**Stephen Wilson**

## **Coverbs And Complex Predicates In Wagiman:**

**Coverbs and Complex Predicates in Wagiman** Stephen Wilson, 1999-06-28 Wagiman is an Australian Aboriginal language spoken by about ten people in the top end of the Northern Territory. It possesses an unusual open class of words which Wilson calls coverbs. Coverbs are responsible for conveying a wide range of mostly verbal and adjectival meanings. They are most frequently paired with an inflecting verb from a closed class to form a complex predicate; the coverb and inflecting verb jointly determine the verbal semantics and argument structure of the clause. This book provides a descriptive and analytical account of the behaviour of coverbs in Wagiman, especially their role in complex predicate formation. The author seeks to discover what governs which pairings of coverbs and inflecting verbs are possible and how the meaning of the whole can be derived from the meanings of the parts. Wilson pursues a formal account of Wagiman complex predicates within Lexical Functional Grammar, seeing complex predicate formation as the fusion of Lexical Conceptual Structures.

**Complex Predicates** Mengistu Amberber, Brett Baker, Mark Harvey, 2010-04-22 Complex predicates are multipredicational but monoclausal structures. They have proven problematic for linguistic theory, particularly for proposed distinctions between the lexicon, morphology and syntax. This volume focuses on the mapping from morphosyntactic structures to event structure and, in particular, the constraints on possible mappings. The volume showcases the coverb construction, a complex predicate construction which, though widespread, has received little attention in the literature. The coverb construction contrasts with more familiar serial verb constructions. The coverb construction generally maps only to event structures like those of monomorphemic verbs, whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs. The volume coverage is truly cross-linguistic, including languages from Australia, Papua New Guinea, Southeast Asia, the Indian subcontinent, East Africa and North America. The volume establishes a new arena of research in event structure, syntax and cross-linguistic typology. **Morphosyntax** William Croft, 2022-08-04

Taking a functional approach, this book provides a thorough overview of Morphosyntax and sets out a framework for syntactic constructions. Australian Languages R. M. W. Dixon, Robert M. W. Dixon, 2002-11-14 Professor Dixon presents a

comprehensive study of the indigenous languages of Australia. **Barayin Morphosyntax** Joseph Lovestrand, 2022-01-06 This volume offers a Lexical Functional Grammar (LFG) analysis of the morphosyntax of Barayin, a Chadic language spoken by about 6000 people in the Guera region of Chad. The core chapters of the book draw on rich empirical data to provide analyses of the basic clause, noun phrases, verb phrases and serial verb constructions. The version of LFG adopted here includes two recent innovations: the first is minimal c structure, which results in simpler phrase structure representations; the second is the assumption that glue semantics accounts for argument selection, rejecting the need for a level of a structure or for Completeness and Coherence in f structure. Argument sharing in serial verb constructions can thus be modeled in a connected s structure. This method of modeling semantic composition in complex predicates is extended to directional and

associated motion complex predicates in Choctaw and Wambaya removing the need to appeal to a special mechanism to unite semantic forms in such constructions      *Language Description, History and Development* Jeff Siegel, John Lynch, Diana Eades, 2007-03-14 This volume in memory of Terry Crowley covers a wide range of languages Australian Oceanic Pidgins and Creoles and varieties of English Part I Linguistic Description and Typology includes chapters on topics such as complex predicates and verb serialization noun incorporation possessive classifiers diphthongs accent patterns modals in Australian English and directional terms in atoll based languages Part II Historical Linguistics and Linguistic History ranges from the reconstruction of Australian languages to reflexes of Proto Oceanic to the lexicon of early Melanesian Pidgin Part III Language Development and Linguistic Applications comprises studies of lexicography language in education and language endangerment and language revival spanning the Pacific from South Australia and New Zealand to Melanesia and on to Colombia The volume will whet the appetite of anyone interested in the latest linguistic research in this richly multilingual part of the globe      *Verb Classification in Australian Languages* William B. McGregor, 2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates      Secondary Predication and Adverbial Modification Nikolaus P. Himmelmann, Eva F. Schultze-Berndt, 2006-09-28 Depictive secondary predicates such as raw in George ate the fish raw are central to current issues in syntactic and semantic theory in particular predication theory phrase structure theories issues of control and grammatical relations and verbal aspect This is the first book to approach depictive secondary predication from a cross linguistic perspective It describes all the relevant phenomena and brings together critical surveys and new contributions on their morphosyntactic and semantic properties It considers similarities and differences between secondary predicates and other types of adjuncts including adverbials of manner comparison quantity and location The authors are leading scholars with a first hand knowledge of the languages they discuss Their approach is theory neutral and pragmatic they draw on insights and research traditions ranging from the minimalist program to semantic maps methodology The book will interest scholars working on the semantics or syntax of secondary predicates adverbials and the role of agreement and other morphological marking It has been designed for use in advanced syntax and typology classes      **The Oxford Handbook of Derivational Morphology** Rochelle Lieber, Pavol Stekauer, 2014-09-25 The Oxford Handbook of Derivational Morphology is intended as a companion volume to The Oxford Handbook of Compounding OUP 2009 Written by distinguished scholars its 41 chapters aim to provide a comprehensive and thorough overview of the study of derivational morphology The handbook begins with an overview and a consideration of definitional matters

