**European Foreign and Security Policy** Catherine Gegout, 2010-05-08 The European Union's EU Common Foreign and Security Policy CFSP stipulates that all member states must unanimously ratify policy proposals through their representatives on the EU Council Intergovernmentalism or the need for equal agreement from all member nations is used by many political scientists and policy analysts to study how the EU achieves its CFSP However in *European Foreign and Security Policy* Catherine Gegout modifies this theory arguing instead for analyses based on what she terms constrained intergovernmentalism Gegout's theory of constrained intergovernmentalism allows for member states in particular France Germany and the United Kingdom to bargain with one another and to make rational decisions but also takes into account the constraints imposed by the United States the European Commission and the precedents set by past decisions Three in depth case studies of CFSP decision making support her argument as she examines the EU position on China's human rights record EU sanctions against Serbia and EU relations with NATO

**The European Union in the Security of Europe** Steve Marsh, Wyn Rees, 2012-03-12 This book examines the European Union's contribution to providing security in Europe amidst an increasingly complex and challenging environment In this new and comprehensive guide to the EU's role in security since the end of the Cold War the authors offer an explanation of EU internal and external security regimes and argue that the Union has become an important exporter of security within its region However the Union's rhetorical ambitions and commitments continue to outstrip its capabilities and it lacks both a common conceptualisation of security and a meaningful shared strategic culture Drawing extensively on primary sources the book examines the Union's relations with the US and Russia in a time of shifting geostrategic calculations and priorities With the EU capacity for enlargement slowing this text

**Diplomacy and Security Community-Building** Niklas Bremberg,2015-09-16 This book contributes to the ongoing debate in IR on the role of security communities and formulates a new mechanism based analytical framework It argues that the question we need to ask is how security communities work at a time when armed conflicts among states have become significantly less frequent compared to other non military threats and trans boundary risks e g terrorism and the adverse effects of climate change Drawing upon recent advances in practice theory the book suggests that the emergence and spread of cooperative security practices ranging from multilateral diplomacy to crisis management are as important for understanding how security communities work as more traditional confidence building measures Using the EU Spain and Morocco as an in depth case study this volume reveals that through the institutionalization of multilateral venues the EU has provided cooperative frameworks that otherwise would not have been available and that the de territorialized notion of security threats has created a new rationale for practical cooperation between Spanish and Moroccan diplomats armed forces and civilian authorities Within the broader context this book provides a mechanism based framework for studying regional organizations as security community building institutions and
