**Cyborg Conception** Grace Halden, 2024-06-04 This book considers the growing popularity of solo motherhood via gamete donation and how this type of cyborg conception is narrated in medicine bioethics fiction and memoir It identifies solo mothers as radical women who exist in a space beyond binarity male

female dual rearing dynamic and heteronormative discourse solo mothers represent among other diverse family constructions such as same sex couples and throuples a critical intervention in the dominant narrative of the nuclear family which defines the ideal reproductive model This book combines memoir and scholarly research to present a deeply nuanced and rigorous overview of the solo motherhood phenomenon **Bad Seeds and Holy Terrors** Dominic Lennard,2014-10-09 Examines the complexities and contradictions that arise when the monsters in the movies are children Since the 1950s children have provided some of horror s most effective and enduring villains from dainty psychopath Rhoda Penmark of The Bad Seed 1956 and spectacularly possessed Regan MacNeil of The Exorcist 1973 to psychic ghost girl Samara of The Ring 2002 and adopted terror Esther of Orphan 2009 Using a variety of critical approaches including those of cinema studies cultural studies gender studies and psychoanalysis Bad Seeds and Holy Terrors offers the first full length study of these child monsters In doing so the book highlights horror as a topic of analysis that is especially pertinent socially and politically exposing the genre as a site of deep ambivalence toward and even hatred of children This is impeccably well researched and presented It holds its own at the top of film studies scholarship Sprightly in its survey across key areas of cultural anxiety and able to draw on a range of lucid examples Lennard produces sophisticated and complex extended analyses where necessary A pleasure to read Linda Ruth Williams University of Southampton United Kingdom **Autobiography and Teacher Development in China** W. Pinar,2016-04-27 This is the first investigation of the roles of autobiography in teacher education to be informed by concepts and examples from China Europe and North and South America Unique and timely this volume addresses multiple movements of teacher education reform worldwide **Cyberpsychology** Ian Parker,Angel J. Gordo López,1999-08-04 Cyberpsychology explores the connections between modes of information and the management of the individual in the context of new technologies Tracing historical and contemporary lines of argument the text brings together psychologists and cultural theorists working in the spheres of technology and subjectivity to explore links between popular culture technoscience feminism ethics and politics Wide ranging and provocative each chapter engages with mainstream psychological research and critical social trends to explore issues such as the collapse of memory and creativity and the applications of virtual technologies to the lives of people with disabilities It is essential reading for anyone interested in critical psychology and the developing communications media **Children are Everywhere** Meghana Joshi,2023-11-10 Children are Everywhere engages with how demographic anxieties and reproductive regimes emerge as forms of social inclusion and exclusion in a low fertility Western European context This book explores everyday experiences of parenting and childlessness of ethnic Germans in Berlin who came of age around the fall of the Berlin Wall and brings them into conversation with theories on parenting waithood non biological intimacies and masculinities This is the first ethnographic work by a South Asian author on demographic anxieties and reproduction in Germany and reverses the anthropological gaze to study Europe as the Other **Desire in the Age of Robots and AI** Rebecca Gibson,2019-08-24 This book examines how

science fiction's portrayal of humanity's desire for robotic companions influences and reflects changes in our actual desires. It begins by taking the reader on a journey that outlines basic human desires; in short, we are storytellers and we need the objects of our desire to be able to mirror that aspect of our beings. This not only explains the reasons we seek out differences in our mates but also why we crave sex and romance with robots. In creating a new species of potential companions, science fiction highlights what we already want and how our desires dictate and are in return recreated by what is written. But sex with robots is more than a sci-fi pop culture phenomenon; it's a driving force in the latest technological advances in cybernetic science. As such, this book looks at both what we imagine and what we can create in terms of the newest iterations of robotic companionship.

*Toy Theory* Seth Giddings, 2024-11-05 A novel interpretation of the history and theory of technology from the perspective of toys, play, and play objects. *Toy Theory* addresses the relationships between toys and technology in two distinct but overlapping ways: first as underexamined cultural artifacts and behaviors with significant technical attributes, and second as playful and toylike dimensions of technology at large. Seth Giddings sets out a toy theory of technology that emphasizes the speculative, experimental, and noninstrumental in technological paradigms and argues that children's playthings, rather than being the most ephemeral and inconsequential of technical devices, instead offer analytical and anthropological resources for understanding the materiality and imaginaries of technology over time. After defining toy theory in general and conceptual terms, Giddings examines different types of toys to explore shifting relationships between the microcosmic symbolic or mimetic content, material and technical constitution, and modes of play of toys and toy-related artifacts on the one hand, and prevailing macrocosmic technological paradigms and imaginaries on the other. Taking a broad historical and genealogical view, Giddings traces contemporary postdigital toy and play culture to precedents from the Neolithic through to the Enlightenment to consumer culture from the early nineteenth century to the present day.

*Women's Health and Social Change* Ellen Annandale, 2008-07-14 Shortlisted for the BSA Sociology of Health and Illness Book Prize 2009. In this important text, Ellen Annandale provides a comprehensive and persuasive analysis of the contemporary social relations of gender and women's health, outlining what an adequate feminist analysis of women's health might look like.