distinguishing derivation from inflection on the one hand and compounding on the other From a formal perspective the handbook treats affixation prefixation suffixation infixation circumfixation etc conversion reduplication root and pattern and other templatic processes as well as prosodic and subtractive means of forming new words From a semantic perspective it looks at the processes that form various types of adjectives adverbs nouns and verbs as well as evaluatives and the rarer processes that form function words The book also surveys derivation in fifteen language families that are widely dispersed in terms of both geographical location and typological characteristics

**The Oxford Handbook of Word Classes** Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research

**The Handbook of Lexical Functional Grammar** Mary Dalrymple, 2023-12-14 Lexical Functional Grammar LFG is a nontransformational theory of linguistic structure first developed in the 1970s by Joan Bresnan and Ronald M Kaplan which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information related by means of functional correspondences This volume has five parts Part I Overview and Introduction provides an introduction to core syntactic concepts and representations Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions Part III Grammatical modules and interfaces provides an overview of LFG work on semantics argument structure prosody information structure and morphology Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics learnability psycholinguistics and second language learning Part V Formal and computational issues and applications provides an overview of computational and formal properties of the theory implementations and computational work on parsing translation grammar induction and treebanks Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families The final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches

**Cognitive Science Perspectives on Verb Representation and Processing** Roberto G. de Almeida, Christina Manouilidou, 2014-12-08 Verbs play an important role in how events states and other happenings are mentally represented and how they are expressed in natural language Besides their central role in linguistics verbs have long been prominent topics of research in analytic philosophy mostly on the nature of events and predicate argument structure and a topic of empirical investigation in psycholinguistics mostly on argument structure and its role in sentence comprehension More recently the representation of verb meaning has been gaining momentum as a topic of research in other cognitive science branches notably neuroscience and the psychology of concepts The present volume is an expression of this recent surge in the investigation of verb structure and meaning from the interdisciplinary perspective of cognitive science with up to date contributions by theoretical linguists philosophers psycholinguists and neuroscientists The volume

presents new theoretical and empirical studies on how verb structure and verb meaning are represented how they are processed during language comprehension how they are acquired and how they are neurologically implemented Cognitive Science Perspectives on Verb Representation and Processing is a reflection of the recent collaboration between the disciplines that constitute cognitive science bringing new empirical data and theoretical insights on a key element of natural language and conceptualization A Grammar of Bardi Claire Bower, 2012-08-31 The Bardi language is currently spoken by fewer than 10 people The language is a member of the Nyulnyulan family a small non Pama Nyungan family in northwest Australia This book is a reference grammar of the language The 16 chapters include information on phonetics and phonology nominal and verbal morphology and syntax as well as an ethnographic sketch of traditional life A selection of texts is also included It is the first published full study of a Nyulnyulan language *The Languages and Linguistics of Australia* Harold Koch, Rachel Nordlinger, 2014-08-19 The Languages and Linguistics of Australia A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The volume provides a thorough overview of Australian languages including their linguistic structures their genetic relationships and issues of language maintenance and revitalisation Australian English Aboriginal English and other contact varieties are also discussed

