

HOW TO READ A METER

Reading your gas meter is actually simpler than you might think! Review the steps below to learn how to accurately read your meter.

1. Start with the left dial, and read the dials from left to right.
2. If the pointer is between two numbers, always select the lower number.
3. When the pointer is between "9" and "0," then "9" is considered the lower number.
4. If the pointer is DIRECTLY on the number, look at the dial to the right. If the pointer on the right has not passed "0," record the lower number.

- A** The pointer is between 2 and 3, so this dial reads 2. (The arrow indicates the direction the pointer is moving).
- B** The pointer of this dial registers 5.
- C** Do you read this 4 or 3? A quick check of the dial to the right shows its pointer has passed the zero point. The third digit in your reading is therefore 4.
- D** The pointer is between 0 and 1 so this dial reads 0.

The meter reading in the picture above reads 254.0
