Background Knowledge

Filter Designer is a powerful GUI in MATLAB for designing and analyzing filters. Filter Designer enables users to quickly design digital FIR or IIR filters by setting filter performance specifications, importing filters from MATLAB workspace or by adding, moving, or deleting poles and zeros. It also provides tools for analyzing filters, such as magnitude and phase response plots and pole-zero plots.

FDN Test

Filters can be designed in MATLAB by using FDA tool and to open the design GUI type `fdatool` in command window. A Tip of the Day dialog displays with suggestions for using FDA Tool. Then, the GUI displays with a default filter.

Alternatively, `fir` command is also used to design FIR filters of specific order and cut-off frequency.
