Davis-Floyd, 2004-03-15 Why do so many American women allow themselves to become enmeshed in the standardized routines of technocratic childbirth routines that can be insensitive unnecessary and even unhealthy Anthropologist Robbie Davis Floyd first addressed these questions in the 1992 edition Her new preface to this 2003 edition of a book that has been read applauded and loved by women all over the world makes it clear that the issues surrounding childbirth remain as controversial as ever Birth on the Threshold Cecilia Coale Van Hollen, 2003-10-16 Publisher Description Birthing

Techno-Sapiens Robbie Davis-Floyd, 2021-03-30 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the

social sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and delivery of maternity services

Birth as an American Rite of Passage Robbie Davis-Floyd, 2022-05-05 This classic book first published in 1992 and again in 2003 has inspired three generations of childbearing people birth activists and researchers and birth practitioners midwives doulas nurses and obstetricians to take a fresh look at the standard procedures that are routinely used to manage American childbirth It was the first book to identify these non evidence based obstetric interventions as rituals that enact and transmit the core values of the American technocracy thereby answering the pressing question of why these interventions continue to be performed despite all evidence to the contrary This third edition brings together Davis Floyd s insights into the intense ritualization of labor and birth and the technocratic humanistic and holistic models of birth with new data collected in recent years

Indigenous Experiences of Pregnancy and Birth Neufeld Hannah Tait, 2017-10-01 Traditional midwifery culture customs understandings and meanings surrounding pregnancy and birth are grounded in distinct epistemologies and worldviews that have sustained Indigenous women and their families since time immemorial Years of colonization however have impacted the degree to which women have choice in the place and ways they carry and deliver their babies As nations such as Canada became colonized traditional gender roles were seen as an impediment The forced rearrangement of these gender roles was highly disruptive to family structures Indigenous women quickly lost their social and legal status as being dependent on fathers and then husbands The traditional structures of communities became replaced with colonially informed governance which reinforced patriarchy and paternalism The authors in this book carefully consider these historic interactions and their impacts on Indigenous women s experiences As the first section of the book describes pregnancy is a time when women reflect on their bodies as a space for the development of life Foods prepared and consumed ceremony and other activities engaged in are no longer a focus solely for the mother but also for the child she is carrying Authors from a variety of places and perspectives thoughtfully express the historical along with contemporary forces positively and negatively impacting prenatal behaviours and traditional practices Place and culture in relation to birth are explored in the second half of the book from locations in Canada such as Manitoba Ontario British Columbia the Northwest Territories and Aotearoa The reclaiming and revitalization of birthing practices along with rejuvenating forms of traditional knowledge form the foundation for exploration into these experiences from a political perspective It is an important part of decolonization to acknowledge policies such as birth evacuation as being grounded in systemic racism The act of returning birth to communities and revitalizing Indigenous prenatal practices are affirmation of sustained resilience and strength instead of a one sided process of reconciliation

Baloch Midwives Fouzieyha Towghi, 2024-03-29 This book is the first major ethnography of Baloch midwives in Pakistan Drawing on long term ethnographic research in Balochistan province it shows how dh nabogs dheenabogs Baloch midwives ranging in age from about 30 to 80 and their dh nabogir midwifery aid women and their kin through labor and postpartum recovery Its chapters show how Baloch midwives forms and ethics of care have persisted despite nearly two centuries of British colonial policies and the subsequent disparaging official views regarding South Asian Indigenous midwives commonly known as d s in both postcolonial India and Pakistan Through their continued presence and

effective uses of their traditional medicine Baloch midwives contain mediate and offer a powerful critique of women's iatrogenic suffering caused by unnecessary biomedical interventions Through a nuanced analysis of Baloch midwives ethical approach to caring for women and their responses to the exigencies of women's health this book demonstrates why over a century of state efforts to modernize and biomedicalize childbirth practices have failed to convince the majority of Baloch women in Balochistan to give birth in hospitals They instead prefer home births and the midwifery care from the dh nabogs whom they trust This book will not only be of interest to scholars and students in anthropology medical humanities public health sociology gender and women's studies gender and medical history South Asia studies and global health studies but also to those in the midwifery and the nursing profession It will also be of interest to non academic readers wishing to learn about midwives in South Asia and anyone interested in reading about traditional medicine and midwives who practice outside of European and North American cultural contexts

