**Aircraft Accident Report** , *Douglas DC-9 Maintenance Manual* ,1966 **Air Crash Investigations: Disaster in the Everglades the Crash of ValuJet Airlines Flight 592** Allistair Fitzgerald,2009-12-11 On May 11 1996 at 1413 42 eastern daylight time a Douglas DC 9 32 crashed into the Everglades about 10 minutes after takeoff from Miami International Airport Miami Florida The airplane was being operated by ValuJet Airlines Inc as flight 592 and was on its way to Atlanta Georgia Both pilots the three flight attendants and all 105 passengers were killed The National Transportation Safety Board determined that the probable cause of the accident was a fire in the airplane s cargo compartment that was initiated by the actuation of one or more oxygen generators being improperly carried as cargo *Air Crash Investigations* Allistair Fitzgerald,2009-11 On January 31 2000 Alaska Airlines Flight 261 a McDonnell Douglas MD 83 was on its way from Puerto Vallarta Mexico to Seattle Washington when suddenly the horizontal stabilizer of the plane jammed While passengers were praying for their life Captain Thompson and First officer Tansky tried to make an emergency landing in Los Angeles They did not make it the plane suddenly crashed into the Pacific Ocean killing all 93 people aboard The NTSB concluded that the failure of the horizontal stabilizer was caused by insufficient maintenance In other words the crash of Alaska Airlines Flight 261 could have been avoided **Federal Register** ,2005-12 **DC-9 Maintenance Manual** Douglas Aircraft Company, Inc, **Code of Federal Regulations** United States. Key Dismukes,Benjamin A. Berman,Loukia Loukopoulos,2017-03-02 Why would highly skilled well trained pilots make errors that lead to accidents when they had safely completed many thousands of previous flights The majority of all aviation accidents are attributed primarily to human error but this is often misinterpreted as evidence of lack of skill vigilance or conscientiousness of the pilots The Limits of Expertise is a fresh look at the causes of pilot error and aviation accidents arguing that accidents can be understood only in the context of how the overall aviation system operates The authors analyzed in great depth the 19 major U S airline accidents from 1991 2000 in which the National Transportation Safety Board NTSB found crew error to be a causal factor Each accident is reviewed in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step The approach is guided by extensive evidence from cognitive psychology that human skill and error are opposite sides of the same coin The book examines the ways in which competing task demands ambiguity and organizational pressures interact with cognitive processes to make all experts vulnerable to characteristic forms of error The final chapter identifies themes cutting across the accidents discusses the role of chance criticizes simplistic concepts of causality of accidents and suggests ways to reduce

vulnerability to these catastrophes The authors complementary experience allowed a unique approach to the study accident investigation with the NTSB cognitive psychology research both in the lab and in the field enormous first hand experience of piloting and application of aviation psychology in both civil and military operations This combination allowed the authors to examine and explain the domain specific aspects of aviation operations and to extend advances in basic research in cognition to complex issues of human performance in the real world Although The Limits of Expertise is directed to aviation operations the implications are clear for understanding the decision processes skilled performance and errors of professionals in many domains including medicine
