

## Toads vs. Frogs

Toads and frogs are both amphibians, which means that they spend their early lives in water and later on land. However, there are some differences between the two. Toads tend to have dry, warty skin and are typically found in drier habitats such as deserts, while frogs have smoother skin and prefer moist environments like forests and wetlands. Toads are also more likely to burrow in the ground, while frogs prefer to hop and jump.

Toad

Both toads and frogs are carnivores and eat insects, spiders, and other small animals. They both lay their eggs in water, where they hatch into tadpoles that grow and develop into adult amphibians. Toads and frogs also have powerful legs that they use to jump and swim, and both have eyes on the top of their heads that allow them to see in all directions. However, frogs tend to have longer legs than toads, which makes them better at leaping and jumping.

Frog

Toads and frogs also have different behaviors. Toads are generally slower and less active than frogs, preferring to stay in one spot for long periods of time. They also have the ability to puff up their bodies to make themselves appear larger to predators. Frogs, on the other hand, are more energetic and are often seen jumping and leaping around. They have long, sticky tongues that they use to catch insects and other prey, and they are known for their

distinctive calls, which they use to communicate with other frogs.

*Frogs and Toads of Alabama* Craig Guyer, Mark A. Bailey, 2023-03-07 *Frogs and Toads of Alabama* is the most comprehensive taxonomy of the anuran fauna gathered since Robert H Mount's seminal 1975 volume on the reptiles and amphibians of Alabama. This richly illustrated guide provides an up-to-date summary of the taxonomy and life history of frogs and toads both native and introduced to the state. Alabama possesses one of the most species-rich biotas in north temperate areas, and this richness is reflected in its frogs and toads. The authors examine all known species within the state and describe important regional variations in each species, including changes in species across the many habitats that comprise the state. Significant field studies, especially of Alabama's species of conservation concern, have been performed and are used to inform discussion of each account. The life history entry for each species is comprised of scientific and common names, full color photographs, a morphological description, discussion of habits and life cycle, and a distribution map depicting the species range throughout the state, as well as notes on conservation and management practices. The illustrated taxonomic keys provided for families, genera, species, and subspecies are of particular value to herpetologists. This extensive guide will serve as a single resource for understanding the rich natural history of Alabama by shedding light on an important component of that biodiversity. Accessible to all, this volume is valuable to both the professional herpetologist and the general reader interested in frogs and toads.

*Literature Lures* Nancy J. Polette, Joan Ebbesmeyer, 2002-04-09 Motivate middle school students to become more involved in literature. Introducing hundreds of sophisticated and thought-provoking picture books on a variety of topics, this book shows you how to connect students to literature through picture books. Each title was carefully chosen using as criteria the quality of the writing, the importance of its message, and how easily it could serve as a springboard to novels. Students will become familiar with the basic components of literature, understand idioms and analogies, recognize literary devices, and determine a text's main ideas. Each topic includes questions and writing prompts that will challenge your students. With this book, you will be able to deepen students' understanding of the writer's craft and inspire them to immerse themselves in quality literature.
