Drone Object Lessons:

Drone Adam Rothstein, 2015-02-03 Drones are in the newspaper on the TV screen swarming through the networks and soon we're told they'll be delivering our shopping But what are drones The word encompasses everything from toys to weapons And yet as broadly defined as they are the word drone fills many of us with a sense of technological dread Adam Rothstein cuts through the mystery the unknown and the political posturing and talks about what drones really are what technologies are out there and what's coming next how drones are talked about and how they are represented in popular culture It turns out that drones are not as scary as they appear but they are more complicated than you might expect Drones reveal the strange relationships that humans are forming with their new technologies Publisher **The teacher's manual of object lessons for rural schools** Vincent Thomas Murché, 1901 **The Handy Book of Object Lessons. book introduces readers to the latest findings on disaster robotics. It is based on the ImPACT Tough Robotics Challenge, a national project spearheaded by the Japan Cabinet Office that focuses on developing robotics technologies to aid in disaster response, recovery, and preparedness. It presents six subprojects that involve robot platforms and several component technologies used in conjunction with robots: cyber rescue canines (which are digitally empowered rescue dogs), serpent-like robots for searching debris, serpent-like robots for plant infrastructure inspection, UAVs for gathering information on large areas struck by disaster, legged robots for plant infrastructure inspection in risky places, and construction robots for recovery tasks that require both power and precision. The book offers a valuable source of information for researchers, engineers, and practitioners in safety, security, and rescue robotics; disaster robotics; and plant and infrastructure maintenance. It will also appeal to a wider demographic, including students and academics, as it highlights application scenarios and the total concept for each robot in various scientific and technical contexts. In addition to a wealth of figures and photos that explain these robots and systems, as well as experimental data, the book includes a comprehensive list of published papers from this project for readers to refer to. Lastly, an external website offers video footage and updated information from the International Rescue System Institute.

Artificial Intelligence and the City Federico Cugurullo, Federico Caprotti, Matthew Cook, Andrew Karvonen, Pauline McGuirk, Simon Marvin, 2023-12-01. This book explores in theory and practice how artificial intelligence (AI) intersects with and alters the city. Drawing upon a range of urban disciplines and case studies, the chapters reveal the multitude of repercussions that AI is having on urban society: urban infrastructure, urban governance, urban planning, and urban sustainability. Contributors also examine how the city, far from being a passive recipient of new technologies, is influencing and reframing AI through subtle processes of co-constitution. The book advances three main contributions and arguments. First, it provides empirical evidence of the emergence of a post-smart trajectory for cities in which new material and decision-making capabilities are being assembled through multiple AIs. Second, it stresses the importance of understanding the mutually constitutive relations between the new experiences enabled by AI technology and the urban context. Third, it engages with the concepts required to clarify the opaque relations that exist between AI and the city, as well as how to make sense of these relations from a theoretical perspective. *Artificial Intelligence and the City* offers a state-of-the-art analysis and review of AI urbanism from its roots to its global emergence. It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies, urban planning, geography, architecture, urban design, science, and technology studies, sociology, and politics.
