Service Learning as Pedagogy in Early Childhood Education Kelly L. Heider, 2016-10-14 This book presents the most recent theory research and practice on service learning as it relates to early childhood education. It describes several service learning programs many of which were developed to better prepare pre service teachers for the challenges they face in today's early childhood classrooms including class size ever changing technology diversity high stakes testing parental involvement or the lack thereof and shrinking budgets. The book shares stories of positive outcomes from pre service teachers who having participated in service learning programs report a shift in their attitudes and beliefs including an increased empathy for others a heightened sensitivity to student differences more democratic values and a greater commitment to teaching. In addition the book examines the effects of service learning and positive outcomes for children and teacher educators as well. Schools today face an increasing number of language learners the mainstreaming of special population students and working with a standards driven curriculum. All of these present new challenges for teachers as they attempt to meet their students educational needs. As a result of this new classroom environment and the educational needs they present teacher educators must now seek different approaches to prepare prospective teachers to meet these needs because the traditional approaches to teacher preparation such as coursework independent of fieldwork are no longer effective in equipping teachers to address these issues. This book examines in detail the new approach of service learning. Leadership in Early Childhood Education Joce Nuttall, Linda Henderson, Elizabeth Wood, Jenny Martin, 2024-06-12 The book presents a conceptual framework for understanding leadership for effective educator learning in early childhood settings. The book describes how leaders can move centre practices from crisis to stabilization. It argues that a core component of leaders work in early childhood settings is to construct and enact epistemological accounts of practice change. The book includes case examples that bring to life the contexts early childhood services and services leaders who participated in the research. The book also describes the application of cultural historical activity theory to the development of practice in early childhood education. It describes how background theory literature and data can be synthesized to create new focal theory in education. Readers will benefit from the theory that is presented establishing a sound basis for testing in future research in schools as well as in early childhood education. Joce Nuttall and team are congratulated for their ground breaking scholarly endeavour in designing implementing validating findings and then writing a book that unambiguously connects theory policy practice in enacting leadership in early childhood settings. This book is ambitious eloquent and inspirational. The research was driven by a bold vision to build a new theorisation of early childhood leadership. The writing style of the book makes the complex clear and easy to digest and thereby strengthening its readability and understanding. The comparative lens adopted in the study underscores the neoliberal control of the working lives of early childhood leaders in both Australia and England. The use of case study narratives to explain various aspects including the study design and methodology was refreshingly engaging.

Notes of encouragement addressed to novice researchers such as those embarking on higher degree studies also provide apt guidance about the messiness of conducting qualitative research The book is infused with lots of examples demonstrating the transformative power of learning especially when expertly scaffolded by the research team and thereby increasing practitioner agency and quality improvement across the early childhood setting If professional autonomy is the driver of reform and change then we must find ways to nurture strong educational leaders who can think outside the box Overall Nuttall and team succeed in arousing learning rich possibilities for reimagining early childhood leadership in theory and in practice and thereby making a magnificent contribution to the scholarship of educational leadership Professor Manjula Waniganayake PhD Macquarie University Sydney Australia *Starting Strong III A Quality Toolbox for Early Childhood Education and Care* OECD,2011-12-16 This publication focuses on quality issues in early childhood education and care it aims to define quality and outlines five policy levers that can enhance it **Early Childhood Curriculum** Claire McLachlan,Marilyn Fleer,Susan Edwards,2013-01-02 The second edition of Early Childhood Curriculum provides a comprehensive and lively introduction to curriculum theories approaches and issues in early childhood settings Drawing on contemporary research and case studies the book employs a cultural historical framework to illustrate a variety of approaches to early childhood education In this new edition there is an up to date coverage of national curriculum documents including the Early Years Framework and Te Whariki a glossary of key terms and learning intentions at the beginning of each chapter There is also an updated companion website at www.cambridge.edu.au/academic/earlychildhood In each chapter hypothetical transcripts and real world examples help bring theory to life The book explores specific domain areas including science and mathematics literacy and language information and communication technology the arts and health and well being Early Childhood Curriculum equips pre service teachers with the practical skills and tools to promote young children s learning It is an essential resource for pre service teachers and practitioners alike English as an Additional Language in the Early Years Malini Mistry,Krishan Sood,2015-05-08 With the English as Additional Language EAL population growing rapidly it is essential that settings and schools meet individual learner needs and provide an inclusive culture where different languages cultures and religions are accepted and celebrated Packed with essential information on key theories and best practice and written in a highly readable style this book aims to raise awareness of main issues and offer practical support for practitioners working with children with EAL Covering a wide range of topic such as new arrivals working with parents assessment planning resourcing play communication and language each chapter clearly lays out the key concepts ideas and strategies alongside examples of good practice Encouraging a reflective approach the book features Checklists diagrams chapter objectives and summaries and suggestions for further reading Case studies to illustrate practice Reflective activities to develop critical thinking Challenging many assumptions and stereotypes about EAL learners this invaluable text will support students and practitioners in meeting the individual needs of all the children in their care **Physical**
