Forests Robert Pogue Harrison, 2009-05-08 In this wide ranging exploration of the role of forests in Western thought Robert Pogue Harrison enriches our understanding not only of the forest's place in the cultural imagination of the West but also of the ecological dilemmas that now confront us so urgently Consistently insightful and beautifully written this work is especially compelling at a time when the forest as a source of wonder respect and meaning disappears daily from the earth *Forests* is one of the most remarkable essays on the human place in nature I have ever read and belongs on the small shelf that includes Raymond Williams masterpiece *The Country and the City* Elegantly conceived beautifully written and powerfully argued *Forests* is a model of scholarship at its passionate best No one who cares about cultural history about the human place in nature or about the future of our earthly home should miss it William Cronon *Yale Review* *Forests* is among other things a work of scholarship and one of immense value one that we have needed It can be read and reread added to and commented on for some time to come John Haines *The New York Times Book Review*

Forests Robert Pogue Harrison, 1992-04-22 In this wide ranging exploration of the role of forests in Western thought Robert Pogue Harrison enriches our understanding not only of the forest's place in the cultural imagination of the West but also of the ecological dilemmas that now confront us so urgently Consistently insightful and beautifully written this work is especially compelling at a time when the forest as a source of wonder respect and meaning disappears daily from the earth *Forests* is one of the most remarkable essays on the human place in nature I have ever read and belongs on the small shelf that includes Raymond Williams masterpiece *The Country and the City* Elegantly conceived beautifully written and powerfully argued *Forests* is a model of scholarship at its passionate best No one who cares about cultural history about the human place in nature or about the future of our earthly home should miss it William Cronon *Yale Review* *Forests* is among other things a work of scholarship and one of immense value one that we have needed It can be read and reread added to and commented on for some time to come John Haines *The New York Times Book Review*

Forests Robert Pogue Harrison, 1993 *The Environmental Imagination* Lawrence Buell, 1995 With Thoreau's *Walden* as a touchstone Buell offers an account of environmental perception the place of nature in the history of Western thought and the consequences for literary scholarship of attempting to imagine a more ecocentric way of being In doing so he provides a profound rethinking of our literary and cultural reflections on nature

We are Forests Jean-Baptiste Vidalou, 2023-06-06 From the Sivens forest in France to the Hambach forest in Germany from the Broadback forest in Canada to the rainforests of Borneo something has shifted in these wild spaces over the last decade or two People have begun to inhabit the forests oppose the loggers and use their bodies as shields motivated by the determination to resist the lethal ecosystem of commercial exploitation *Forests* have become a battleground in the struggle between groups with fundamentally divergent aims and objectives *Forests* are made up of insurgents Jean Baptiste Vidalou went to see some of these forests and meet those who are defending them he discovered a

completely different way of understanding the world sharply opposed to the mentality of planners who see forests as just one more territory to be managed Here he recounts this encounter relays what these forest peoples and struggles convey not to offer any recipes or ready made solutions to the crises of our times but to be the forest like a force that grows stem by stem leaf by leaf slowly becoming ungovernable

For the Wild Sarah M. Pike, 2017-10-03 For the Wild explores the ways in which the commitments of radical environmental and animal rights activists develop through powerful experiences with the more than human world during childhood and young adulthood The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection Emotions and memories of wonder love compassion anger and grief shape activists protest practices and help us understand their deep rooted dedication to the planet and its creatures Drawing on analyses of activist art music and writings as well as interviews and participant observation in activist communities Sarah M Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity

This Sacred Earth Roger S. Gottlieb, 2003-11-07 Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly theological and activist religious environmentalism the second edition of This Sacred Earth is an unparalleled resource for the study of religion s complex relationship to the environment

Aesthetics beyond the Arts Arnold Berleant, 2016-03-23 Taking the view that aesthetics is a study grounded in perception the essays in this volume exhibit many sides of the perceptual complex that is the aesthetic field and develop them in different ways They reinvigorate our understanding of such arts as music and architecture they range across the natural landscape to the urban one they reassess the place of beauty in the modern environment and reassess the significance of the contributions to aesthetic theory of Kant and Dewey and they broach the kinds of meanings and larger understanding that aesthetic engagement with the human environment can offer Written over the past decade these original and innovative essays lead to a fresh encounter with the possibilities of aesthetic experience one which has constantly evolved moving in recent years in the direction of what Berleant terms social aesthetics which enhances human environmental integration and sociality