Baby's First Picture Lisa Meryn Mitchell, 2001-01-01 Mitchell argues what is seen through ultrasound is neither self evident nor natural but historically and culturally contingent and subject to a wide range of interpretation

Women, Monstrosity and Horror Film Erin Harrington, 2017-08-10 Women occupy a privileged place in horror film Horror is a space of entertainment and excitement of terror and dread and one that relishes the complexities that arise when boundaries of taste of bodies of reason are blurred and dismantled It is also a site of expression and exploration that leverages the narrative and aesthetic horrors of the reproductive the maternal and the sexual to expose the underpinnings of the social political and philosophical othering of women This book offers an in depth analysis of women in horror films through an exploration of gynaehorror films concerned with all aspects of female reproductive horror from reproductive and sexual organs to virginity pregnancy birth motherhood and finally to menopause Some of the themes explored include the intersection of horror monstrosity and sexual difference the relationships between normative female hetero sexuality and the twin figures of the chaste virgin and the voracious vagina dentata embodiment and subjectivity in horror films about pregnancy and abortion reproductive technologies monstrosity and mad science the discursive construction and interrogation of monstrous motherhood and the relationships between menopause menstruation hagsploitation and abject barren bodies in horror The book not only offers a feminist interrogation of gynaehorror but also a counter reading of the gynaehorrific that both accounts for and opens up new spaces of productive radical and subversive monstrosity within a mode of representation and expression that has often been accused of being misogynistic It therefore makes a unique contribution to the study of women in horror film specifically while also providing new insights in the broader area of popular culture gender and film philosophy

Anthropologies of Global Maternal and Reproductive Health Lauren J. Wallace, Margaret E. MacDonald, Katerini T. Storeng, 2022-01-11 This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world from global policy spaces to sites of practice The authors both internationally respected

anthropologists and new voices demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals and lay people's intimate encounters with policy. Authors look closely at core policy debates in the history of global maternal health across six different continents including Women's use of misoprostol for abortion in Burkina Faso. The place of traditional birth attendants in global maternal health. Donor-driven maternal health programs in Tanzania. Efforts to integrate qualitative evidence in WHO maternal and child health policy making.

Anthropologies of Global Maternal and Reproductive Health will engage readers interested in critical conversations about global health policy today. The broad range of foci makes it a valuable resource for teaching in medical anthropology, anthropology of reproduction and interdisciplinary global health programs. The book will also find readership amongst critical public health scholars, health policy and systems researchers and global public health practitioners.

Health Psychology
Elizabeth D. Whitaker, 2016-12-05. This reader looks at both the biological and cultural aspects of health and healing within a comparative framework. *Health and Healing in Comparative Perspective* provides both fascinating comparative ethnographic detail and a theoretical framework for organizing and interpreting information about health. While there are many health-related fields represented in this book, its core discipline is medical anthropology and its main focus is the comparative approach. Cross-cultural comparison gives anthropological analysis breadth while the evolutionary time scale gives it depth. These two features have always been fundamental to anthropology and continue to distinguish it among the social sciences. A third feature is the in-depth knowledge of culture produced by anthropological methods such as participant observation involving long-term presence in and research among a study population. For medical anthropology, medical sociology, public health, nursing courses.

Mainstreaming Midwives
Robbie Davis-Floyd, Christine Barbara Johnson, 2012-12-06. Providing insights into midwifery, a team of reputable contributors describe the development of nurse and direct entry midwifery in the United States including the creation of two new direct entry certifications: the Certified Midwife and the Certified Professional Midwife, and examine the history, purposes, complexities and the political strife that has characterized the evolution of midwifery in America. Including detailed case studies, the book looks at the efforts of direct entry midwives to achieve legalization and licensure in seven states: New York, Florida, Michigan, Iowa, Virginia, Colorado, and Massachusetts with varying degrees of success.

Non-Western Educational Traditions
Timothy G. Reagan, 2004-09-22. This text provides a brief yet comprehensive overview of a number of non-Western approaches to educational thought and practice. Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters. The value of this informative, mind-opening text for preservice and in-service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter. New in the Third Edition: Chapter 2, Conceptualizing Culture: I, We and The Other is new to this edition. It is a

response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed
