## Classification Key for Insect Orders

To identify the insects shown below, use the dichotomous key which consists of a series of paired statements. To identify an insect order, decide which statement in the first pair describes that insect. Go to the pair of statements indicated by the number following your choice. Again, decide which statement describes the insect. If the statement is followed by the name of the insect order, you have identified the insect. If the statement is followed by a number, go to that pair of statements to make another choice. Continue the process until you have identified the insect. Using the key, all of the insects can be identified as an order.
