  Map Librarianship Susan Elizabeth Ward Aber,Jeremy Aber,2016-11-04 Map Librarianship identifies basic geoliteracy concepts and enhances reference and instruction skills by providing details on finding downloading delivering and assessing maps remotely sensed imagery and other geospatial resources and services primarily from trusted government sources By offering descriptions of traditional maps geographic information systems GIS remote sensing and other geospatial technologies the book provides a timely and practical guide for the map and geospatial librarian to blend confidence in traditional library skill sets Includes rarely discussed concepts of citing and referencing maps and geospatial data fair use and copyright Creates an awareness and appreciation of existing print map collections while building digital stewardship with surrogate map and aerial imagery collections Provides an introduction to the theory and applications of GIS remote sensing participatory neogeography and neocartography practices and other geospatial technologies Includes a list of geospatial resources with descriptions and illustrations of commonly used map types and formats online geospatial data sources and an introduction to the most commonly used geospatial software packages available on both desktop and mobile platforms   Re-envisioning Remote Sensing Applications Ripudaman Singh,2021-03-05 Re envisioning Remote Sensing Applications Perspectives from Developing Countries aims at discussing varied applications of remote sensing with respect to upcoming technologies with diverse themes Organized into four sections of overlapping areas of research the book covers chapters with themes related to agriculture soil and land degradation studies hydrology microclimates and climate change impacts land use land cover analysis applications resource analysis and bibliometric studies culminating with future research agenda All the topics are supported via case studies and spatial data analysis Features Provides the applications of remote sensing in all fields through varied case studies and spatial data analysis Includes soil and land degradation microclimates and climate change impacts Covers remote sensing applications in broad areas of agriculture hydrology land use land cover change and resource analysis Discusses usage of GPS enabled smartphones and digital gadgets used for mapping and spatial analysis Explores future research agenda for applications of remote sensing in post COVID scenario This book is of interest to researchers and graduate students in environmental sciences remote sensing GIS agricultural scientists and managers forestry scientists and managers and water resources scientists and managers   Spatial Analysis in Field Primatology Francine L. Dolins,Christopher A. Shaffer,Leila M. Porter,Jena R. Hickey,Nathan P. Nibbelink,2021-02-18 From foraging patterns in a single tree to social interactions across a home range how primates use space is a key question in the field of primate behavioral ecology Drawing on the latest advances in spatial analysis tools this book offers practical guidance on applying geographic information systems GIS to central questions in primatology An initial methodological section discusses niche modelling home range analysis and agent based modelling with a focus on remote data collection Research based chapters demonstrate how ecologists apply this technology to a suite of topics including calculating the intensity of use of

both range and travel routes assessing the impacts of logging mining and hunting and informing conservation strategies

Ecology of Himalayan Treeline Ecotone S P Singh,Zafar Ahmad Reshi,Rajesh Joshi,2023-02-21 This book brings together comprehensive multi disciplinary knowledge on diverse aspects of the Himalayan treeline ecotone which is considered one of the most sensitive ecosystems to climate change The contents of this book are based on the results of extensive research and provide a holistic understanding of the treeline ecotone in Himalaya The book will serve as an important reference manual and a textbook on treeline ecology The book is unique in the sense that it provides an engaging account of almost all the aspects of the treeline ecotone such as taxonomic functional and phylogenetic species diversity temperature lapse rates tree phenology water relations and stress physiology tree ring width chronology and climate relationships and the role of treeline ecotone in human sustenance in the Indian Himalayan region The treelines in the Himalaya being the highest in the Northern Hemisphere up to 4900 m are among the least investigated systems and hence this book is timely and fills all important knowledge gaps vis vis treeline shifts physiognomic structural and functional changes in mountain landscapes and ecosystems particularly under the changing climate This book for the first time summarizes evidence based knowledge about various aspects of treeline ecotone in Himalaya that was largely generated through a well coordinated a team science approach The book will be of interest to ecologists climatologists dendrochronologists foresters plant physiologists and resource managers and policy planners for a better understanding of the organization and dynamics of this fragile ecosystem in relation to climate change and other anthropogenic stresses that are rampant in the Himalaya The book lays a solid foundation for further investigation of the ecology and dynamics of the treeline ecotone in the Himalayas and provides a rationale for pursuing a team science approach for macroecological investigations *The Roles of Remote Sensing in Nature Conservation* Ricardo Díaz-Delgado,Richard Lucas,Clive Hurford,2017-11-06 The book will provide an overview of the practical application of remote sensing for the purposes of nature conservation as developed by ecologists in collaboration with remote sensing specialists providing guidance on all phases from the planning of remote sensing projects for conservation to the interpretation and validation of the images This book and linked activities have been selected as finalists of the European Natura 2000 award 2020 https natura2000award application eu finalist 3126 *Emerging Trends, Techniques, and Applications in Geospatial Data Science* Gaur, Loveleen,Garg, P.K.,2023-04-24 With the emergence of smart technology and automated systems in today s world big data is being incorporated into many applications Trends in data can be detected and objects can be tracked based on the real time data that is utilized in everyday life These connected sensor devices and objects will provide a large amount of data that is to be analyzed quickly as it can accelerate the transformation of smart technology The accuracy of prediction of artificial intelligence AI systems is drastically increasing by using machine learning and other probability and statistical approaches Big data and geospatial data help to solve complex issues and play a vital role in future applications Emerging Trends Techniques and Applications in Geospatial Data Science provides an

