Public Sociology Capstones Martin Tolich, 2018-04-17 Social science departments both nationally and internationally market boundless career destinations for their graduates but fail to identify the pathways to these lucrative destinations and appear oblivious to the social forces that threaten their existence such as the discerning parent's investment in their offspring's education and mounting individual student debt This book responds to these social forces drawing on Michael Burawoy's model of Public Sociology to show how a research centred experiential internship provides opportunities for students to draw on their prior learning and realise their potential to create pathways towards employment The author demonstrates how a specific research based course leading to employment with a non government organisation or government department was evaluated and incrementally developed giving voice to its multiple beneficiaries Designed for university teachers this book will appeal to those in social science departments who are using an internship service learning or capstone model for their senior undergraduate classes

Integrative Learning Daniel Blackshields, James Cronin, Bettie Higgs, Shane Kilcommins, Marian McCarthy, Anthony Ryan, 2014-11-13 Current teaching learning and assessment practices can lead students to believe that courses within a programme are self sufficient and separate Integrative Learning explores this issue and considers how intentional learning helps students become integrative thinkers who can see connections in seemingly disparate information and draw on a wide range of knowledge to make decisions Written by international contributors who engaged reflectively with their teaching and their students learning the book seeks to develop a shared language of integrative learning encouraging students to adapt skills learned in one situation to problems encountered in another and make autonomous connections across courses between experiences and throughout their lives More informed teachers can help students develop the necessary attributes for intentional learning which include having a sense of purpose fitting fragmentary information into a learning framework understanding something of their own learning processes asking probing questions reflecting on their own choices and knowing when to ask for help Integrative Learning draws on international research and vast studies to provide the reader with the resources to ensure access to a unified learning experience The book discusses conceptual and technical tools necessary for facilitating integrative learning across a range of disciplines as well as providing learning pedagogies and considers integrative learning in the context of the relevance of higher education in the complexity and uncertainty of the 21st century It will appeal to academics and researchers in the field of higher education as well as those generating higher education curriculums
