Stati Generali del Patrimonio Industriale. 2022
AA.VV., 2022-06-09T00:00:00+02:00 L'Associazione Italiana per il Patrimonio Archeologico Industriale AIPAI in occasione dei suoi 25 anni ha promosso i Secondi Stati Generali del Patrimonio Industriale Per tracciare un bilancio ed elaborare strategie e visioni ha posto le condizioni per l'incontro tra gli addetti ai lavori e il confronto tra i molteplici ambiti operativi di ricerca e istituzionali coinvolti Ci si riuniti a Roma e a Tivoli con la consapevolezza che il primo lascito dell'et industriale siamo noi la nostra societ con i suoi pregi e le sue contraddizioni le incredibili conquiste degli ultimi secoli La risposta stata ampia e tra i numerosi contributi presentati in questo volume si possono scorgere studi e appelli buone pratiche di conservazione e

progetti di riuso percorsi culturali e azioni di valorizzazione del patrimonio intangibile. Il tutto fa ben constatare che pur con impianti metodologici fortemente caratterizzati sono sempre di più le discipline che convergono sull'oggetto e sui contesti della produzione e gradualmente assimilano i principi consolidati dell'archeologia industriale. Le voci di una comunità segnata dai due anni di pandemia mostrano più incisivamente il divario tra il permanere di emergenze culturali e ambientali da un lato e un'augmentata tensione al riconoscimento e al ripensamento dell'eredità industriale dall'altro. Quest'ultima si conferma sia nella centralità che le memorie e la cultura industriale hanno assunto nelle strategie di ripresa dei programmi nazionali ed europei sia nelle potenzialità di riscatto sociale economico e ambientale che emergono da una declinazione aggiornata dei progetti di recupero e rigenerazione. The Italian Association for Industrial Archaeological Heritage AIPAI on its 25th anniversary promoted the Second States General of Industrial Heritage. In order to draw a balance sheet and elaborate strategies and visions for the near future it set the conditions for the meeting of insiders and the confrontation between the many operational research and institutional spheres involved. We gathered in Rome and Tivoli with the awareness that the first legacy of the industrial age is us, our society with its merits and contradictions, the incredible achievements of the last centuries. The response was wide ranging and among the contributions presented in large numbers one can discern in depth studies and denunciations, good conservation practices and reuse projects, cultural paths and actions to enhance intangible heritage. All of which makes a good case for the fact that more and more disciplines even with strongly characterized methodological frameworks are converging on the object and contexts of production and are gradually assimilating the established principles of industrial archaeology. The voices of a community marked by the two year pandemic show more incisively the gap between the persistence of cultural and environmental emergencies on the one hand and an increased tension to recognize and rethink industrial heritage on the other. The latter is confirmed both in the centrality that industrial memories and culture have assumed in the recovery strategies of national and European programs and in the potential for social economic and environmental redemption that emerges from an updated declination of recovery and regeneration projects.

7. Kolloquium Erhaltung von Bauwerken Technische Akademie Esslingen e.V., 2021-07-26 Die Erhaltung von Bauwerken hat bereits in vielen Bereichen eine größere Bedeutung als der Neubau. Die Individualität der Bauwerke hinsichtlich Tragkonstruktion, Bausubstanz, Bauablauf, bauliches Umfeld und Einwirkungen über die Bauteillebensdauer erlaubt hierbei keine Standardisierung, sondern erfordert meist objektindividuelle Lösungen. Zudem sind die Aufgaben beim Bauen im Bestand vielfältig. Sie beinhalten die Bauwerksdiagnose, die Instandsetzungsplanung unter Berücksichtigung aktueller Regelwerke und Rechtsprechung, die Produktauswahl, die Ausführung und Qualitätssicherung sowie Aspekte des Bauwerksmanagements. Dies alles erfordert eine enge und frühzeitige Abstimmung zwischen Bauherren, Architekten, Fachplanern, Behörden und Bauunternehmen. Ziel der Fachtagung zum Bauen im Bestand ist der Austausch aktueller Erkenntnisse auf dem Gebiet der Erhaltung von Bauwerken. Dabei sollen sowohl die Erfahrungen bei der Planung und Umsetzung von Instandsetzungsmaßnahmen

Environmental Design fib Fédération internationale du béton, 2004-01-01 The construction industry including the concrete industry faces the transformation process from the traditional building process to the new approach sustainable construction Environmental aspects represent a key role in this process The principal importance of the environmental impact evaluation of concrete structures follows from the high amount of concrete structures built around the world every year The specific amount of harmful impacts embodied in concrete unit is in comparison with other building materials relatively small However due to the high production of concrete the final negative environmental impact of concrete structures is significant Any improvement of concrete design principles methodologies of assessment construction and demolition technologies and management of operation and use of concrete structures thus provides a very significant contribution to the general goal the achievement of a development process in the sustainable way The objective of this state of art report is provide the framework of so called environmental design to document Best Available Technology BAT for concrete structures from an environmental point of view and to summarize methodologies for environmental impact evaluation and optimization of concrete structures Although the authors of the report were from Europe and Japan it was attempted to collect information as widely as possible **Guide for Protection and Repair of Concrete Structures** FIB – International Federation for Structural Concrete, 2022-03-01 The idea of preparing a technical document for the repairs and interventions upon concrete structures goes back to the former fib COM5 Structural Service Life Aspects being the goal of the then TG5 9 After a long period of reduced activity and taking into account the reorganization of fib commissions that

meanwhile took place on June 2017 a different approach was proposed to push forward the task of TG8 1 formerly TG5 9 The new goal of TG 8 1 was to deliver a how to do guide gathering together protection repair and strengthening techniques for concrete structures Chapters are intended to provide both guidelines and case studies serving as support to the application of fib MC2020 pre normative specifications Each chapter was written by an editorial team comprising desirably at least a researcher a designer and a contractor Templates have been prepared in order to harmonize the contents and the presentation of the different methods Following the writing process chapters were reviewed by experts and after amendments by the authors they underwent a second review process by COM8 and TG3 4 members as well as by different practitioners For each protection repair and strengthening method addressed in this guide readers have a description of when to adopt it which materials and systems are required which techniques are available and what kind of equipment is needed It then presents a summary of stakeholders roles and qualifications design guidelines referring to most relevant codes and references the intervention procedure quality control measures and monitoring and maintenance activities Due to the extent of the guide it was decided to publish it as bulletin 102 addressing protection and repair methods and bulletin 103 addressing strengthening methods We would like to thank the authors reviewers and members of COM8 and TG3 4 for their work in developing this fib Bulletin which we hope will be useful for professionals working in the field of existing concrete structures especially those concerned with life cycle management and conservation activities As noted above this Bulletin is also intended to act as a background and supporting document to the next edition of the fib Model Code for Concrete Structures which is currently under development under the auspices of TG10 1 with the working title of fib Model Code 2020
