thoroughly readable overview of 14 19 education and training and makes suggestions for the kind of education and training that should be provided over the coming decade and beyond The authors acknowledge that much has been achieved by the respective governments massive investment in resources closer collaboration between schools colleges training providers voluntary agencies and employers recognition and promotion of a wider range of qualifications They are also optimistic about the good things that are going on in many secondary classrooms enormous amounts of creativity courageous efforts to meet problems a deep concern and caring for many young people otherwise deprived of hope and opportunity But they argue for a radical reshaping of the future in the light of a broader vision of education a greater respect for more practical and active learning a system of assessment which supports rather than impoverishes learning respect for the professional expertise of the teacher a more unified system of qualifications ensuring progression into higher education and employment the creation of strongly collaborative and local learning systems and a more reflective and participative approach to policy Education for All should be read by everyone working in or with an interest in secondary level education in England and Wales and beyond

Almanack for the Year of Our Lord ... Joseph Whitaker,2005 **Education under Siege** Mortimore, Peter,2013-09-23 At a
 time when education is considered crucial to a country s economic success recent UK governments have insisted their
 reforms are the only way to make England s system world class Yet pupils are tested rather than educated teachers bullied
 rather than trusted and parents cast as winners or losers in a gamble for school places Education under siege considers the
 English education system as it is and as it might be In a highly accessible style Peter Mortimore an author with wide
 experience of the education sector both in the UK and abroad identifies the current system s strengths and weaknesses He
 concludes that England has some of the best teachers in the world but one of the most muddled systems Challenging the
 government s view that there is no alternative he proposes radical changes to help all schools become good schools They
 include a system of schools receiving a fair balance of pupils who learn easily and those who do not ensuring a more even
 spread of effective teachers as well as banning league tables outlawing selection opening up faith schools and integrating
 private schools into the state system In the final chapter he asks readers who share his concerns to demand that the
 politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the
