Sample Book Insights

- 1 The Odyssey is a prime example of the intertwinement of myth and rational labor It illustrates the dialectic of enlightenment as it shows clear links to myth but it also contradicts those myths The epic creates a universality of language but it also disintegrates the hierarchical order of society
- 2 The German late Romantic interpretation of antiquity based on the early writings of Nietzsche recognized the element of bourgeois enlightenment in Homer However they saw this element as both positive and negative and tried to liquidate it
- 3 The most prominent and therefore the most impotent of the esoteric apologists of German heavy industry Rudolf Borchardt prematurely breaks off his analysis in the service of repressive ideology He fails to recognize that the primal powers he extols themselves represent a stage of enlightenment
- 4 The Odyssey is closer in form to the picaresque novel The hero's peregrinations from Troy to Ithaca trace the path of the self through myths a self that is infinitely weak compared to the force of nature and still in the process of formation as self consciousness

Heart of Maleness Raphaël Liogier,2020-01-28 In this timely self reflective essay a groundbreaking sociologist and philosopher examines the underlying causes of gender inequality and how we can fight against it Following the shocking infuriating accounts shared as part of the MeToo movement Raphaël Liogier felt compelled to apply his academic expertise to shed light on the roots of gender inequality and its many manifestations including catcalling workplace harassment and rape as well as the glass ceiling and the gender pay gap In the brazenness of Donald Trump who brags about groping women in the hypocrisy of outspoken progressives whose private behavior belies their so called feminist ideals and even occasionally in the good intentions of men such as Liogier who strive to be allies we can see the influence of a deep seated fantasy of male dominance With candor and clarity Liogier demonstrates that the archetypal Prince Charming and a monstrous predator such as Harvey Weinstein are two sides of the same coin products of a worldview that not only places a man's desires above a woman's but also doubts whether women are fundamentally capable of knowing what they want Recent years have witnessed significant progress toward gender equality

from the ousting of prominent men accused of sexual misconduct to the unprecedented popularity of the 2019 Women's World Cup. Heart of Maleness maps out the crucial work still to be done, first and foremost addressing the core male fantasy about women's bodies and minds.

Art in Doubt Tatyana Gershkovich, 2022-10-15

Leo Tolstoy's and Vladimir Nabokov's radically opposed aesthetic worldviews emanate from a shared intuition that approaching a text skeptically is easy but trusting it is hard. Two figures central to the Russian literary tradition, Tolstoy the moralist and Nabokov the aesthete, seem to have sharply conflicting ideas about the purpose of literature. Tatyana Gershkovich undermines this familiar opposition by identifying a shared fear at the root of their seemingly antithetical aesthetics: that one's experience of the world might be entirely one's own, private and impossible to share through art.

Art in Doubt: Tolstoy, Nabokov and the Problem of Other Minds reconceives the pair's celebrated fiction and contentious theorizing as coherent, lifelong efforts to reckon with the problem of other people's minds. Gershkovich demonstrates how the authors' shared yearning for an impossibly intimate knowledge of others formed and deformed their fiction and brought them through parallel logic to their rival late styles: Tolstoy's rustic simplicity and Nabokov's baroque complexity. Unlike those authors for whom the skeptical predicament ends in absurdity or despair, Tolstoy and Nabokov both hold out hope that skepticism can be overcome not by force of will but with the right kind of text, one designed to withstand our impulse to doubt it.

Through close readings of key canonical works, *Anna Karenina*, *The Kreutzer Sonata*, *Hadji Murat*, *The Gift*, *Pale Fire*, this book brings the twin titans of Russian fiction to bear on contemporary debates about how we read now and how we ought to.

Nancy Fraser and Politics Marjan Ivkovic, Zona Zaric, 2024-12-31

Nancy Fraser and Politics is a systematic reconstruction of the work of Nancy Fraser, a key contemporary figure of critical theory and socialist feminism. It argues that Fraser's critical theory is a powerful and sophisticated analytical prism for diagnosing the breadth of empirical variety and depth of structural causality of injustice and domination in the actually existing capitalist democracies of today and for informing and inspiring numerous political movements struggling for societal emancipation. Ivkovic and Zari demonstrate that a key aspect of Fraser's critical theory, her structural approach to domination, which traces the manifold empirical injustices to a common root cause, is a thread that runs through her entire opus.