overview of the basic concepts of data science related tools and technologies and algorithms for managing the relevant challenges in real time application domains The book covers a detailed description for readers with practical ideas using AI the internet of things IoT and machine learning to deal with the analysis modeling and predictions from big data Covering topics such as field spectra high resolution sensing imagery and spatiotemporal data engineering this premier reference source is an excellent resource for data scientists computer and IT professionals managers mathematicians and statisticians health professionals technology developers students and educators of higher education librarians researchers and academicians   Dynamic Response of Coasts and Estuaries to Human Impacts Xiao Hua Wang,2024-07-25 The coasts cover a diverse range of ecosystems within marine estuarine and freshwater environments They are some of the most heavily populated and visited areas and are also some of the most threatened natural habitats Coastal zones are critically important not only to the people who live there but for the health of the planet Many world estuaries and coast environments are under tremendous stress in response to global warming and the increased anthropogenic forcing Warmer waters rising sea levels tropical cyclones storm surges and flooding and coastal erosion are just some of the elements impacting coastal communities worldwide and transforming these environments Coastal hazards such as storm events with associated storm surges are increasing in frequency and intensity as are marine heatwaves that devastate coral reefs Human activities like sewage discharge overfishing navigation channel dredging land reclamation the construction of shipping ports and marine plastics are also responsible for coastal pollution and degradation Therefore a good understanding of the current state of coastal environments and lessons learnt from these human influences is extremely valuable to restore and protect these habitats and ecosystems from further environmental degradation and even catastrophe In this book case studies are used to tell a story about how these environments respond to severe human induced perturbations and what has gone right and wrong from environmental and resource management point of view The readership of the book include high level undergraduate Oceanography students and workers from Coastal Engineering and Management   Advances in Remote Sensing Technology and the Three Poles Manish Pandey,Prem C. Pandey,Yogesh Ray,Aman Arora,Shridhar D. Jawak,Uma K. Shukla,2022-12-12 ADVANCES IN REMOTE SENSING TECHNOLOGY AND THE THREE POLES Covers recent advances in remote sensing technology applied to the Three Poles a concept encompassing the Arctic Antarctica and the Himalayas Advances in Remote Sensing Technology and the Three Poles is a multidisciplinary approach studying the lithosphere hydrosphere encompassing both limnosphere and oceanosphere atmosphere biosphere and anthroposphere of the Arctic the Antarctic and the Himalayas The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere biosphere and lithosphere while unanswered questions of the polar regions will help plan and formulate future research projects Sample topics covered in the work include Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution Glaciers and glacial environments including a

geological geophysical and geospatial survey of Himalayan glaciers Sea ice dynamics in the Antarctic region under a changing climate the Quaternary geology and geomorphology of Antarctica Continuous satellite missions data availability and the nature of future satellite missions including scientific data sharing policies in different countries Software tools models and remote sensing technology for investigating polar and other environments For postgraduates and researchers working in remote sensing photogrammetry and landscape evolution modeling Advances in Remote Sensing Technology and the Three Poles is a crucial resource for understanding current technological capabilities in the field along with the latest scientific research that has been conducted in polar areas **Science, Policies and Conflicts of Climate Change** Neloy Khare,2023-01-01 This collection of articles captures and disseminates contemporary perspectives on climate change from an Indian context Starting with an argument on a new climate deal which highlights the importance of policies and regulations within the climate change debate some of India s best known geologists meteorologists climate scientists and archaeologists have put forward their concerns and convictions in this collection The book covers articles on climate change scenarios impacts policies regulations and protocols as well as geopolitical and geoeconomics implications of climate change over the Indian sub continent including climatogenic vulnerability analyses of sea level rise SLR and crop production assessment The geological perspectives of climate change over the Indian sub continent are covered along with highlighted climate impacts on the chemical weathering and maturity of sediments as well as on the manganese mineralisation in manganiferous quartzite in the Boringpadar Amath area The evolution of the monsoon the most significant event of tropical belt is addressed through lake s and river s sediments assessing the anthropogenic influences Climatic conditions reconstructed through Quaternary alluvial sediments as proxy indicator of past climatic conditions over the Indian sub continent are presented There is also a separate chapter on the role of cosmic radio nuclide in paleoclimatic reconstructions The inter relation of climate change and tectonics over the Indian sub continent is also covered while the geopolitics on the conflicts of climate change have been discussed in the larger perspective of the South Asian region **GIS World Sourcebook 1995** [Anonymus AC01149836],1994 **Suelo y cambio climático** Aguirre Forero, Sonia Esperanza,Piraneque Gambasica, Nelson Virgilio,Mercado Fernández, Teobaldis,2022-02-28 Suelo y cambio clim tico es un enfoque sist mico resultado de investigaciones en el rea de edafolog a orientado a contribuir a la comprensi n y apropiaci n del recurso como base del sistema ecol gico Este texto contiene experiencias contextualizadas que permiten repensar el uso del suelo y hacer aportes en la transformaci n de las relaciones socioculturales que sustentan los saberes a fin de orientar un mejor manejo del recurso prioridad indispensable para sostener la vida lo que conlleva a repensar alternativas que limiten los efectos de la actividad antr pica ERDAS Imagine Configuration Guide ,2001 **ERDAS IMAGINE version 8.3** Stacey Schrader,Russ Pouncey,ERDAS (Firm),1997
