Handbook of Research on Emerging Technologies for Effective Project Management Jamil, George Leal, Ribeiro, Fernanda, Malheiro da Silva, Armando, Maravilhas Lopes, Sérgio, 2019-09-13 Driven by such tools as big data cognitive computing new business models and the internet of things the overall demand for innovation is becoming more critical for competitiveness and emerging technologies These technologies have become real alternatives for the market and offer new perspectives for modern project management applications The Handbook of Research on Emerging Technologies for Effective Project Management is an essential research publication that proposes innovations for firms and markets through the exploration of project management principles and methods and the effective integration of knowledge and innovation It encompasses academic and scientific propositions reviews for conceptual bases applications of theories in new market solutions and cases of successful insertion of disruptive technologies and business models in new competitive market offers Featuring a range of topics such as innovation management business administration and marketing this book is ideal for project managers IT specialists software developers executives practitioners managers marketers researchers and industry professionals

Information Systems Marinos Themistocleous, Maria Papadaki, 2020-04-17 This book constitutes selected papers from the 16th European Mediterranean and Middle Eastern Conference EMCIS 2019 held in Dubai UAE in October 2019 EMCIS is dedicated to the definition and establishment of Information Systems as a discipline of high impact for the methodical community and IS professionals focusing on approaches that facilitate the identification of innovative research of significant relevance to the IS discipline The 48 full papers presented in this volume were carefully reviewed and selected from a total of 138 submissions They were organized in topical sections named Big Data and Analytics Blockchain Technology and Applications Cloud Computing Digital Services and Social Media e Government Enterprise Information Systems Health Care Information Systems Information Systems Security and Information Privacy Protection Innovative Research Projects IT Governance and Management and Organizational Issues in Information Systems

IBM Software for SAP Solutions Yaro Dunchych, Peter Bahrs, Khirallah Birkler, Bernd Eberhardt, Navneet Goyal, James Hunter, Derek Jennings, Joe Kaczmarek, Michel Laaroussi, Michael Love, Stefan Momma, Nick Norris, Martin Oberhofer, Manfred Oevers, Paul Pacholski, Andrew Stalneck, Jörg Stolzenberg, Pierre Valiquette, IBM Redbooks, 2015-09-29 SAP is a market leader in enterprise business application software SAP solutions provide a rich set of composable application modules and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite In

most cases companies that adopt SAP software remain heterogeneous enterprises running both SAP and non SAP systems to support their business processes Regardless of the specific scenario in heterogeneous enterprises most SAP implementations must be integrated with a variety of non SAP enterprise systems Portals Messaging infrastructure Business process management BPM tools Enterprise Content Management ECM methods and tools Business analytics BA and business intelligence BI technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP centric environments However the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance When SAP software is used in a large heterogeneous enterprise environment SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality and to integrate the SAP solutions with non SAP systems This IBM Redbooks publication explains the value of integrating IBM software with SAP solutions It describes how to enhance and extend pre built capabilities in SAP software with best in class IBM enterprise software enabling clients to maximize return on investment ROI in their SAP investment and achieve a balanced enterprise architecture approach This book describes IBM Reference Architecture for SAP a prescriptive blueprint for using IBM software in SAP solutions The reference architecture is focused on defining the use of IBM software with SAP and is not intended to address the internal aspects of SAP components The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy efficiency and balance The majority of the most important architectural domain topics such as integration process optimization master data management mobile access Enterprise Content Management business intelligence DevOps security systems monitoring and so on are covered in the book However there are several other architectural domains which are not included in the book This is not to imply that these other architectural domains are not important or are less important or that IBM does not offer a solution to address them It is only reflective of time constraints available resources and the complexity of assembling a book on an extremely broad topic Although more content could have been added the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains and it is hoped that this book provides great value to those reading it This IBM Redbooks publication is targeted to the following audiences Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large scale SAP projects IT architects and consultants integrating IBM technology with SAP solutions

Enterprise Systems Nozar Daylami, 2024-12-11 In the rapidly evolving business technology landscape Enterprise Resource Planning ERP systems have become indispensable tools for organizations striving to achieve operational excellence and competitive advantage Today ERP systems encompass a broad spectrum of functionalities that transcend

mere resource planning integrating various facets of business operations into a cohesive streamlined whole Therefore as an author writing about these systems adopting the Enterprise Systems moniker provides a more accurate and holistic view of their capabilities better representing these systems comprehensive nature This Book is designed to provide an in depth exploration of modern ERP systems Retaining ERP in the center of the cover page and adopting the broader term Enterprise Systems is deliberate and strategic ERP is a term that carries significant historical weight and recognition The evolution of ERP systems also has seen the integration of advanced modules such as CRM and SCM This Book acknowledges these advancements and provides comprehensive coverage of core and advanced ERP modules offering readers a complete understanding of how Enterprise Systems are implemented and function as the backbone of modern enterprise operations His skills span ERP implementation supply chain management project management and cloud computing as a published thought leader and active member of ACM and AIS Dr Daylami brings a wealth of practical and academic knowledge to this comprehensive ERP guide Fluent in German and Farsi and certified in ITIL Foundation CloudU and CSCP by APICS his insights provide invaluable guidance for navigating complex ERP landscapes **Software Applications: Concepts, Methodologies, Tools, and Applications** Tiako, Pierre F.,2009-03-31 Includes articles in topic areas such as autonomic computing operating system architectures and open source software technologies and applications
