the context of this region's rapid urban development in the last forty years bringing together authors from urbanism architecture planning sociology anthropology and politics to examine innovative ways of framing and conceptualizing public space in of the Greater Bay Area The blend of authors first hand practical experiences has created a unique cross disciplinary book that employs public space to frame issues of planning political control social inclusion participation learning education and appropriation in the production of everyday urbanism In the context of the Greater Bay Area such spaces and practices also present opportunities for reconfiguring design driven urban practice beyond traditional interventions manifested by the design of physical objects and public amenities to the design of new social protocols processes infrastructures and capabilities This is a captivating new dimension of urbanism and critical urban practice and will be of interest to academics students and practitioners interested in urbanization in China     Public Space Unbound Sabine Knierbein,Tihomir

Viderman,2018-03-15 Through an exploration of emancipation in recent processes of capitalist urbanization this book argues the political is enacted through the everyday practices of publics producing space This suggests democracy is a spatial practice rather than an abstract professional field organized by institutions politicians and movements Public Space Unbound brings together a cross disciplinary group of scholars to examine spaces conditions and circumstances in which emancipatory practices impact the everyday life of citizens We ask How do emancipatory practices relate with public space under post political conditions In a time when democracy solidarity and utopias are in crisis we argue that productive emancipatory claims already exist in the lived space of everyday life rather than in the expectation of urban revolution and future progress

Recent global appropriations of public spaces through urban activism public uprising and political protest have brought back democratic values beliefs and practices that have been historically associated with cities Given the aggressive commodification of public resources public space is critically important due to its capacity to enable forms of public discourse and social practice which are fundamental for the well being of democratic societies Public Space Reader brings together public space scholarship by a cross disciplinary group of academics and specialists whose essays consider fundamental questions What is public space and how does it manifest larger cultural social and political processes How are public spaces designed socially and materially produced and managed How does this impact the nature and character of public experience What roles does it play in the struggles for the just city and the Right to The City What critical participatory approaches can be employed to create inclusive public spaces that respond to the diverse needs desires and aspirations of individuals and communities alike What are the critical global and comparative perspectives on public space that can enable further scholarly and professional work And what are the futures of public space in the face of global pandemics such as COVID 19 The readers of this volume will be rewarded with an impressive array of perspectives that are bound to expand critical understanding of public space      **The Routledge Companion to Design Research** Paul A.

opportunities this entanglement may provide for social justice This entanglement is investigated in the different contributions through theoretical and empirical analyses of heritage led resistance to neoliberal economic development violation of the subaltern authorised narratives and state invented traditions colonialism and settler colonialism and even dominating discourses of social movement to name just a few Crossing the disciplinary boundaries of heritage and resistance studies these analyses bring new insights into several timely debates especially those concerned with the interrelated critical questions of displacement gentrification exclusion marginalization urbicide spatial cleansing dehumanization alienation ethnic cleansing and social injustice Following our purposeful and future driven approach we wish to bring new energy to the field of heritage studies through the focus on the potential of heritage and resistance for hopeful change rather than adding to the field yet another overwhelming engagement with conflict and war

**The Ethics of a Potential Urbanism** Camillo Boano, 2016-11-25 The Ethics of a Potential Urbanism explores the possible and potential relevance of Giorgio Agamben's political thoughts and writings for the theory and the practice of architecture and urban design It sketches out the potentiality of Agamben's politics which can affect change in current architectural and design discourses The book investigates the possibility of an inoperative architecture as an ethical shift for a different practice just a little bit different but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come This particular reading from Agamben's oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness cultural irrelevance economic reductionism and proto avant garde extravagance contributing to a renewed critical encounter with architecture's aesthetic political function