Language, Biology and Cognition Prakash Mondal, 2019-07-17 This book examines the relationship between human language and biology in order to determine whether the biological foundations of language can offer deep insights into the nature and form of language and linguistic cognition Challenging the assumption in biolinguistics and neurolinguistics that natural language and linguistic cognition can be reconciled with neurobiology the author argues that reducing representation to cognitive systems and cognitive systems to neural populations is reductive leading to inferences about the cognitive basis of linguistic performance based on assuming false dependencies Instead he finds that biological implementations of cognitive rather than the biological structures themselves are the driver behind linguistic structures In particular this book argues that the biological roots of language are useful only for an understanding of the emergence of linguistic capacity as a whole but ultimately irrelevant to understanding the character of language Offering an antidote to the current thinking embracing biologism in linguistic sciences it will be of interest to readers in linguistics the cognitive and brain sciences and the points at which these disciplines converge with the computer sciences **The Blackwell Companion to Syntax** Martin

Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at [www.companiontosyntax.com](http://www.companiontosyntax.com) This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians There exists no other comparable collection of research that documents the development of syntax in this way Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds Sandra

Chung Susan Rothstein Adriana Belletti Jim Huang Howard Lasnik and Marcel den Dikken among many others A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field Explores a comprehensive range of syntax topics from an historical perspective Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures Each multi volume set is also accompanied by a CD Rom of the entire Companion Like the prestigious Blackwell Handbooks in Linguistics series this multi volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated

**Multiple Preverbs in Ancient Indo-European Languages** Chiara Zanchi, 2019-08-26 The book investigates multiple preverbs PVs in some ancient IE languages Vedic Homeric Greek Old Church Slavonic and Old Irish After an introduction it opens with the theoretical framework and a typologically oriented overview of PVs It then gives quantitative data about multiple PV composites and carries out philological formal semantic and syntactic analyses on them The comparison among these languages suggests that a process of accumulation lies behind multiple PV composites Also PV ordering is explained by different factors semantic solidarity between PVs and verbs PVs tendency to be specified by event participants PVs etymologies influence from other languages The book also contributes to casting light on the reasons for PVs grammaticalization and lexicalization These are two distinct reanalyses triggered by the same factor i.e. the mentioned semantic solidarity which makes PVs be felt as redundant They are thus reassigned salient pieces of information as actional markers grammaticalization or reinterpreted as part of the verb lexicalization

**Syntax** Talmy Givón, 2001-01-01 This new edition of Syntax A functional typological introduction is at many points radically revised In the previous edition 1984 the author deliberately chose to de-emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure With hindsight the author now finds the de-emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by-product of diachronic development or grammaticalization

In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other. It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization.

**Cognitive Neuroscience of Language** David Kemmerer, 2022-09-27 Cognitive Neuroscience of Language provides an up to date wide ranging and pedagogically practical survey of the most important developments in this exciting field. It guides students through all of the major areas of investigation beginning with the fundamental aspects of brain structure and function and then following with key topics such as classic and progressive aphasia syndromes speech perception and production the meanings of object nouns action verbs and abstract words the formulation and comprehension of complex expressions including grammatically inflected words complete sentences and entire stories and several other domains of neurolinguistic research including reading and writing sign language and the bilingual brain. Drawing heavily on prominent theoretical models the core chapters illustrate how such frameworks are supported and sometimes challenged by experiments employing diverse brain mapping techniques. This edition has been thoroughly updated throughout and now includes a dedicated chapter on the neural substrates of bilingualism. Chapters have been revised to reflect the most salient developments in the field and the book has undergone a thoughtful restructure to mirror course teaching. While the study of language can be challenging the text has been written accessibly and requires no previous knowledge of either neuroscience or linguistics and includes definitions of technical terms and explanations of important principles from both disciplines along the way. Accompanied by online resources for students and instructors it is an essential companion for graduate or upper level undergraduate students.

*Proto-Australian* Mark Harvey, Robert Mailhammer, 2024-08-19 This book is the first full evaluation of the Proto Australian hypothesis which proposes that most Australian languages have a common ancestor Proto Australian PA. Using the standard methodologies of historical linguistics the authors show that nearly all Australian languages descend from PA. Given that PA was a single language it was spoken only in a small area of Australia. Its descendants have spread across the continent. Current theories of language spread do not offer clear motivations for large scale spread in hunter gatherer economies. This raises significant questions for analyses of Australian prehistory and archaeology specifically and more widely for general theories of hunter gatherer prehistory and language spread.