Process Facilitation in Psychoanalysis, Psychotherapy and Social Work Sylvia O'Neill, 2018-07-03

Process Facilitation in Psychoanalysis, Psychotherapy and Social Work elaborates a differential theory of therapeutic engagement with full reference not only to psychoanalysis and to psychotherapy but also, surprisingly, to social work. When contemporary social work with the marginalised achieves mutual constructive collaboration, social workers characteristically notice an unfolding process. Could this correspond to the analytic process of psychoanalysis? Sylvia O'Neill seeks to explain theoretically and to illustrate clearly in practice just how a quasi-autonomous therapeutic process becomes established. The theory underpinning the book is Jean-Luc Donnet's conceptualisation of the establishment of the analytic process in psychoanalysis through introjection of the analytic setting. Donnet designates the psychoanalytic setting as the analytic site. O'Neill proceeds

to trace by means of detailed clinical discussion the analogous process by which a viable therapeutic process can become established through created found discovery and introjection of the relevant site or setting in psychoanalytic psychotherapy and in social work Amongst the most important elements are the practitioner s internalised theoretical principles The book demonstrates that unconscious introjection figures more importantly in effective therapeutic engagement than a conscious therapeutic alliance An important corollary for social work is that contrary to popular myth no prior psychological mindedness is required The differential theory of Process Facilitation in Psychoanalysis Psychotherapy and Social Work is equally relevant to psychodynamic counselling

The Poetics of Fear Chris Erickson, 2010-05-05 The Poetics of Fear looks at how fear is used for political purposes focusing on the binary logic of this is the way things are and there is nothing else you can do about it a logic that underlies the realist tradition in international relations theory The Shield of Achilles from Homer s Iliad is used as metaphorical analysis to look at what the politics of fear is how it works and how it can be resisted It aims to provide a human response to human security matters The work first shows how the Shield works to paralyze its audience How can it be resisted One response is to offer a warning about the hazards of bearing the Shield After looking at thinkers such as Plato Baudrillard and Nietzsche the work concludes with an examination of ekphrasis as a critical tool With a unique and fresh perspective The Poetics of Fear will be relevant to those interested in security studies and critical theoretical approaches to political science

The Post-Apocalyptic Novel in the Twenty-First Century H. Hicks, 2016-04-08 Since the beginning of the twenty first century major Anglophone authors have flocked to a literary form once considered lowbrow genre fiction the post apocalyptic novel Calling on her broad knowledge of the history of apocalyptic literature Hicks examines the most influential post apocalyptic novels written since the beginning of the new millennium including works by Margaret Atwood David Mitchell Cormac McCarthy Jeanette Winterson Colson Whitehead and Paolo Bacigalupi Situating her careful readings in relationship to the scholarship of a wide range of historians theorists and literary critics she argues that these texts use the post apocalyptic form to reevaluate modernity in the context of the new century's political economic and ecological challenges In the immediate wake of disaster the characters in these novels desperately scavenge the scraps of the modern world But what happens to modernity beyond these first moments of salvage In a period when postmodernism no longer defines cultural production Hicks convincingly demonstrates that these writers employ conventions of post apocalyptic genre fiction to reengage with key features of modernity from historical thinking and the institution of nationhood to rationality and the practices of literacy itself

Who Counts? Diane M. Nelson, 2015-11-05 In *Who Counts* Diane M Nelson explores the social life of numbers teasing out the myriad roles math plays in Guatemalan state violence economic exploitation and disenfranchisement as well as in Mayan revitalization and grassroots environmental struggles In the aftermath of thirty six years of civil war to count both numerically and in the sense of having value is a contested and qualitative practice of complex calculations

encompassing war losses migration debt and competing understandings of progress Nelson makes broad connections among seemingly divergent phenomena such as debates over reparations for genocide victims Ponzi schemes and antiracist movements Challenging the presumed objectivity of Western mathematics Nelson shows how it flattens social complexity and becomes a raced classed and gendered skill that colonial powers considered beyond the grasp of indigenous peoples Yet the Classic Maya are famous for the precision of their mathematics including conceptualizing zero long before Europeans Nelson shows how Guatemala's indigenous population is increasingly returning to Mayan numeracy to critique systemic inequalities with the goal of being counted in every sense of the word

Germ Wars Melanie Armstrong, 2017-01-17 The United States government has spent billions of dollars to prepare the nation for bioterrorism despite the extremely rare occurrence of biological attacks in modern American history Germ Wars argues that bioterrorism has emerged as a prominent fear in the modern age arising with the production of new forms of microbial nature and the changing practices of warfare In the last century revolutions in biological science have made visible a vast microscopic world and in this same era we have watched the rise of a global war on terror Germ Wars demonstrates that these movements did not occur separately but are instead deeply entwined new scientific knowledge of microbes makes possible new mechanisms of war Whether to eliminate disease or create weapons the work to harness and control germs and the history of these endeavors provide an important opportunity for investigating how biological natures shape modern life Germ Wars aims to convince students and scholars as well as policymakers and activists that the ways in which bioterrorism has been produced have consequences for how people live in this world of unspecified risks