Harlan-Haughey,2016-03-31 Arguing that outlaw narratives become particularly popular and poignant at moments of national ecological and political crisis Sarah Harlan Haughey examines the figure of the outlaw in Anglo Saxon poetry and Old English exile lyrics such as Beowulf works dealing with the life and actions of Hereward the Anglo Norman romance of Fulk Fitz Waryn the Robin Hood ballads and the Tale of Gamelyn Although the outlaw s wilderness shelter changed dramatically from the menacing fens and forests of Anglo Saxon England to the bright known and mapped greenwood of the late outlaw romances and ballads Harlan Haughey observes that the outlaw remained strongly animalistic other and liminal His brutality points to a deep literary ambivalence towards wilderness and the animal at the same time that figures such as the Anglo Saxon resistance fighter Hereward the brutal yet courtly Gamelyn and Robin Hood often represent a lost England imagined as pristine and forested In analyzing outlaw literature as a form of nature writing Harlan Haughey suggests that it often reveals more about medieval anxieties respecting humanity s place in nature than it does about the political realities of the period *Landscapes and Communities on the Pacific Rim: From Asia to the Pacific Northwest* Karen K. which were launched following talks at the American Museum of Natural History in New York City these metaphorical elephants in the room are combined with a study of the exploitation of actual elephants on the continent of Africa and the iterations of memory that are disclosed or hidden in the writing of memoirs and the collecting of bones for museums The Moral Authority of Nature Lorraine Daston, Fernando Vidal, 2010-08-15 For thousands of years people have used nature to justify their political moral and social judgments Such appeals to the moral authority of nature are still very much with us today as heated debates over genetically modified organisms and human cloning testify The Moral Authority of Nature offers a wide ranging account of how people have used nature to think about what counts as good beautiful just or valuable The eighteen essays cover a diverse array of topics including the connection of cosmic and human orders in ancient Greece medieval notions of sexual disorder early modern contexts for categorizing individuals and judging acts as against nature race and the origin of humans ecological economics and radical feminism The essays also range widely in time and place from archaic Greece to early twentieth century China medieval Europe to contemporary America Scholars from a wide variety of fields will welcome The Moral Authority of Nature which provides the first sustained historical survey of its topic Contributors Danielle Allen Joan Cadden Lorraine Daston Fa ti Fan Eckhardt Fuchs Valentin Groebner Abigail J Lustig Gregg Mitman Michelle Murphy Katharine Park Matt Price Robert N Proctor Helmut Puff Robert J Richards Londa Schiebinger Laura Slatkin Julia Adeney Thomas Fernando Vidal **Anthropocene Ecologies of Food** Simon C. Estok, S. Susan Deborah, Rayson K. Alex, 2022-06-22 Anthropocene Ecologies of Food provides a detailed exploration of cross cultural aspects of food production culinary practices and their ecological underpinning in culture The authors draw connections between humans and the entire process of global food production focusing on the broad implications these processes have within the geographical and cultural context of India Each chapter analyzes and critiques existing agricultural food practices and representations of aspects of food through various media such as film literature and new media as they relate to global issues generally and Indian contexts specifically correcting the omission of analyses focused on the Global South in virtually all of the work that has been done on Anthropocene ecologies of food This unique volume employs an ecocritical framework that connects food with the land in physical and virtual communities and the book as a whole interrogates the meanings and implications of the Anthropocene itself India's Forests, Real and Imagined Alan Johnson, 2022-12-29 As they seek to explore evolving and conflicting ideas of nationhood and modernity India's writers have often chosen forests as the dramatic setting for stories of national identity India's Forests Real and Imagined explores how these settings have been integral to India's sense of national consciousness Alan Johnson demonstrates that modern writers have drawn on older Indian literary traditions of the forest as a place of exile trial and danger to shape new ideas of India as a modern nation The book casts new light on a wide range of modern writers from Bankim Chandra Chattopadhyay widely regarded as the first Indian novelist to contemporary authors such as Amitav Ghosh Arundhati Roy and Salman Rushdie as well as local attitudes to nationhood and

the environment across the country Before the UN Sustainable Development Goals Martin Gutmann, Daniel Gorman, 2022
This volume examines the legacies and historical context of the UN Sustainable Development Goals The complex background of relationships actors and institutions of the several goals are explored in detail by international experts from a range of disciplines *The Forest in Medieval German Literature* Albrecht Classen, 2015-06-03 By pursuing an ecocritical reading
The Forest in Medieval German Literature examines passages in medieval German texts where protagonists operated in the forest and found themselves either in conflictual situations or in refuge By probing the way the individual authors dealt with the forest illustrating how their characters fared in this sylvan space the role of the forest proved to be of supreme importance in understanding the fundamental relationship between humans and nature The medieval forest almost always introduced an epistemological challenge how to cope in life or how to find one's way in this natural maze By approaching these narratives through modern ecocritical issues that are paired with premodern perspectives we gain a solid and far reaching understanding of how medieval concepts can aid in a better understanding of human society and nature in its historical context This book revisits some of the best and lesser known examples of medieval German literature and the critical approach used here will allow us to recognize the importance of medieval literature for a profound reassessment of our modern existence with respect to our own forests
