Cutting To The Core Exploring The Ethics Of Contested Surgeries:

Cutting to the Core David Benatar, 2006 Surgery inevitably inflicts some harm on the body At the very least it damages the tissue that is cut These harms often are clearly outweighed by the overall benefits to the patient However where the benefits do not outweigh the harms or where they do not clearly do so surgical interventions become morally contested Cutting to the Core examines a number of such surgeries including infant male circumcision and cutting the genitals of female children the separation of conjoined twins surgical sex assignment of intersex children and the surgical re assignment of transsexuals limb and face transplantation cosmetic surgery and placebo surgery When if ever do the benefits of these surgeries outweigh their costs May a surgeon perform dangerous procedures that are not clearly to the patient's benefit even if the patient consents to them May a surgeon perform any surgery on a minor patient if there are no clear benefits to that child These and other related questions are the core themes of this collection of essays

Cutting to the Core David Benatar, 2006-03-06 When the benefits of surgery do not outweigh the harms or where they do not clearly do so surgical interventions become morally contested Cutting to the Core examines a number of such surgeries including infant male circumcision and cutting the genitals of female children