**Intimate Strangers** Veronika Siegl, 2023-07-15 Zooming in on commercial surrogacy in Russia and Ukraine, *Intimate Strangers* addresses market expansion into the intimate spheres of life that play out on women's bodies as mothers and workers. Veronika Siegl follows the inner workings of a surrogacy market marked by secrecy, distrust, and anonymous business relationships. She explores intended mothers' anxious struggles for a child in light of stigmatized infertility and the aggressive biopolitics of motherhood; the uncertain but pragmatic pathways in and out of fertility clinics; as surrogates navigate harsh economic realities and resist being objectified or morally judged; and the powerful role of agents and doctors who have found a profitable niche in nurturing and facilitating other people's existential hopes. *Intimate Strangers* discusses these issues against the backdrop of ultra-conservatism and moral governance in Russia, the rising

international popularity of the Ukrainian surrogacy market and the pervasiveness of neo liberal ideologies and individualized notions of reproductive freedom      *On Having an Own Child* Karin Lesnik-Oberstein, 2018-04-24 How are ideas of genetics blood the family and relatedness created and consumed This is the first book ever to consider in depth why people want children and specifically why people want children produced by reproductive technologies such as IVF ICSI etc As the book demonstrates even books ostensibly devoted to the topic of why people want children and the reasons for using reproductive technologies tend to start with the assumption that this is either simply a biological drive to reproduce or a socially instilled desire This book uses psychoanalysis not to provide an answer in its own right but as an analytic tool to probe more deeply the problems of these assumptions The idea that reproductive technologies simply supply an own child is questioned in this volume in terms of asking how and why reproductive technologies are seen to create this ownness Given that it is the idea of an own child that underpins and justifies the whole use of reproductive technologies this book is a crucial and wholly original intervention in this complex and highly topical area      *Cultural Technologies Within a Technological Culture* Christian Papilloud, Kornelia Hahn, 2008 While there is already a huge research literature marked by the sociology of technology the analyses gathered in this volume try to go beyond classical sociological approaches Rather the idea is that crossing traditional boundaries will lead to new results when it comes to understanding the effects of technologies This idea is based on the assumption that the implementation of technology in daily life is no longer directly associated with binaries such as technology nature object subject alienated and creative activities social determination and self determination material culture and social practices or interactive communication and mediated communication In fact technology gains social relevance as it is uniquely embedded into cultural practices So far this argument holds especially true for analyses within the sociology of culture ethnomethodology and related fields While these fields have primarily dealt with old technologies like communication skills body performances or trained craftsmanship their fundamental argument should be extended to the more advanced technologies and to the use of latest high tech      **Encyclopedia of New Media** Steve Jones, 2002-12-10 Scholars and students finally have a reference work documenting the foundations of the digital revolution Were it not the only reference book to cover this emergent field Jones's encyclopedia would still likely be the best CHOICE The articles are interesting entertaining well written and reasonably long Highly recommended as a worthwhile and valuable addition to both science and technology and social science reference collections REFERENCE USER SERVICES QUARTERLY AMERICAN LIBRARY ASSOCIATION From Amazon.com to virtual communities this single volume encyclopedia presents more than 250 entries that explain communication technology multimedia entertainment and e-commerce within their social context Edited by Steve Jones one of the leading scholars and founders of this emerging field and with contributions from an international group of scholars as well as science and technology writers and editors the Encyclopedia of New Media widens the boundaries of today's information society through interdisciplinary historical and international coverage With such topics as

broadband content filtering cyberculture cyberethics digital divide freenet MP3 privacy telemedicine viruses and wireless networks the Encyclopedia will be an indispensable resource for anyone interested or working in this field Unlike many encyclopedias that provide short fragmented entries the Encyclopedia of New Media examines each subject in depth in a single coherent article Many articles span several pages and are presented in a large double column format for easy reading Each article also includes the following A bibliography Suggestions for further reading Links to related topics in the Encyclopedia Selected works where applicable Entries include Pioneers such as Marc Andreessen Marshall McLuhan and Steve Jobs Terms from Access to Netiquette to Web cam Technologies including Bluetooth MP3 and Linux Businesses such as Amazon com Key labs research centers and foundations Associations Laws and much more The Encyclopedia of New Media includes a comprehensive index as well as a reader s guide that facilitates browsing and easy access to information Recommended Libraries Public academic government special and private corporate

**New Media** Martin Lister, 2009 New Media A Critical Introduction is a comprehensive introduction to the culture history technologies and theories of new media Written especially for students the book considers the ways in which new media really are new assesses the claims that a media and technological revolution has taken place and formulates new ways for media studies to respond to new technologies The authors introduce a wide variety of topics including how to define the characteristics of new media social and political uses of new media and new communications new media technologies politics and globalization everyday life and new media theories of interactivity simulation the new media economy cybernetics cyberculture the history of automata and artificial life Substantially updated from the first edition to cover recent theoretical developments approaches and significant technological developments this is the best and by far the most comprehensive textbook available on this exciting and expanding subject At [www.newmediaintro.com](http://www.newmediaintro.com) you will find additional international case studies with online references specially created You Tube videos on machines and digital photography a new Virtual Camera case study with links to short film examples useful links to related websites resources and research sites further online reading links to specific arguments or discussion topics in the book links to key scholars in the field of new media

Gameworlds Seth Giddings, 2016-05-19 Game studies is a rapidly developing field across the world with a growing number of dedicated courses addressing video games and digital play as significant phenomena in contemporary everyday life and media cultures Seth Giddings looks to fill a gap by focusing on the relationship between the actual and virtual worlds of play in everyday life He addresses both the continuities and differences between digital play and longer established modes of play The gameworlds title indicates both the virtual world designed into the videogame and the wider environments in which play is manifested social relationships between players hardware and software between the virtual worlds of the game and the media universes they extend e g Pok mon Harry Potter Lego Star Wars and the gameworlds generated by children s imaginations and creativity through talk and role play drawings and outdoor play The gameworld raises questions about who and what is in play Drawing on recent

theoretical work in science and technology studies games studies and new media studies a key theme is the material and embodied character of these gameworlds and their components players bodies computer hardware toys virtual physics and the physical environment Building on detailed small scale ethnographic case studies Gameworlds is the first book to explore the nature of play in the virtual worlds of video games and how this play relates to and crosses over into everyday play in the actual world
