Eric Voegelin The Restoration Of Order Library Of Modern Thinkers:

Eric Voegelin Maichael P. Federici,2024-09-03 A Simon Schuster eBook Simon Schuster has a great book for every reader The Political Philosophy of Eric Voegelin and His Followers David R. Cole,2008 This work is the first book length criticism of the political philosophy of the noted twentieth century professor and theorist The Gospel in the Dock Bryan M. Christman,2021-08-10 C S Lewis famously penned the phrase God in the Dock and proposed that there was a great divide between ancient and modern humans in that our ancestors would have rightly seen themselves in the dock before God while we moderns have placed God there before us But what if what God s love most desires for us the gospel or good news of the only way of life for humanity has been in the dock before us from the time of Adam and Eve And what if it is also the case that the gospel is often in the dock as though it is not good even for the church This book builds upon and expands the life and death stakes Lewis proposed by demonstrating that the gospel way of faith itself has been placed in the dock by us and in many ways ruined our relationships with God with our own selves with one another and even with the natural world itself which we are meant to steward for its good In these pages the reader will discover why the gospel that requires faith is good news but why we so tragically default to our divisive and self destructive ways Library Journal ,2002 **Bibliographie österreichischer Bibliographien, Sammelbiographien und Nachschlagewerke** Karl F. work to account for the endemic political violence of the twentieth century One of the most original political philosophers of the period Voegelin has largely avoided ideological labels or categorizations of his work Because of this however and because no one work or volume of his can do justice to his overall project his work has been seen as difficult to approach Drawing from the University of Missouri Press's thirty four volume edition of *The Collected Works of Eric Voegelin* 1990 2009 Charles Embry and Glenn Hughes have assembled a selection of representative works of Voegelin satisfying a longstanding need for a single volume that can serve as a general introduction to Voegelin's philosophy The collection includes writings that demonstrate the range and creativity of Voegelin's thought as it developed from 1956 until his death in 1985 in his search for the history of order in human society The Reader begins with excerpts from *Autobiographical Reflections* 1973 which include an orienting mixture of biographical information philosophical motivations and the scope of Voegelin's project It reflects key periods of Voegelin's philosophical development pivoting on his flight from the Gestapo The next section focuses on Voegelin's understanding of the contemporary need to re ground political science in a non positivistic post Weberian outlook and method It begins with Voegelin's historical survey of science and scientism followed by his explanation of what political science now requires in his introduction to *The New Science of Politics* Also included are two essays that exemplify the practice of this new science Voegelin started his academic career as a political scientist and these early essays indicate his wide philosophical vision Voegelin recognized that a fully responsible new science of politics would require the development of a philosophy of history This led to the writing of his magnum opus the five volume *Order and History* 1956 1985 This section of the Reader includes his introductions to volumes 1 2 and 4 and his most essential accounts of the theoretical requirements and historical scope of a philosophy of history adequate to present day scholarship and historical discoveries In the course of his career Voegelin came to understand that political science political philosophy and philosophy of history must have as their theoretical nucleus a sound philosophical anthropology based on an accurate philosophy of human consciousness The next set of writings consists of one late lecture and four late essays that exemplify how Voegelin recovers the wisdom of classical philosophy and the Western religious tradition while criticizing modern misrepresentations of consciousness The result is Voegelin's contemporary accounts of the nature of reason the challenge of truly rational discussion and the search for divine origins and the life of the human spirit During his philosophical journey Voegelin addressed the historical situatedness of human existence explicating the historicity of human consciousness in a manner that gave full due to the challenges of acknowledging both human immersion in the story of history and the ability of consciousness to arrive at philosophically valid truths about existence that are transhistorical The essays in this final section present the culmination of his philosophical meditation on history consciousness and reality
