The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas

The American Catalogue ,1908 American national trade bibliography **Safe Design and Construction of Machinery** Elizabeth Bluff,2017-03-02

The origin of this book is the compelling evidence that a high proportion of machinery related deaths and injuries are attributable to genuine and serious risks originating within machine design and construction This trend continues despite significant legal obligations notably the European regulatory regime giving effect to the Machinery Directive among others and a substantial body of specialist knowledge originating in the disciplines of human factors and safety engineering Grounded in empirical research with machinery manufacturers this book aims to elucidate the factors and processes shaping firms performance for machinery safety and considers their compatibility with legal obligations Through a unique blending of rich empirical data coupled with safety human factors socio legal and learning scholarship the book provides both a nuanced account of firms performance for machinery safety and makes conceptual and theoretical contributions to understanding and explaining their performance Specifically the book elucidates the role of knowledge and motivational factors and how these are constituted in shaping firms performance It reveals the multiple state and non state influences that create plural responses among manufacturing firms which typically operate in supply chains and networks and often globally These insights provide the foundations to enhance regulatory design and the book s conclusion recommends some innovative directions for regulatory interventions to sustain the safe
