International Handbook of Disaster Research Amita Singh, 2023-09-30 This handbook is a comprehensive source of information, analysis, and directions in disaster studies. It goes beyond the oft-explored issues of management and science related to the topic and explores policies, governance, law, and decision making combined with the processes of implementation and enforcement all the while integrating the latest science and technology updates related to the topic such as artificial intelligence and early warning systems. It brings together studies which relate to sociology, politics, and institutional economics which work under the impact of resource availability, issues of leadership, and international laws. Disasters are trans-boundary and disaster studies are trans-disciplinary. It is this aspect which would form the fulcrum of contributions and present a new, refreshing, and innovative design for the handbook. The transformatory pedagogy which started with the Hyogo Framework for action 2005-2015 and The Sendai Framework for Disaster Risk Reduction 2015-2030 outlines seven clear targets and four priorities for action to prevent new and reduce existing disaster risks. The four priority areas around which the book would revolve are: i) Understanding disaster risk, ii) Strengthening disaster risk governance to manage disaster risk, iii) Investing in disaster reduction for resilience, and iv) Enhancing disaster preparedness for effective response and to Build Back Better in recovery, rehabilitation, and reconstruction. *Advertising & Selling Magazine*, 1921
