Forest Tourism And Recreation Case Studies In Environmental Management Cabi:

Forest Tourism and Recreation Xavier Font, John Tribe, 2000-01-01 Annotation The demand for ecotourism and outdoor recreation is increasing and the pressures on land use are becoming more obvious A large part of the experience of ecotourism and recreational landscape depends on the maintenance of forested land Effective management of tourism and recreation in forests can provide extra income to help offset the costs of sustainable timber production and encourage biodiversity conservation This multi author book considers the compatibility between tourism forestry and conservation the management of natural resources and the involvement of stakeholders and the community Issues are presented through case studies from a range of countries and topics covered include National Parks peri urban forestry and wilderness management as well as practitioner oriented contributions

Rainforest Tourism, Conservation and Management Bruce Prideaux, 2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change

Tourism and Global Environmental Change Stefan Gössling, Michael C. Hall, 2006-06-07 This fascinating book is the first comprehensive analysis of the economic social and political interrelationships between tourism and global environmental change one of the most significant issues facing humankind today Its contributors argue that the impacts of these changes are potentially extremely serious both for the tourism industry and for the communities dependent upon it Integrating knowledge from the social and physical sciences this significant book explores the key issues surrounding global environmental change as well as government and industry willingness to meet the challenges posed by it Divided into four main sections it investigates the tourism and global environmental change relationship in specific environments global issues related to environmental change differing perceptions of global environmental change held by tourists and the tourist

industry Comprehensive in scope topical and integrative this key text is essential reading for students scholars and researchers in all aspects of tourism geography and environmental studies

Environmental Management and Development Christopher J. Barrow, 2005 The environment and its management has been and continues to be a very topical issue Existing environment and development texts place emphasis is on listing problems making warnings and voicing advocacy but by focusing on environmental management this informative book offers a very different perspective Moving on from the usual much discussed viewpoints Barrow looks towards practical management and problem solving techniques He clarifies the definition nature and role of environmental management in development and developing countries beginning with an introduction to the key terms issues and tools of environmental management which are linked and developed in later chapters and concluding by discussing who pays for environmental management and its future in developing countries Written by an experienced and well known author this clear user friendly book ideal for students of resource management geography and development studies makes excellent use of chapter summaries boxed case studies annotated further readings and websites discussion questions and illustrations

Forests And Forest Plants - Volume II John N. Owens, H. Gyde Lund, 2009-02-24 Forests and Forest Plants is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Forests are an essential part of Earth's life support systems Forest resources are essential for humankind They provide both vital goods and services They provide food fuel shelter soil and water protection and filter the air we breathe This publication on Forest and Forest Plants provides the user with such information as to create an awareness of the value of our forestlands and the products and environmental services they provide The three volumes on Forests and Forest Plants are organized starting with first the necessity of the World's Forest Resources including classification and distribution of forest urban forestry and agroforestry Important Tree Species including trees in reclamation and arid zone forestry Forests and Forest Products including wood and non wood products the Role of Forests in the Biosphere preserving biological diversity functions in the hydrological cycle etc and Conservation and Breeding of Forest Trees what is being done

to improve our forest resources silviculture tree nurseries and forest protection The theme Forest and Forest Plants has led to the conclusion that there are substantial difficulties in matching environmental concerns and sustainability with an ever increasing world population Thus there is a tension between maximizing for food wood and production on the one hand and implementing sustainable development and environmental protection on the other These three volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs

Environmental Management for Sustainable Development Chris Barrow, 2006-09-27 Environmental management is a wide expanding and rapidly evolving field affecting everyone from individual citizens to businesses governments to international agencies Indisputably it plays a crucial role in the quest for sustainable development This comprehensively updated second edition explores the nature and role of environmental management covering key principles practices tools strategies and policies offers a thorough yet understandable introduction and points to further in depth coverage Among the key themes covered are sustainable development proactive approaches the precautionary principle the polluter pays principle the need for humans to be less vulnerable and more adaptable Reflecting the expansion and evolution of the field this revised edition focuses strongly on sustainable development There has been extensive restructuring to ensure the book is accessible to those unfamiliar with environmental management and it now includes greater coverage of topics including key resources under stress environmental management tools climate change and urban environmental management With rapid expansion and development of the subject it is easy for those embarking on a course of study to become disorientated but with its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all

Sustainable tourism management and monitoring. Destination, Business and Stakeholder Perspectives Patrizia Modica, 2016-03-03T00:00:00+01:00 368 7 Forest Policies and Social Change in England Sylvie Nail, 2008-05-08 Forestry has been witness to some dramatic changes in recent years with several Western countries now moving away from the traditional model of regarding forests merely as sources of wood Rather these countries are increasingly recognizing their forests as multi purpose resources with roles which go far beyond simple economics In this innovative book Sylvie Nail uses England as a case study to explore the relationships between forests society and public perceptions raising important questions about forest policy and management both now and in the future Adopting a sociological approach to forest policy and management the book discusses the current validity of the two principles underlying forestry since the Middle Ages first that forestry should only exist when no better use of the land can be made and second that forestry itself should be profitable The author stresses how values and perceptions shape policies and conversely how policies can modify perceptions and also how policies can fail if they do not take perceptions into account She concludes that many of the issues facing English forestry in the 21st century from leisure health and amenity provision through education and rural as well as urban

regeneration to biodiversity conservation go well beyond both national borders and the scope of forestry Indeed forestry in the 21st century seems to be less about planting and managing trees than about being a vector and a mirror of social change This novel synthesis provides a valuable resource for advanced students and researchers from all areas of natural resource studies including those interested in social history socio economics cultural geography and environmental psychology as well as those studying landscape ecology environmental history policy analysis and natural resource management

Getting Biodiversity Projects to Work Thomas O. McShane, Michael P. Wells, 2004 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945 He then provides a historical overview of the events in question beginning with the decision and program to build the atomic bomb Detailing the sequence of events leading to Japan's surrender he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders Finally Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents scholarly books and articles
