Managing Managed Care Michael C. Roberts,Linda K. Hurley,2012-11-19 The introduction of the concept of managed care into mental and physical health care appears to be a juggernaut of unparalleled impact The two extremes of thought about this impact are 1 that managed care is a villainous foe to be resisted in order to bring back the earlier halcyon years of independence in practice decisions with greater reimbursement for psychologists services or 2 that managed care is a laudatory attempt to restrain health care costs that are out of control and spiraling upward by rooting out mismanagement and reversing financial incentives to provide unnecessary care The former view calls managed health care such names as mangled care and distributes bumper stickers stating Just Say No to HMOs The latter view points to the slowdown of increases in health care expenditures and the enhancement of health care affordability and appropriateness for greater numbers of persons resulting from managed care cost containment strategies and service review procedures Mental or behavioral health care has been as strongly impacted as medical care under managed care Where managed care has forced practitioners attention to validated procedures and to examining previous wasteful practices we applaud the movement Where managed care has had adverse impact we think there needs to be greater public legal and regulatory attention to its excesses and abuses

*Mismeasuring Impact* Nicole Marwell,Jennifer Mosley,2025-07-15 The hidden dangers of randomized controlled trials The need to demonstrate the effectiveness of nonprofit social programs has led to a rapid rise in the use of randomized controlled trials RCTs for evaluation As a result most nonprofit sector professionals can tell you why nonprofits should do an RCT This book tells you why they probably shouldn't and what to do instead *Mismeasuring Impact* explores why RCTs are being embraced as the gold standard for nonprofit evaluation despite the high cost and time investment required and the serious problems with using RCTs in a nonprofit context Most RCTs conducted in nonprofits fail to meet required standards for rigor undercutting their accuracy The book describes what happens inside nonprofits when they take part in RCTs the unintended equity issues that arise and why nonprofits feel pressured participate in RCTs despite the problems University of Chicago professors Marwell and Mosley's research is based on extensive interviews with key players nonprofit managers professional program evaluators and program officers in philanthropic foundations The book argues that ultimately RCTs are used to poorly ground nonprofit legitimacy not to foster nonprofit improvement RCTs also privilege program and organizational standardization over the key strengths of nonprofit organizations flexible innovation and responsiveness to community needs Nonprofits and funders need forms of evaluation that lift up these strengths *Mismeasuring Impact* offers alternative approaches that build strong organizations not just cookie cutter programs and which funders and nonprofits of all sizes can support
