Paul B. Baltes, David L. Featherman, Richard M. Lerner, 2014-02-04 This serial publication continues to review life span research and theory in the behavioral and social sciences particularly work done by psychologists and sociologists conducting programmatic research on current problems and refining theoretical positions Each volume introduces excellent peer reviewed empirical research into the field of life span development while presenting interdisciplinary viewpoints on the topic Often challenging accepted theories this series is of great interest to developmental personality and social psychologists Handbook of Research Methods for Studying Daily Life Matthias R. Mehl, Tamlin S. Conner, 2013-10-01

Bringing together leading authorities this unique handbook reviews the breadth of current approaches for studying how people think feel and behave in everyday environments rather than in the laboratory The volume thoroughly describes experience sampling methods diary methods physiological measures and other self report and non self report tools that allow for repeated real time measurement in natural settings Practical guidance is provided to help the reader design a high quality study select and implement appropriate methods and analyze the resulting data using cutting edge statistical techniques Applications across a wide range of psychological subfields and research areas are discussed in detail

Evolution Equations Arising in the Modelling of Life Sciences Messoud Efendiev, 2013-03-14 This book deals with the modeling analysis and simulation of problems arising in the life sciences and especially in biological processes The models and findings presented result from intensive discussions with microbiologists doctors and medical staff physicists chemists and industrial engineers and are based on experimental data They lead to a new class of degenerate density dependent nonlinear reaction diffusion convective equations that simultaneously comprise two kinds of degeneracy porous medium and fast diffusion type degeneracy To date this class is still not clearly understood in the mathematical literature and thus especially interesting The author both derives realistic life science models and their above mentioned governing equations of the degenerate types and systematically studies these classes of equations In each concrete case well posedness the dependence of solutions on boundary conditions reflecting some properties of the environment and the large time behavior of solutions are investigated and in some instances also studied numerically Calculus for The Life Sciences

Sebastian J. Schreiber, Karl J. Smith, Wayne M. Getz, 2017-10-09 In this much anticipated Calculus for Life Sciences Binder Ready Version the authors present the basic canons of first year calculus but motivated through real biological problems The two main goals of the text are to provide students with a thorough grounding in calculus concepts and applications analytical techniques and numerical methods and to have students understand how when and why calculus can be used to model biological phenomena Both students and instructors will find the book to be a gateway to the exciting interface of mathematics and biology This text is an unbound binder ready edition *The Privileged Planet* Guillermo Gonzalez, Jay W.
