Creating Value with Big Data Analytics Peter C. Verhoef, Edwin Kooge, Natasha Walk, 2016-01-08 Our newly digital world is generating an almost unimaginable amount of data about all of us Such a vast amount of data is useless without plans and strategies that are designed to cope with its size and complexity and which enable organisations to leverage the information to create value This book is a refreshingly practical yet theoretically sound roadmap to leveraging big data and analytics *Creating Value with Big Data Analytics* provides a nuanced view of big data development arguing that big data in itself is not a revolution but an evolution of the increasing availability of data that has been observed in recent times Building on the authors extensive academic and practical knowledge this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data By tying data and analytics to specific goals and processes for implementation this is a much needed book that will be essential reading for students and specialists of data analytics marketing research and customer relationship management

Demarketing Nigel Bradley, Jim Blythe, 2013-10-23 We all understand the basic principles underpinning marketing activity to identify unfulfilled needs and desires and boost demand for the solutions a product is offering The mantra is always sell more De marketing tries for the very opposite Why would a company actively try to decrease demand There are many good reasons to do so a firm cannot supply large enough quantities or wants to limit supply to a region of narrow profit margin Or crucially to discourage undesirable customers those that could be bad for brand reputation or in the case of the finance sector high risk De marketing can yield effective solutions to these issues effectively curtailing demand yet crucially not destroying it Nevertheless the fundamental negativity of de marketing strategies often causes organisations to hide them from view and as a result they are rarely studied This then is the first book to cast light on the secretive counterintuitive world of de marketing deconstructing its mysteries and demonstrating how to incorporate them into a profit driven marketing plan A selection of thought leaders in strategic marketing mix theory with illustrative global cases providing insight into how these strategies have been employed in practice and measuring their successes and failures It s a must read for any student or researcher that wants to think differently about marketing
