This thesis further points at the inherent complexity of agricultural challenges and opportunities in the context of climate change as such It is specifically emphasized that agricultural adaptation policies and measures involve trade offs between various environmental and socio economic objectives and that their implementation could furthermore entail unintended consequences i e potential maladaptive outcomes Nevertheless it proved difficult to validate indicators due to e.g. matters of scale and data availability While heavy precipitation and other extreme weather events are perceived as the most relevant drivers of climate vulnerability by the agricultural experts participating in this study statistical analyses of historical data identified few significant relationships between crop yield losses and heavy precipitation In conclusion this thesis contributes to the method development of composite indices and indicator based vulnerability assessment A key conclusion is that assessments are method dependent and that indicator selection is related to aspects such as the system's spatial scale and location as well as to indicator thresholds and defined relationships with vulnerability recognizing the contextual dependency of agricultural vulnerability Consequently given the practicality of indicator based methods I stress with this thesis that future vulnerability studies must take into account and be transparent about the principles and limitations of indicator based assessment methods in order to ensure their usefulness validity and relevance for guiding adaptation strategies F r jordbrukssektorn och global h llbar utveckling i stort r mats kerhet och mitigering av klimatf r ndringar viktiga angel genheter Samtidigt r jordbruksproduktionen ofta direkt beroende av klimatf rh llanden vilket gr klimatanpassningsstrategier mycket centrala fr sektorn Forskare planerare och akt rer beh ver f rst hur varf r och i vilken omfattning jordbruket r s rbart inf r klimatf r ndringar S dana analyser inbegriper ven de utmaningar som skapas genom jordbrukets komplexa socio ekologiska karakt r och de m nga utg ngspunkter och tillv gag ngss tt som anv nds fratt bed mas rbarhet Syftet med denna avhandling ratt identifiera hur s rbarhetsbed mningar kan representera klimatrelaterad s rbarhet i nordiskt jordbruk och i och med detta har avhandlingen som avsikt att utveckla metodologin frindikatorbaserade och geografiska visualiseringsmetoder Fljande forskningsfr gor avhandlas i Hur kan det nordiska jordbrukets s rbarhet inf r klimatvariation och f r ndringar karakt riseras ii Hur p verkar urval definitioner och betoningar av indikatorer bed mningar av s rbarhet ili Hur varierar uppskattningar med bed mningsmetod iv Hur kan geografisk visualisering anv ndas i integrerade s barhetsbed mningar F r att svara p dessa fr gor analyseras och till mpas olika tillv gag ngss tt att bed ma s rbarhet inom nordiskt jordbruk Avhandlingen visar att olika metoder frs rbarhetskompositindex resulterar i signifikanta skillnader mellan index trots att samma indikatorer och data anv nds Ett konceptuellt ramverk frs rberhetsbed mningar dr geografisk visualisering anv nds har utvecklats fratt mjligg
