Watson,2020-07-27 In *Afterlives of Affect* Matthew C Watson considers the life and work of artist and Mayanist scholar Linda Schele 1942-98 as a point of departure for what he calls an excitable anthropology As part of a small collective of scholars who devised the first compelling arguments that Maya hieroglyphs were a fully grammatical writing system Schele popularized the decipherment of hieroglyphs by developing narratives of Maya politics and religion in popular books and public workshops In this experimental person centered ethnography Watson shows how Schele's sense of joyous discovery and affective engagement with research led her to traverse and disrupt borders between religion science art life death and history While acknowledging critiques of Schele's work and the idea of discovery more generally Watson contends that affect and wonder should lie at the heart of any reflexive anthropology With this singular examination of Schele and the community she built around herself and her work Watson furthers debates on more than human worlds spiritualism modernity science studies affect theory and the social conditions of knowledge production **Crime Scene Investigator** Tamra B.
