Guide to Advanced Empirical Software

Engineering Forrest Shull,Janice Singer,Dag I. K. Sjøberg,2007-11-21 Empirical studies have become an important part of software engineering research and practice Ten years ago it was rare to see a conference or journal article about a software development tool or process that had empirical data to back up the claims Today in contrast it is becoming more and more common that software engineering conferences and journals are not only publishing but eliciting articles that describe a study or evaluation Moreover a very successful conference International Symposium on Empirical Software Engineering and Measurement journal Empirical Software Engineering and organization International Software Engineering Research Network have all evolved in the last 10 years that focus solely on this area As a further illustration of the growth of empirical software engineering a search in the articles of 10 software engineering journals showed that the proportion of articles that used the term empirical software engineering doubled from about 6% in 1997 to about 12% in 2006 While empirical software engineering has seen such substantial growth there is not yet a reference book that describes advanced techniques for running studies and their application This book aims to fill that gap The chapters are written by some of the top international empirical software engineering researchers and focus on the practical knowledge necessary for conducting reporting and using empirical methods in software engineering The book is intended to serve as a standard reference

The effect of tangible media on individuals in business process modeling Alexander Lübke, 2011 In current practice business processes modeling is done by trained method experts Domain experts are interviewed to elicit their process information but not involved in modeling We created a haptic toolkit for process modeling that can be used in process elicitation sessions with domain experts We hypothesize that this leads to more effective process elicitation This paper brakes down effective elicitation to 14 operationalized hypotheses They are assessed in a controlled experiment using questionnaires process model feedback tests and video analysis The experiment compares our approach to structured interviews in a repeated measurement design We executed the experiment with 17 student clerks from a trade school They represent potential users of the tool Six out of fourteen hypotheses showed significant difference due to the method applied Subjects reported more fun and more insights into process modeling with tangible media Video analysis showed significantly more reviews and corrections applied during process elicitation Moreover people take more time to talk and think about their processes We conclude that tangible media creates a different working mode for people in process elicitation with fun new insights and instant feedback on preliminary results

Principles of Data Management and Presentation Dr. John P. Hoffmann, 2017-07-03 The world is saturated with data We are regularly presented with data in words tables and graphics Students from many academic fields are now

expected to be educated about data in one form or another Yet the typical sequence of courses introductory statistics and research methods does not provide sufficient information about how to focus in on a research question how to access data and work with datasets or how to present data to various audiences Principles of Data Management and Presentation addresses this gap Assuming only that students have some familiarity with basic statistics and research methods it provides a comprehensive set of principles for understanding and using data as part of a research project including how to narrow a research topic to a specific research question how to access and organize data that are useful for answering a research question how to use software such as Stata SPSS and SAS to manage data how to present data so that they convey a clear and effective message A companion website includes material to enhance the learning experience specifically statistical software code and the datasets used in the examples in text format as well as Stata SPSS and SAS formats Visit www.ucpress.edu/go/datamanagement Downloads tab