**Informality through Sustainability** Antonino Di Raimo, Steffen Lehmann, Alessandro Melis, 2020-12-30 Informality through Sustainability explores the phenomenon of informality within urban settlements and aims to unravel the subtle links between informal settlements and sustainability Penetrating its global profile and considering urban informality through an understanding of local implications the authors collectively reveal specific correlations between sites and their local inhabitants The book opposes simplistic calls to legalise informal settlements or to view them as problems to be solved It comes at a time when common notions of informality are being increasingly challenged In 25 chapters the book presents contributions from well known scholars and practitioners whose theoretical or practical work addresses informality and sustainability at various levels from city planning and urban design to public space and architectural education Whilst previous studies on informal settlements have mainly focused on cases in developing countries approaching the topic through social cultural and material dimensions the book explores the concept across a range of contexts including former Communist countries and those in the so called Global North Contributions also explore understandings of informality at various scalar levels region precinct neighbourhood and individual building Thus this work helps reposition informality as a relational concept at various scales of urbanisation This book will be of great benefit to planners architects researchers and

policymakers interested in the interplay between informality and sustainability      **Walkscapes** Francesco Careri, 2017-12-25 Walkscapes deals with strolling as an architecture of landscape Walking as an autonomous form of art a primary act in the symbolic transformation of the territory an aesthetic instrument of knowledge and a physical transformation of the negotiated space which is converted into an urban intervention From primitive nomadism to Dada and Surrealism from the Lettrist to the Situationist International and from Minimalism to Land Art this book narrates the perception of landscape through a history of the traversed city      **Fare urbanistica oggi** Laura Montedoro, Michelangelo Russo, 2022-12-22T00:00:00+01:00 Il volume restituisce un confronto sull'urbanistica in Italia oggi e sull'idea del progetto che cambia sensibile ai temi che attraversano la condizione contemporanea con specifico riferimento alle culture alle pratiche all'insegnamento e alla ricerca Si tratta di una prima ricognizione sui molti modi di declinare la disciplina Dai ventuno saggi qui raccolti emerge un'idea ampia e multidimensionale di progetto come attitudine a prefigurare visioni di futuro come sguardo esplorativo e interpretativo che produce conoscenza come sistema di azioni tecnicamente pertinenti come campo di interazione sociale e di conflitto come capacità di elaborazione di strumenti multiscalari e integrati di pianificazione del territorio e della città Un'idea costantemente riferita allo spazio fisico e sociale della città alle esplorazioni possibili del campo del visibile alle sensibilità per la morfologia urbana e territoriale per i paesaggi per i territori palinsesto Un'idea di progetto dunque in grado di recuperare una tradizione culturale italiana ricca di senso per mettere sistematicamente in tensione spazio e società con specifica attenzione ai contesti culturali e materiali intesi come riflesso della società delle economie e delle istituzioni Il governo del territorio e delle città ha crescente necessità di sperimentare forme di progetto più flessibili duttili contestuali e adattive per far fronte a questioni sociali emergenti come il calo demografico e l'andamento recessivo dell'economia la crisi di welfare nelle grandi aree urbane l'incipiente condizione di periurbanizzazione della campagna l'emergenza dei temi ambientali e della transizione ecologica ma anche per presidiare in modo nuovo temi consolidati come le grandi trasformazioni urbane e l'elaborazione di nuove forme di masterplan fortemente condizionati dalla finanziarizzazione del settore immobiliare questioni rilevanti da cui l'urbanistica sospinta e sfidata a revisionare paradigmi e a formulare prospettive metodologiche innovative      *Caminhar parar hospedar-se* Francesco Careri, 2025-04-07 Este livro reúne relatos autobiográficos de momentos e situações que levaram o autor a refletir sobre as relações entre o nomadismo a arquitetura e a hospitalidade também uma proposta para a refundação da hospitalidade das nossas cidades para construir sobre as ruínas do contemporâneo lugares concretos destinados a pessoas reais lugares de passeio e de encontro para pessoas diversas lugares de recreio e conta o de histórias de intercâmbio entre anfitriões e hóspedes como nas hospedarias e pousadas de caravanas de outras épocas Entre as epifanias que abrem caminhos para as reflexões de Careri há o cigano Melquades nica conexão de Macondo com o mundo exterior em Cem anos de solidão o pacto de solidariedade entre troianos e gregos a percepção do autor entre menires em um descampado na Sardenha de que os primeiros caminhos não foram feitos pelos humanos mas
