Richard Uviller, 1998-12-01 Although evenly matched adversaries make for a more exciting athletic contest and a level playing field is essential to a fair game is the same true in a criminal trial In this compelling new book H Richard Uviller argues that a criminal trial is not analogous to a sporting event Prosecutors and defense attorneys are in critical respects different from each other and the allocation of advantages to each must be uneven in order to be fair In a lively exploration of the powers of the prosecutor and the prerogatives of the defense Uviller asks where our criminal justice system is fair though unequal and where its inequalities may subvert fair results On the one hand he points out the prosecutor has unmatched and virtually unreviewable discretion to choose the target of a prosecution the charge and to a large extent the timing of an indictment The prosecution also is first on the scene to develop evidence and is entitled to compel the production of evidence from reluctant custodians The lawyer for the defendant on the other hand enjoys virtually unrestricted license to argue contrary to his or her own sincere belief as well as broad powers to discover evidence from the prosecutor's file Are these unequal advantages necessary Are they fair Uviller concludes that although the overall criminal justice system reflects a fair distribution of advantages and disadvantages in certain areas the imbalance is so severe as to undermine justice He offers realistic carefully considered recommendations for reform in these problem areas **AI for Life** Celia Quillian, 2025-01-28 AI is everywhere these days but how can you actually use it to improve your life From having ChatGPT plan your next vacation or customize a cover letter to letting Microsoft Copilot design your next event invitation AI for Life is packed with over 100 easy innovative and fun ways to use generative AI in your daily life [Question Answering over Text and Knowledge Base](#) Saeedeh Momtazi, Zahra Abbasiantaeb, 2022-11-04 This book provides a coherent and complete overview of various Question Answering QA systems It covers three main categories based on the source of the data that can be unstructured text TextQA structured knowledge graphs KBQA and the combination of both Developing a QA system usually
